The Changing Industry and Skill Mix of Canada's International Trade D. Peter Dungan,Steven Murphy,Canada. Industry Canada,1999 This study uses Input-Output analysis to examine the industry and skill mix of Canadian exports and imports as they stood in 1997 and how this mix has changed over the past three decades. Section 2 of the report describes the data and calculation methods used. Section 3 contains a literature review. Section 4 examines how the place of exports has changed in the Canadian economy since 1961, and how the industrial output and employment mix of exports has altered over that time. Changes in the employment mix are decomposed into four main sub-components. Then, adding industry skill-mix data, it discusses the education/skill mix of Canadian exports in recent years and determines what changes may have occurred in this mix over time. Section 5 repeats the analysis in Section 4, but for imports. Section 6 reports the conclusions and main findings. Several appendices present details of the calculations, sensitivity tests and more detailed industrial results.
