Cinematic Women, From Objecthood to Heroism: Essays on Female Gender Representation on Western Screens and in TV Productions Lisa V. Mazey,2020-05-05 Women have fulfilled film roles that exhibit their historically subservient or sexualised positions in society, among others. Over the decades, the gender identity of women has fluctuated to include powerful women, emotionally strong women, lesbian women, and even neurologically atypical women. These identities reflect the change in societal norms and what is now acknowledged as more likely and more mainstream. The evolution of

society's views of women can be mapped through these roles; from 1950's America where women were depicted as the counterpart to male characters and their masculinity either as a threat or support to the patriarchal norms; to more recent times, where these norms have been questioned, challenged, deconstructed and reconstructed to include women in a more equitable balance. The fight for equal access, equal pay and equal standing still exists in all walks of life and different cultures requiring continued scrutiny of the norms that made that fight necessary. The essays offer a unique vantage of the changing culture and conversations that allowed, encouraged, and praised an evolution of women's roles. They strive to represent the issues faced by women, from the early heyday of Hollywood through to films as recent as 2007; examining depictions of the masculine gaze, mental and physical oppression, the mother figure, as well as how these roles may develop in the future. The book contains valuable material for film students at an undergraduate or post-graduate level, as well as scholars from a range of disciplines including cultural studies, media studies, film studies and women's and gender studies.

What role has science fiction played in the actual development of computers and computing? And likewise, how has computing (including the related fields of robotics and artificial intelligence) affected the course of science fiction?
