The Memory and Processing Guide for Neurodiverse Learners

Alison Patrick, 2020-06-18 Armed with the wealth of understanding and strategies in this guide, students will discover how they can learn best, to make studying and revision more effective (and less stressful). Packed with simple, tried and tested strategies and workarounds, this study guide for supporting kids and teens who learn differently (such as those with ADHD, dyslexia, dyspraxia or ASD) explains what memory and processing issues are, and how to work around them. Written by a tutor and specialist with years of experience of working with students with learning differences, this book enables the student to understand the best ways they learn and the reasons behind this. Unpacking processing speed, sensory processing, metacognition, and executive functioning, including working memory, this uniquely relatable and empowering study guide will provide students with the self-understanding they need to manage exams and academic tasks at school with confidence and peace of mind.

Model Rules of Professional Conduct American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics.

Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.
