The Apartment Complex Pamela Robertson Wojcik, 2018-10-12 From the bachelor pad that Jack Lemmon's C. C. Baxter loans out to his superiors in Billy Wilder's *The Apartment* (1960) to the crumbling tenement in a dystopian Taipei in Tsai Ming-liang's *The Hole* (1998), the apartment in films and television series is often more than just a setting: it can motivate or shape the narrative in key ways. Such works belong to a critical genre identified by Pamela Robertson Wojcik as the apartment plot, which comprises specific thematic, visual, and narrative conventions that explore modern urbanism's various forms and possibilities. In *The Apartment Complex* a diverse group of international scholars discuss the apartment plot in a global context, examining films made both within and beyond the Hollywood studios. The contributors consider the apartment plot's intersections with film noir, horror, comedy, and the musical, addressing how different national or historical contexts modify the apartment plot and how the genre's framework allows us to rethink the work of auteurs and identify productive connections and tensions between otherwise disparate texts. Contributors. Steven Cohan, Michael DeAngelis, Veronica Fitzpatrick, Annamarie Jagose, Paula J. Massood, Joe McElhaney, Merrill Schleier, Lee Wallace, Pamela Robertson Wojcik

The Ecology of Welfare George Sternlieb, 2018-04-17 The basic ecology of human groups—the relationship between the distribution of population and material resources and the resultant social and cultural patterns—is a subject which has occasioned far more talk than down-to-earth research. Filling this gap, George Sternlieb and Bernard Indik consider one dimension of human ecology—the interplay between housing and outlook, between the physical realities of a

dwelling unit and the attitudes and responses of its inhabitants. Their book, *The Ecology of Welfare*, presents a detailed description of the housing and housing problems of one special subgroup—New York City's welfare recipients in the 1970's.

Five Flights Up Toni Schlesinger, 2012-04-17 A flop house, a pumping station, a maid's room, a homeless center, a former brothel, a Richard Meier building, a circus trailer, a sail boat, a skyscraper, buildings named Esther and Loraine—just a few of the places New Yorkers call home. For the past eight years writer Toni Schlesinger has been bringing us these conversation places in her weekly column in the Village Voice. Through her incisive questioning, original writing, and comic parallel reveries, Schlesinger creates miniature documentaries on the lives, passions, hopes, and heartbreaks of many of New York City's millions

740 Park Michael Gross, 2007-12-18 For seventy-five years, it's been Manhattan's richest apartment building, and one of the most lusted-after addresses in the world. One apartment had 37 rooms, 14 bathrooms, 43 closets, 11 working fireplaces, a private elevator, and his-and-hers saunas; another at one time had a live-in service staff of 16. To this day, it is steeped in the purest luxury, the kind most of us could only imagine, until now. The last great building to go up along New York's Gold Coast, construction on 740 Park finished in 1930. Since then, 740 has been home to an ever-evolving cadre of our wealthiest and most powerful families, some of America's (and the world's) oldest money—the kind attached to names like Vanderbilt, Rockefeller, Bouvier, Chrysler, Niarchos, Houghton, and Harkness—and some whose names evoke the excesses of today's monied elite: Kravis, Koch, Bronfman, Perelman, Steinberg, and Schwarzman. All along,

the building has housed titans of industry, political power brokers, international royalty, fabulous scam-artists, and even the lowest scoundrels. The book begins with the tumultuous story of the building's construction. Conceived in the bubbling financial, artistic, and social cauldron of 1920's Manhattan, 740 Park rose to its dizzying heights as the stock market plunged in 1929—the building was in dire financial straits before the first apartments were sold. The builders include the architectural genius Rosario Candela, the scheming businessman James T. Lee (Jacqueline Kennedy Onassis's grandfather), and a raft of financiers, many of whom were little more than white-collar crooks and grand-scale hustlers. Once finished, 740 became a magnet for the richest, oldest families in the country: the Brewsters, descendants of the leader of the Plymouth Colony; the socially-registered Bordens, Hoppins, Scovilles, Thornes, and Schermerhorns; and top executives of the Chase Bank, American Express, and U.S. Rubber. Outside the walls of 740 Park, these were the people shaping America culturally and economically. Within those walls, they were indulging in all of the Seven Deadly Sins. As the social climate evolved throughout the last century, so did 740 Park: after World War II, the building's rulers eased their more restrictive policies and began allowing Jews (though not to this day African Americans) to reside within their hallowed walls. Nowadays, it is full to bursting with new money, people whose fortunes, though freshly-made, are large enough to buy their way in. At its core this book is a social history of the American rich, and how the locus of power and influence has shifted haltingly from old bloodlines to new money. But it's also much more than that: filled with meaty, startling, often tragic stories of the people who lived behind 740's walls, the book gives us an unprecedented

access to worlds of wealth, privilege, and extraordinary folly that are usually hidden behind a scrim of money and influence. This is, truly, how the other half—or at least the other one hundredth of one percent—lives.

