The Last 100 Yards Paul E Berg,2019-06-07 The Last 100 Yards: The Crucible of Close Combat in Large-Scale Combat Operations presents thirteen historical case studies of close combat operations from World War I through Operation Iraqi Freedom. This volume is a collection from the unique and deliberate perspective of the last 100 yards of ground combat. In today's Army, there are few leaders who have experienced multi-domain large-scale ground combat against a near-peer or peer enemy first hand. This volume serves to augment military professionals' understanding of the realities of large-scale ground combat operations through the experiences of those who lived it.

Soviet Tanks in Manchuria 1945 William E. Hiestand, 2023-03-16 A new illustrated study of the devastating, but little-known, Soviet armored blitzkrieg against the Japanese in the last weeks of World War II, and how it influenced Soviet tank doctrine as the Cold War dawned. Although long overshadowed in the West by the dropping of the atomic bombs on Hiroshima and Nagasaki, the USSR's lightning strike into Manchuria in August 1945 was one of the most successful and unique campaigns of the era. Soviet forces, led by over 5,500 tanks and self-propelled guns, attacked across huge distances and deserts, marshes, and mountains to smash Japan's million-strong Kwantung Army in a matter of days. Japanese forces were short of training and equipment, but nevertheless fought fiercely, inflicting 32,000 casualties on the Soviets. Red Army operations were characterized by surprise, speed, and deep penetrations by tank-heavy forces born of the brutal lessons they had learned during years fighting the Wehrmacht. Lessons from the campaign directly shaped Soviet Cold War force structure and planning for mechanized operations against the West. Illustrated with contemporary artwork and rare photos from one of the best collections of Soviet military photos in the West, this fascinating book explains exactly how the last blitzkrieg of World War II was planned, fought, and won, and how it influenced the Red Army's plans for tank warfare against NATO in Europe.

Computational Intelligence for Network Structure Analytics Maoguo Gong, Qing Cai, Lijia Ma, Shanfeng Wang, Yu Lei, 2017-09-19 This book presents the latest research advances in complex network structure analytics based on computational intelligence (CI) approaches, particularly evolutionary optimization. Most if not all network issues are actually optimization problems, which are mostly NP-hard and challenge conventional optimization techniques. To effectively and efficiently solve these hard optimization problems, CI based network structure analytics offer significant advantages over conventional network analytics techniques. Meanwhile, using CI techniques may facilitate smart decision making by providing multiple options to choose from, while conventional methods can only offer a decision maker a single suggestion. In addition, CI based network structure analytics can greatly facilitate network modeling and analysis. And employing CI techniques to resolve network issues is likely to inspire other fields of study such as recommender systems, system biology, etc., which will in turn expand CI's scope and applications. As a comprehensive text, the book covers a range of key topics, including network community discovery, evolutionary optimization, network structure balance analytics, network robustness analytics, community-based personalized recommendation, influence maximization, and biological network alignment. Offering a rich blend of theory and practice, the book is suitable for students, researchers and practitioners interested in network analytics and computational intelligence, both as a textbook and as a reference work.

Colonial England, 1066-1215 J. C. Holt, 1997-07-01 The process of colonization that followed

the Norman Conquest defined much of the history of England over the next 150 years, structurally altering the distribution of land and power in society. The author's subjects include Domesday Book, the establishment of knight-service, aristocratic structures and nomenclature, the relation of family to property, and security of title and inheritance. He comments on the work of Maitland, Round and Stenton and ends with studies of the treaty of Winchester (1153), the casus regis and Magna Carta.

The Japanese Industrial Economy Ian Inkster, 2012-11-12 This book reveals that the manipulation of culture was of more importance than the character of the original cultural stock in explaining Japan's modern industrialization. Thus the features of private enterprise culture that are so often isolated as keys to the nation's historical competitiveness may have been only temporary reflections of this wider process of cultural engineering: a necessary input into the program of technology transfer and late development. This book provides a highly reliable guide to the industrial economy and history and covers a wide ground; it will be of great interest to those involved in Asian studies, Japanese studies, plus economists and professionals in business and enterprise culture.

Agrarian Reform Under State Capitalism In Algeria Karen Pfeifer, 2019-03-08 I should like to express my gratitude to some of the people whose help and support made this work possible. Claudine Chaulet, Rachid Benattig, and the other staff members at the CREA institute in Algiers provided me with access to information for the original research and with an atmosphere of friendly encouragement and positive critical thinking. My friends, Dorothy and Mahfoud Bennoune, made my research trip to Algeria both pleasantly memorable and productive. Cynthia Taft Morris and James Paul provided badly needed critical commentary and encouragement on an earlier version of this work. The reformulation of that earlier work into this book subsequently benefited from critical

readings by Robert Haddad and David Kotz. Betty Nanartonis and Letitia Sloan did a superb and dedicated job on the word processing. Ellen Dibble, Jackie Eghrari, and Lisa Ferrell performed vital editorial and secretarial services. And Mary Coppola created the map. Thank you, all, for your skill and patience.
