*Influence of Airfoil Trailing-edge Angle and Trailing-edge Thickness Variation on the Effectiveness of a Plain Flap at High Subsonic Mach Numbers* Albert D. Hemenover,Donald J. Graham,1954  
The effects of variation of trailing-edge angle and trailing-edge thickness on the lift characteristics of a 10-percent-chord thick symmetrical NACA airfoil section with a 25-percent-chord plain flap are appraised from wind-tunnel tests at Mach numbers from 0.3 to 0.9 and Reynolds numbers varying correspondingly from 1 to 2 million. The airfoil trailing-edge angle was varied from approximately 18 to 6 degrees, and the trailing-edge thickness from zero to the thickness at the flap hinge line.

**“And in Length of Days Understanding” (Job 12:12)** Erez Ben-Yosef,Ian W. N. Jones,2023-09-02 This two-volume book presents cutting-edge archaeological research, primarily as practiced in the Eastern Mediterranean region. These volumes’ key foci are inspired by the work of Thomas E. Levy. Volume 1 provides an in-depth look at new archaeological research in the southern Levant (primarily in modern Israel and Jordan) inspired by Levy’s commitment to understanding social, political, and economic processes in a long-term or “deep time” perspective. Volume 2 focuses on new research in several key areas of 21st century anthropological archaeology and archaeological science. Volume 1 is organized around two major themes: 1) the later prehistory of the southern Levant, or the Neolithic, Chalcolithic, and Bronze Age, and 2) new research in biblical archaeology, or the historical archaeology of the Iron Age. Each section contains a combination of new perspectives on key debates and studies introducing new research questions and directions. Volume 2 is organized around five major themes: 1) the archaeology of the Faynan copper ore district of southern Jordan, a key region for archaeometallurgical research in West Asia where Levy conducted field research for over a decade, 2) new research in archaeometallurgy beyond the Faynan region, 3) marine and maritime archaeology, focusing on issues of trade and environmental change, 4) cyber-archaeology, an important 21st century field Levy conceived as “the marriage of archaeology, engineering, computer science, and the natural sciences,” and 5) key issues in anthropological archaeological theory. In addition to presenting the reader with an up-to-date view of research in each of these areas, the volume also has chapters exploring the connections between these themes, e.g. the maritime trade of metals and cyber-/digital archaeological approaches to metallurgy. The work contains contributions from both up-and-coming early career researchers and key established figures in their fields. This book is an essential reference for archaeologists and scholars in related disciplines working in the southern Levant and the Eastern Mediterranean.

**Computing Anticipatory Systems: CASYS 2001** D. M. Dubois,2002-09-05 These AIP Conference Proceedings contain the papers of the two invited speakers: Systems with Emergent Dynamics by Ian Stewart (UK), who received the CHAOS AWARD, and The Role of Anticipation in Intelligent Systems by George J. Klir (USA), who received the CASYS'01 AWARD. Second, all the papers of the authors who received a Best Paper Award, and, third, a selection of invited papers. The scope is the study, research, and development in the new frontier of science dealing with the paradigm of computing anticipatory systems. A computing anticipatory system is a system which computes its current states in taking into account its anticipatory states. Strong anticipation refers to an anticipation of events built by or embedded in a system. Weak anticipation refers to an anticipation of events predicted or forecast from a model of a system. Topics include Anticipatory Systems, Cybernetics and Epistemology; Mathematical System, Chaos, Anticipation and Incursion; Relativity, Quantum Physics and Quantum Computing; Intelligent Agents, Learning and Cognitive Systems; Organisation, Regulation, Management and Planning; Control Systems, Robots, Neural Nets and Agents; and Information Science Models and Anticipatory Programs.

*Guide to Financial Markets* Marc Levinson,2018-07-24 The revised and updated 7th edition of this highly regarded book brings the reader right up to speed with the latest financial market developments, and provides a clear and incisive guide to a complex world that even those who work in it often find hard to understand. In chapters on the markets that deal with money, foreign exchange, equities, bonds, commodities, financial futures, options and other derivatives, the book examines why these markets exist, how they work, and who trades in them, and gives a run-down of the factors that affect prices and rates. Business history is littered with disasters that occurred because people involved their firms with financial instruments they didn't properly understand. If they had had this book they might have avoided their mistakes. For anyone wishing to understand financial markets, there is no better guide.

*Cutting-Edge Enabling Technologies for Regenerative Medicine* Heung Jae Chun,Chan Hum Park,Il Keun Kwon,Gilson Khang,2018-10-24 This book explores in depth the latest enabling technologies for regenerative medicine. The opening section examines advances in 3D bioprinting and the fabrication of electrospun and electrosprayed scaffolds. The potential applications of intelligent nanocomposites are then considered, covering, for example, graphene-based nanocomposites, intrinsically conductive polymer nanocomposites, and smart diagnostic contact lens systems. The third section is devoted to various drug delivery systems and strategies for regenerative medicine. Finally, a wide range of future enabling technologies are discussed. Examples include temperature-responsive cell culture surfaces, nanopatterned scaffolds for neural tissue engineering, and process system engineering methodologies for application in tissue development. This is one of two books to be based on contributions from leading experts that were delivered at the 2018 Asia University Symposium on Biomedical Engineering in Seoul, Korea – the companion book examines in depth novel biomaterials for regenerative medicine.
