Finding Wisdom In Brand Tragedies: Managing Threats To Brand Equity Robert J Thomas,2023-05-24 Brands and branding have deep historical roots. Almost anything or anyone can be branded with a name or mark for commercial or other purposes. The act of branding initiates activities in a brand ecosystem among people and organizations who have a vested interest in the brand's value. Unfortunately, a brand may experience a tragedy that can put its value and equity at risk. Pundits will often conclude there is a primary reason for a specific brand's tragedy, however, studying the situation more deeply can reveal tragic flaws in response to brand-challenging experiences that enhance managerial wisdom.The purpose of the book is to examine the backstories of a selection of relatively well-known brands that have experienced a tragedy. The objective is to inform how and why some brands survived and some did not. Doing so, may help leaders and managers of current brands avoid the miscues that lead to brand tragedies and possibly revive a brand when tragedy strikes. It is a book for those who need to improve their understanding of the vital importance of a brand for organizational success and who want to build and manage their brands to continuously improve value for customers, employees, shareholders, and the well-being of society. While there will be no one right approach or silver bullet to avert or ameliorate a specific tragedy, the better prepared leaders and managers are for a brand tragedy, the greater the likelihood of avoiding one and realizing an expedient and constructive outcome when one occurs.

All Monsters Must Die Magnus Bårtås,Fredrik Ekman,2015-03-27 In 1948, the Democratic People’s Republic of Korea is founded by General Kim Il-sung. In 1978, North Korea celebrates the thirtieth anniversary of its founding, and Kim Jong-il, who at the time is the head of the Propaganda and Agitation Department, orders the kidnapping of the greatest South Korean movie star, the actress Madame Choi, and her ex-husband, the famous film director Shin Sang-ok. In 2008, North Korea celebrates its sixtieth anniversary, and Magnus Bårtås and Fredrik Ekman take a bizarre, heavily guided tour to the world’s most isolated country. In All Monster Must Die, authors Magnus Bårtås and Fredrik Ekman weave together these three stories to create a mosaic of North Korea, past and present: from the Japanese occupation to the demarcation of the border at the 38th parallel and the Korean War, the development of North Korean Juche ideology, the establishment of the Kim dynasty’s cult of personality, and the aggressive manufacturing of political propaganda, which motivated the kidnapping of South Korea’s most famous film couple. Intelligent and shocking, this book offers a rare and fascinating window into the “hermit kingdom,” and includes an updated chapter on the passing of Kim Jong-il and the declaration of his son, Kim Jong-un, as supreme leader.

Improving Urban Access Elliott D. Sclar,Måns Lönnroth,Christian Wolmar,2016-03-31 By 2050, two-thirds of the world’s population will live in cities. To thrive, they will need efficient and sustainable forms of transport, but to achieve this, the financial incentives guiding urban transport operation must change – and change rapidly. Urban transport plays a critical role in determining the social, environmental and economic shape of cities. Improving Urban Access: New Approaches to Funding Transport Investment provide innovative ideas on how we might reorganize transport finance to ensure that it is suited to serving the social, environmental and economic principles that must guide future urban living. Continuing the work begun by its predecessor, Urban Access for the 21st Century, the authors assess the complexity of implementing new finance approaches and suggest ways to make positive and radical changes. Although the range of revenue raising options remain limited to users, indirect beneficiaries, and the general public, these can be recast to transform the way transport is paid for and therefore how its services are delivered. New finance models only succeed when they are intrinsically linked to the economic, social, cultural and political forces that create urban life. Together these volumes provide a starting point for the deeper research and policy design needed to successfully create urban transport finance systems that can address the challenges that 21st century cities present.

Grow by Focusing on What Matters Joel E. Urbany,2011-01-29 Growth and competitive advantage are about effective positioning. Building effective positioning is challenging today for firms facing new and stronger competition, volatile and uncertain markets, and shifting customer desires and demands. The 3-Circle Model facilitates speed of understanding and action by focusing attention on the most critical strategy concepts in this uncertain environment. Growth strategy emerges in the model from systematically addressing four key strategy directives in a deep and disciplined way: define, build, and defend the unique value you create for

customers; correct, eliminate, or reveal value that is failing customers or of which they're not aware; potentially neutralize the unique value created for customers by competitors; explore and exploit new growth opportunities through deep understanding of customers' unmet needs.

The Global Automotive Industry Paul Nieuwenhuis,Peter Wells,2015-08-10 The automotive industry is still one of the world's largest manufacturing sectors, but it suffers from being very technology-focused as well as being relatively short-term focused. There is little emphasis within the industry and its consultancy and analyst supply network on the broader social and economic impacts of automobility and of the sector that provides it. The Global Automotive Industry addresses this need and is a first port of call for any academic, official or consultant wanting an overview of the state of the industry. An international team of specialist researchers, both from academia and business, review and analyse the key issues that make vehicle manufacturing still the world’s premier manufacturing sector, closely tied in with the fortunes of both established and newly emerging economies. In doing so, it covers issues related to manufacturing, both established practices as well as new developments; issues relating to distribution, marketing and retail, vehicle technologies and regulatory trends; and, crucially, labour practices and the people who build cars. In all this it explains both how the current situation arose and also likely future trajectories both in terms of social and regulatory trends, as the technological, marketing and labour practice responses to those, leading in many cases to the development of new business models. Key features Provides a global overview of the automotive industry, covering its current state and considering future challenges Contains contributions from international specialists in the automotive sector Presents current research and sets this in an historical and broader industry context Covers threats to the industry, including globalization, economic and environmental sustainability The Global Automotive Industry is a must-have reference for researchers and practitioners in the automotive industry and is an excellent source of information for business schools, governments, and graduate and undergraduate students in automotive engineering.
