Road Work Kenneth A. Small,Clifford Winston,Carol A. Evans,2012-01-01 America's interstate highway system is deteriorating, and traffic congestion in most urban centers is worsening. Because of the many strong and conflicting interests, policy discussions about the road system are also in gridlock. The only consensus that seems to have emerged is that public spending must be increased. Improving our highway system and its financing will not be easy. Road Work proposes a comprehensive highway pricing and investment policy to meet the goals of efficiency, equity, and financial stability. In this study, Kenneth A. Small, Clifford Winston, and Carol A. Evans base their policy on two economic principles: efficient pricing to regulate demand for highway services and efficient investment to minimize the total public and private costs of providing them. Policy recommendations include a set of pavement-wear taxes for heavy trucks, a set of congestion taxes for all vehicles, and a program of optimal investments in road durability. Their proposals should be especially attractive to policymakers because they can be implemented with current technology, offer little threat to the major interest group, and in the long run will reduce the strain on state and local governments' highway budgets.

Managing Innovation and Change David Mayle,2006-09-18 Building on the success of the Second Edition with 19 new chapters, Managing Innovation and Change showcases the best work of thinkers writing in this area and provides a coherent picture of key ideas and concepts to have emerged from this exciting field. Frequently radical and intentionally provocative in terms of topic and treatment, the book: - covers the increasing diversity of pressures to which modern enterprises are subjected; - reviews some of the more persistent acronyms to which the art of management is increasingly prone; - examines the nature of innovation; - looks at the broader issues surrounding change, and - turns to those attributes of leadership which are consistent with the successful management of innovation and change.

British Summer Time Begins Ysenda Maxtone Graham,2020-07-09 British Summer Time Begins is about summer holidays of the mid-twentieth century and how they were spent, as recounted to Ysenda Maxtone-Graham in vividly remembered detail by people who were there. Through this prism, it paints a revealing portrait of twentieth-century Britain in summertime: how we were, how families functioned, what houses and gardens and streets were like, what journeys were like, and what people did all day in their free time. It explores their expectations, hopes, fears and habits, the rules or lack of rules under which they lived, their happiness and sadness, their sense of being treasured or neglected - all within living memory, from pre-war summers to the late 1970s. Ysenda takes us back to the long stretch of time from the last days of June till the early days of September - those months when the term-time self was cast off and you could become the person you really were, and you had (if you were lucky) enough hours in the endless succession of days to become good at the things that would later define your adulthood. The 'showpiece' part of the summer holidays was 'the summer holiday', when families took off to the seaside, or to grandparents' houses teeming with cousins, or on early package holidays to France or Spain, siblings wedged into the back of small cars, roof-racks clattering, mothers preparing picnics. British Summer Time Begins is as much about the long weeks either side of that holiday as the trip itself: the weeks when nothing much officially happened, boredom often lurked nearby, and you vanished for hours on end, nobody much knowing or even caring where you were. Could it be that those unscheduled days were actually the most important and formative of your life? From the author of the beloved Terms & Conditions, British Summer Time Begins is a delightful, nostalgic and joyous celebration of summers.

Peroxisome Proliferation and Its Role in Carcinogenesis ,1995 A state-of-the-art consensus report on what is known about peroxisome proliferation, the mechanisms involved, and their relevance to carcinogenesis. Peroxisomes are single, membrane-limited, cytoplasmic organelles that are found in cells of animals, plants, fungi, and protozoa. Peroxisome proliferators include certain hypolipidaemic drugs, phthalate ester plasticizers, industrial solvents, herbicides, food flavours, leukotriene D4 antagonists, and hormones. Numerous studies in rats and mice have demonstrated the hepatocarcinogenic effects of peroxisome proliferators, and these compounds have been unequivocally established as carcinogens. Since humans are exposed to peroxisome proliferators to a significant extent, assessment of the adverse biological effects of this group of compounds, and particularly their potential carcinogenicity, has become an important issue. The report has two parts. The first records the consensus reached by a group of eleven experts, including several of the leading investigators in this field. Questions addressed include the mechanisms by which peroxisome proliferators exert their carcinogenic effects in rodents, the relevance of animal studies to the evaluation of carcinogenic risk in humans, and the potential use of peroxisome proliferation as a biological marker for liver cancer. The report concludes that compounds inducing peroxisome proliferation in rats and mice have little, if any, effect on human liver. The report also issues advice on the interpretation of peroxisome proliferation, demonstrated in animal studies, when evaluating the carcinogenic risk to humans. The second part consists of three background papers presented by members of the working group.

