Old cooking allowed the use of the same deep fat deep air fryer many times, provided that each time after frying it is filtered. At present, repeated use of deep-frying is not recommended. The exception is a frying from pure olive oil, which can be used multiple times, as well as deep fat fryer, which can be used twice. It is considered safe to repeatedly use deep-frying in special deep airfryer appliances - fryers and industrial baking plants. The advantage of such units is that, unlike cooking on fire, the fryers are heated only up to the temperature of frying, as a result of which the oil does not boil and the oxidation process is much slower.
