Applied Spatial Data Analysis with R Roger S. Bivand, Edzer Pebesma, Virgilio Gómez-Rubio, 2013-06-21 *Applied Spatial Data Analysis with R*, second edition, is divided into two basic parts, the first presenting R packages, functions, classes and methods for handling spatial data. This part is of interest to users who need to access and visualise spatial data. Data import and export for many file formats for spatial data are covered in detail, as is the interface between R and the open source GRASS GIS and the handling of spatio-temporal data. The second part showcases more specialised kinds of spatial data analysis, including spatial point pattern analysis, interpolation and geostatistics, areal data analysis and disease mapping. The coverage of methods of spatial data analysis ranges from standard techniques to new developments, and the examples used are largely taken from the spatial statistics literature. All the examples can be run using R contributed packages available from the CRAN website, with code and additional data sets from the book's own website. Compared to the first edition, the second edition covers the more systematic approach towards handling spatial data in R, as well as a number of important and widely used CRAN packages that have appeared since the first edition. This book will be of interest to researchers who intend to use R to handle, visualise, and analyse spatial data. It will also be of interest to spatial data analysts who do not use R, but who are interested in practical aspects of implementing software for spatial data analysis. It is a suitable companion book for introductory spatial statistics courses and for applied methods courses in a wide range of subjects using spatial data, including human and physical geography, geographical information science and geoinformatics, the environmental sciences, ecology, public health and disease control, economics, public administration and political science. The book has a website where complete code examples, data sets, and other support material may be found: <http://www.asdar-book.org>. The authors have taken part in writing and maintaining software for spatial data handling and analysis with R in concert since 2003.

In Search of Utopia Jan van der Stock, 2016 2016 marks exactly 500 years since the English humanist and statesman Thomas More published in the city Leuven his world-famous book *Utopia*. Leuven is celebrating this milestone with a major city festival featuring exhibitions, street art, film, music, theatre, dance, literature, lectures and city walks. The cornerstone is the international, art historical exhibition 'In Search of Utopia' at M - Museum Leuven. The festival will officially start on Monday, 26 September 2016 after a festive opening weekend on 24 and 25 September and will end on 17 January 2017. In the book 'In Search of Utopia' the reader is introduced to the world of More and his friends, with the ideals and dreams of the times. The desire of far-away horizons and the cobweb of new sciences that patiently layed upon the reality. Magnificent works of the 15th- and 16th Century artists: Quinten Metsijs, Hans Holbein, Jan Gossaert en Albrecht Dürer are being brought together in this exciting and intriguing story. It shows in an unexceeded way the imagination of an ideal world.

The Race Against the Stasi Herbie Sykes, 2014-09-04 Cycling Book of the Year - Cross British Sports Book Awards When the 'Iron Curtain' descended across Europe, Dieter Wiedemann was a hero of East German sport. A podium finisher in The Peace Race, the Eastern Bloc equivalent of the Tour de France, he was a pin-up for the supremacy of socialism over the 'fascist' West. Unbeknownst to the authorities, however, he had fallen in love with Sylvia Hermann, a girl

from the other side of the wall. Socialist doctrine had it that the two of them were ‘class enemies’, and as a famous athlete Dieter’s every move was pored over by the Stasi. Only he abhorred their ideology, and in Sylvia saw his only chance of freedom. Now, playing a deadly game of cat and mouse, he plotted his escape. In 1964 he was delegated, once and once only, to West Germany. Here he was to ride a qualification race for the Tokyo Olympics, but instead committed the most treacherous of all the crimes against socialism. Dieter Wiedemann, sporting icon and Soviet pawn, defected to the other side. Whilst Wiedemann fulfilled his lifetime ambition of racing in the Tour de France, his defection caused a huge scandal. The Stasi sought to ‘repatriate’ him, with horrific consequences both for him and the family he left behind. Fifty years on, and twenty-five years after the fall of the Berlin Wall, Dieter Wiedemann decided it was time to tell his story. Through his testimony and that of others involved, and through the Stasi file, which has stalked him for half a century, Herbie Sykes uncovers an astonishing tale. It is one of love and betrayal, of the madness at the heart of the cold war, and of the greatest bike race in history.