Restructuring Uganda's Coffee Industry John Baffes,2006 After experiencing a boom during the mid-1990s, the performance of Uganda's coffee industry has been disappointing. Most existing analyses see the sector's problems as quality deterioration, poor marketing position in the global market, weak regulatory framework, and poor infrastructure. Recommendations range from setting up a coffee auction to increasing the share of specialty coffees. This paper concludes that such advice has been largely inconsistent with the stylized facts of the Ugandan coffee industry. It argues that the coffee wilt disease and the effectiveness of the coffee replanting program are the two key issues on which policymakers and the donor community should focus their activities and allocate their resources.

Hidden Challenges to Education Systems in Transition Economies Sue E. Berryman,2000-01-01 This book provides diagnostic and strategic analysis of the challenges to educational systems in the transition economies of the Eastern and Central Europe and Central Asia. At the outset of the transition many of these countries educational systems had solved problems such as limited access, gender inequalities, and poor quality outputs that still plague other regions of the world. Many policy makers believed that education was not a problem sector in transition countries. This report presents originally unforeseen results which suggest that deep and broad problems are emerging in the sector and were threatening many countries' achievements in education. The region's education systems which once were a good fit with the planned economies and authoritarian political systems are proving to be a poor fit with market economies and more open political systems. Inequities in learning opportunities are increasing at a time when human capital is becoming ever more important in the region's recovery and development. The danger is that in some countries of the region these education problems, left unchecked, could threaten to create a vicious circle that will make poverty and social exclusion a powerful generational inheritance.

Reforming Education Finance in Transition Countries Juan Diego Alonso,Alonso Sánchez,2011 This book reviews the experience with one specific though widely introduced approach to funding general education, namely per

capita financing (PCF), in six countries in the Europe and Central Asia (ECA) region in an effort to learn which outcomes were achieved and how. Six country case studies are the bulk of the book and were chosen as a project that the World Bank initiated back in 2007. The set of countries chosen (Armenia, Estonia, Georgia, Lithuania, Poland and the Russian Federation) was motivated by the fact that the World Bank was actively involved in supporting reforms in these countries and, in some cases, played a fundamental role in bringing these reforms to fruition. The hope is that, as a result, the likelihood of observing the outcomes of per capita financing is higher. An attempt was made at geographic variation across the ECA region as well. Chapter 1 provides a general introduction to the book. Chapters 2 through 7 discuss the country case studies. The case studies are presented in alphabetical order: Armenia (chapter 2), Estonia (chapter 3), Georgia (chapter 4), Lithuania (Chapter 5), Poland (Chapter 6), and Russia (chapter 7). All six chapters present a similar structure. First, an introduction is provided to motivate the discussion. Second, the historical background to the introduction of the PCF system is discussed. Third, the design of the PCF scheme is analyzed. Fourth, the peculiarities of the implementation of the scheme are described. Fifth, an assessment of a set of three main outcomes - efficiency, equity and transparency/accountability - is presented. A sixth and final section provides a summary of the lessons learned in each of the cases. Chapter 8 presents an in-depth overview of the case studies, within a common framework to compare these experiences.

A Guide to the Congestion Mitigation and Air Quality Improvement Program United States. Federal Highway Administration,1994 The Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) established the Congestion Mitigation and Air Quality Improvement (CMAQ) Program. The CMAQ Program emphasizes the importance of the link between transportation and air quality, by providing 6 billion dollars between 1992-1997 for transportation projects and programs to improve air quality. Consequently, many areas will be able to implement transportation control measures (TCMs), in compliance with the mandates of the Clean Air Act Amendments of 1990 (CAAA).