Planning At The Crossroads James Simmie, 2003-09-02 Through a detailed analysis of studies of the effects of planning, comparing low levels of urban containment in California with much higher levels in the UK. Some comparative insights are also drawn from the (pre-conflict) Yugoslavian planning system. The analysis shows that many of the serious criticisms of planning are valid and leads to the conclusion that some sacred cows – notably green belts – should be abandoned. This distinctive text is of use to students, researchers and professionals in planning, geography and urban studies.

Stories of Cosmopolitan Belonging Hannah Jones, Emma Jackson, 2014-06-20 What does it mean to belong in a place, or more than one place? This exciting new volume brings together work from

cutting-edge interdisciplinary scholars researching home, migration and belonging, using their original research to argue for greater attention to how feeling and emotion is deeply embedded in social structures and power relations. Stories of Cosmopolitan Belonging argues for a practical cosmopolitanism that recognises relations of power and struggle, and that struggles over place are often played out through emotional attachment. Taking the reader on a journey through research encounters spiralling out from the global city of London, through English suburbs and European cities to homes and lives in Jamaica, Puerto Rico and Mexico, the contributors show ways in which international and intercontinental migrations and connections criss-cross and constitute local places in each of their case studies. With a reflection on the practice of 'writing cities' from two leading urbanists and a focus throughout the volume on empirical work driving theoretical elaboration, this book will be essential reading for those interested in the politics of social science method, transnational urbanism, affective practices and new perspectives on power relations in neoliberal times. The international range of linked case studies presented here will be a valuable resource for students and scholars in sociology, anthropology, urban studies, cultural studies and contemporary history, and for urban policy makers interested in innovative perspectives on social relations and urban form.

Cities in the 21st Century Oriol Nel-lo, Renata Mele, 2016-02-19 Cities in the 21st Century provides an overview of contemporary urban development. Written by more than thirty major academic specialists from different countries, it

provides information on and analysis of the global network of cities, changes in urban form, environmental problems, the role of technologies and knowledge, socioeconomic developments, and finally, the challenge of urban governance. In the mid-20th century, architect and planner Josep Lluís Sert wondered if cities could survive; in the early 21st century, we see that cities have not only survived but have grown as never before. Cities today are engines of production and trade, forges of scientific and technological innovation, and crucibles of social change. Urbanization is a major driver of change in contemporary societies; it is a process that involves acute social inequalities and serious environmental problems, but also offers opportunities to move towards a future of greater prosperity, environmental sustainability, and social justice. With case studies on thirty cities in five continents and a selection of infographics illustrating these dynamic cities, this edited volume is an essential resource for planners and students of urbanization and urban change.

Rent Control Charles W. Baird, 1980-06-01 In this study, Dr. Charles Baird addresses the rent control boom currently underway in the United States. Beginning with the fundamentals of supply and demand for housing, Baird expands his analysis to include questions of equity, housing availability, and special interest manipulation of regulatory statutes. He shows that high housing costs do not occur in a vacuum but are related to many other governmental policies including zoning, housing codes, and environmental issues.

Modern Architecture in Latin America Luis E. Carranza, Fernando Luiz Lara, 2015-01-05 Modern Architecture in Latin America: Art, Technology, and Utopia is an introductory text on the issues, polemics, and works that represent the complex processes of political, economic, and cultural

modernization in the twentieth century. The number and types of projects varied greatly from country to country, but, as a whole, the region produced a significant body of architecture that has never before been presented in a single volume in any language. Modern Architecture in Latin America is the first comprehensive history of this important production. Designed as a survey and focused on key examples/paradigms arranged chronologically from 1903 to 2003, this volume covers a myriad of countries; historical, social, and political conditions; and projects/developments that range from small houses to urban plans to architectural movements. The book is structured so that it can be read in a variety of ways—as a historically developed narrative of modern architecture in Latin America, as a country-specific chronology, or as a treatment of traditions centered on issues of art, technology, or utopia. This structure allows readers to see the development of multiple and parallel branches/historical strands of architecture and, at times, their interconnections across countries. The authors provide a critical evaluation of the movements presented in relationship to their overall goals and architectural transformations.

A Land Between Waters Christopher R.

Boyer, 2012-09-01 Mexico is one of the most ecologically diverse nations on the planet, with landscapes that range from rainforests to deserts and from small villages to the continent's largest metropolis. Yet historians are only beginning to understand how people's use of the land, extraction of its resources, and attempts to conserve it have shaped both the landscape and its inhabitants. *A Land Between Waters* explores the

relationship between the people and the environment in Mexico. It heralds the arrival of environmental history as a major area of study within the field of Mexican history. This volume brings together a dozen original works of environmental history by some of the foremost experts in Mexican environmental history from both the United States and Mexico. The contributions collected in this seminal volume explore a wide array of topics, from the era of independence to the present day. Together they examine how humans have used, abused, and attended to nature in Mexico over more than two hundred years. Written in clear, accessible prose, *A Land Between Waters* showcases the breadth of Mexican environmental history in a way that defines the key topics in the field and suggests avenues for subsequent work. Most importantly, it assesses the impacts of environmental changes that Mexico has faced in the past with an eye to informing national debates about the challenges that the nation will face in the future.
