Poems by Emily Dickinson Emily Dickinson,2019-10-25 If her skill was taken for supernatural, the world may never have seen the original handwriting. Feel welcome to Poems by Emily Dickinson, verified against manuscript and print resources piece by piece, organized into thematic stanzas, with an introduction on the poet's inspiration with Greek and Latin, her correlative with Webster 1828, and the Aristotelian motif: Things perpetual - these are not in time, but in eternity. ***The world has always appeared to me perpetual; it is better to believe it without beginning or end, wrote Thomas Taylor, a renowned translator of Aristotle's works in Emily Dickinson's times. Lexical items for the first print and Aristotle's Physics converge, beyond coincidence.The piece-by-piece analysis discusses fascicle atypical verb phrase, shift in person reference, lexemic repetitiveness, or vowel contour, in support of doubt on their originality. There always is the simple question as well: do we believe Emily Dickinson tried to tell about very exceptional Bees, Ears, or Birds, so peculiar that you write them with capital letters? ***About the poet: Emily Elizabeth Dickinson (1830 - 1886) an American poet printed from private notes. Publications of unfinished poetic form gave her a reputation of a linguistic eccentric. The inner structure of her verses - as Latin and Greek morphemic imagery, or Webster 1828 correlation in the poetic matter - yet shows a word smith of excellent standard, a woman capable of reflecting on the human and the living, the everyday and the unusual, transient or lasting, and that with regard to one of the greatest minds in human civilization, Aristotle.

Time-Sensitive Remote Sensing Christopher D. Lippitt,Douglas A. Stow,Lloyd L. Coulter,2015-06-02 This book documents the state of the art in the use of remote sensing to address time-sensitive information requirements. Specifically, it brings together a group of authors who are both researchers and practitioners, who work toward or are currently using remote sensing to address time-sensitive information requirements with the goal of advancing the effective use of remote sensing to supply time-sensitive information. The book addresses the theoretical implications of time-sensitivity on the remote sensing process, assessments or descriptions of methods for expediting the delivery and improving the quality of information derived from remote sensing, and describes and analyzes time-sensitive remote sensing applications, with an emphasis on lessons learned. This book is intended for remote sensing scientists, practitioners (e.g., emergency responders or administrators of emergency response agencies), and students, but will also be of use to those seeking to understand the potential of remote sensing to address a range of pressing issues, particularly natural and anthropogenic hazard response.

Media Madness Howard Kurtz,2018-01-29 According to the media, Donald Trump could never become president. Now many are on a mission to prove he shouldn't be president. The Trump administration and the press are at war—and as in any war, the first casualty has been truth. Bestselling author Howard Kurtz, host of Fox News's Media Buzz and former Washington Post columnist, offers a stunning exposé of how supposedly objective journalists, alarmed by Trump's success, have moved into the opposing camp. Kurtz's exclusive, in-depth, behind-the-scenes interviews with reporters, anchors, and insiders within the Trump White House reveal the unprecedented hostility between the media and the president they cover. In Media Madness, you'll learn: Why White House strategist Steve Bannon told Trump he is in danger of being impeached How the love-hate relationship between the president and Morning Joe hosts—Joe Scarborough and Mika Brzezinski—turned entirely to hate How Kellyanne Conway felt betrayed by

journalists who befriended her—and how she fought back How elite, mainstream news reporters—named and quoted—openly express their blatant contempt for Trump How Bannon tried to block short-lived Communications Director Anthony Scaramucci—and why Trump soured on him How Ivanka and Jared Kushner aren’t the liberals the pundits want them to be—and why Trump tried to discourage them from joining the White House Why Trump believes some journalists harbor hatred for him—and how some liberals despise his voters How Trump is a far more pragmatic politician than the press often acknowledges (and how the press dismisses his flip-flops when he flops their way) What Trump got wrong about Charlottesville—and how Steve Bannon predicted the debacle How the media consistently overreached on the Russian “collusion” scandal Why Trump actually likes journalists, secretly meets with them, and allows the press unprecedented access Why Reince Priebus couldn’t do his job—and the real reason he left the White House How Sean Spicer privately berated journalists for bad reporting—and why he and Kellyanne Conway were relentlessly attacked by the media Never before has there been such an eye-opening, shocking look at what the White House and the media think about each other. It’s not pretty. But it also makes for the most important political book of the year.