Human Dignity George Kateb,2011-01-03 We often speak of the dignity owed to a person. And dignity is a word that regularly appears in political speeches. Charters are promulgated in its name, and appeals to it are made when people all over the world struggle to achieve their rights. But what exactly is dignity? When one person physically assaults another, we feel the wrong demands immediate condemnation and legal sanction. Whereas when one person humiliates or thoughtlessly makes use of another, we recognize the wrong and hope for a remedy, but the social response is less clear. The injury itself may be hard to quantify. Given our concern with human dignity, it is odd that it has received comparatively little scrutiny. Here, George Kateb asks what human dignity is and why it matters for the claim to rights. He proposes that dignity is an “existential” value that pertains to the identity of a person as a human being. To injure or even to try to efface someone’s dignity is to treat that person as not human or less than human—as a thing or instrument or subhuman creature. Kateb does not limit the notion of dignity to individuals but extends it to the human species. The dignity of the human species rests on our uniqueness among all other species. In the book’s concluding section, he argues that despite the ravages we have inflicted on it, nature would be worse off without humanity. The supremely fitting task of humanity can be seen as a “stewardship” of nature. This secular defense of human dignity—the first book-length attempt of its kind—crowns the career of a distinguished political thinker.

Nutrients in Ground Water and Surface Water of the United States ,1995

Nutrients in the Nation's Waters David K. Mueller,Dennis R. Helsel,Geological Survey (U.S.),1996 Nutrients in water are necessary for productive aquatic ecosystems, but in high concentrations, nutrients such as nitrates, ammonia, and phosphates can adversely affect aquatic life and human health.

A New Approach to Assessing Road User Charges David J. Forkenbrock,Jon G. Kuhl,2002 A new road user charge system based on an actual miles traveled basis, or vehicle miles of travel (VMT), is recommended to replace motor fuel taxes, which are in jeopardy due to new vehicle propulsion technologies. This charge would provide a means for crediting states or sub-state jurisdictions for the miles of travel occurring within their boundaries by collecting data from vehicles equipped with intelligent vehicle and GPS technologies. Researchers conclude that a convenient and flexible road user charge system can be designed which will ensure a stable source of revenue for the highway system.

Needs-based Resource Allocation in Education Kenneth Norman Ross,Rosalind Levačić,1999 The book explores a range of conceptual, methodological and empirical issues concerned with the application of needs-based resource allocation in education via formula funding of schools. The first part presents the policy context for needs-based formula funding, the second examines technical matters related to the construction of funding formulae and the third part presents case studies in five countries (Australia, England and Wales, United States and New Zealand). The conclusion offers a 'checklist' for senior decision-makers in Ministries of Education that highlights the pre-conditions for undertaking a successful implementation of needs-based formula funding.

General Theory of Value Ralph Barton Perry,1926 Talks about values vaguely with intent to go through some particulars and problems in mismatched values and benefits. Discusses the values that have the appropriate set of attributes. Mentions the trends of orientation, psychological definition, perception, solidarity of the society, social integration, origin and change, and value's criticism.

Meeting the Innovation Challenge Scott Isaksen,Joe Tidd,2006-06-26 Meeting the Innovation Challenge offers a new way to look at creative leadership that integrates both leadership and management. This book also provides the reader key insights into a new and more systematic way to manage transformation. As a result, the reader will be able to discover a full range of potential outcomes from their change efforts—from radical new to the world transformation to incremental improvements. Since people are at the heart of any transformation issue, Meeting the Innovation Challenge includes helpful information on the various roles required to initiate and sustain change efforts. Many change initiatives use teams, so specific tools are outlined to create and manage teamwork for transformation. Those who lead and manage organizations have too many change methods from which to choose. This book offers practical advice on how to select and manage a variety of change methods, as well as a helpful selected list of many of the methods available from which to choose. An example is drawn and explained from the area of new product or service development. An often-overlooked element of climate and context is also addressed. Successful innovation, change and transformation require an environment in which people are ready, willing and able to initiate and sustain change. Meeting the Innovation Challenge addresses this area by clarifying the differences between culture and climate, and then offering practical ways to understand and create the climate for transformation.
