**100 Designs, 100 Years** Mel Byars,Arlette Barré-Despond,1999 History can be more than a dry record of politics, economics, and sociology. It can, through this book, tell us about ourselves and who we have been through a panorama of fascinating, provocative, amusing, or purely utilitarian objects - the tools of life. Even though you may be familiar with some of the objects in this book, their early births - like Cartier's Santos wristwatch in 1904 and the Coca-Cola bottle in 1915 - may surprise many. The canonical Red Blue armchair of 1918 and the Sacco seat of 1969 are highly recognizable objects today, but can you place them and others within the same year of other landmarks? For instance, in 1918 the electric food beater and the refrigerator appeared and women were first allowed to vote in England, and in 1969 the first humans landed on the Moon and the TV series Monty Python's Flying Circus debuted. Interesting stories about these objects as well as 96 others are accompanied by a list of some of the historical milestones which have colored and altered the fastest-paced 100 years of human endeavor - the 20th century.--BOOK JACKET.
