Opportunistic Spectrum Sharing and White Space Access Oliver Holland,Hanna Bogucka,Arturas Medeisis,2015-05-04 Details the paradigms of opportunistic spectrum sharing and white space access as effective means to satisfy increasing demand for high-speed wireless communication and for novel wireless communication applications This book addresses opportunistic spectrum sharing and white space access, being particularly mindful of practical considerations and solutions. In Part I, spectrum sharing implementation issues are considered in terms of hardware platforms and software architectures for realization of flexible and spectrally agile transceivers. Part II addresses practical mechanisms supporting spectrum sharing, including spectrum sensing for opportunistic spectrum access, machine learning and decision making capabilities, aggregation of spectrum opportunities, and spectrally-agile radio waveforms. Part III presents the ongoing work on policy and regulation for efficient and reliable spectrum sharing, including major recent steps forward in TV White Space (TVWS) regulation and associated geolocation database approaches, policy management aspects, and novel licensing schemes supporting spectrum sharing. In Part IV, business and economic aspects of spectrum sharing are considered, including spectrum value modeling, discussion of issues around disruptive innovation that are pertinent to opportunistic spectrum sharing and white space access, and business benefits assessment of the novel spectrum sharing regulatory proposal Licensed Shared Access. Part V discusses deployments of opportunistic spectrum sharing and white space access solutions in practice, including work on TVWS system implementations, standardization activities, and development and testing of systems according to the standards. Discusses aspects of pioneering standards such as the IEEE 802.22 “Wi-Far” standard, the IEEE 802.11af “White-Fi” standard, the IEEE Dynamic Spectrum Access Networks Standards Committee standards, and the ETSI Reconfiguration Radio Systems standards Investigates regulatory and regulatory-linked solutions assisting opportunistic spectrum sharing and white space access, including geo-location database approaches and licensing enhancements Covers the pricing and value of spectrum, the economic effects and potentials of such technologies, and provides detailed business assessments of some particularly innovative regulatory proposals The flexible and efficient use of radio frequencies is necessary to cater for the increasing data traffic demand worldwide. This book addresses this necessity through its extensive coverage of opportunistic spectrum sharing and white space access solutions. Opportunistic Spectrum Sharing and White Space Access: The Practical Reality is a great resource for telecommunication engineers, researchers, and students.

Acquired Language Disorders in Adulthood and Childhood Nicola Pitchford,Andrew W Ellis,2016-11-03 In the World Library of Psychologists series, international experts present career-long collections of what they judge to be their finest pieces - extracts from books, key articles, salient research findings, and their major practical theoretical contributions. Elaine Funnell has played an important role in the study of neuropsychology over the past 25 years. She has been at the forefront of groundbreaking research on individuals suffering with acquired disorders of written and/or spoken language resulting from brain damage. With commentary by Nicola Pitchford and Andrew Ellis, this volume presents Elaine’s most significant contributions in her two main specialist areas: adult neuropsychology of semantic disorders, with a focus on disorders of naming in dementia, and acquired language and literacy disorders in childhood. The publications included in this volume date back to 1988, where Elaine co-authored a major review of theories regarding the representation of meanings in the mind and brain. They then bring us right up-to-date with a previously unpublished paper from 2010, which has been recently edited by the co-author, Mike Kopelman, for this edition. Through her exceptional work, Elaine has greatly advanced our understanding of the brain processes behind written and spoken language, and this book represents an original and timely contribution to the field. Acquired Language Disorders in Adulthood and Childhood will be of great interest to researchers and postgraduate students in adult and child neuropsychology, specifically for those specialising in semantic and language disorders.

The Draw of the Alps Richard McClelland,2023-10-23 The Alps have exerted a hold over the German cultural imagination throughout the modern period, enthralling writers, artists, philosophers, scientists, and tourists alike. The Draw of the Alps interrogates the dynamics of this fascination. Though philosophical and aesthetic responses to Alpine space have shifted over time, the Alps continue to captivate at an individual and collective level. This has resulted in myriad cultural engagements with Alpine space, as this interdisciplinary volume attests. Literature, photography, and philosophy continue to engage with the Alps as a place in which humans pursue their cognitive and aesthetic limits. At the same time, individuals engage physically with the alpine environment, whether as visitors through the well-established leisure industry, as enthusiasts of extreme sports, or as residents who feel the acute end of social and environmental change. Taking a transnational view of Alpine space, the volume demonstrates that the Alps are not geographically peripheral to the nation-state but are a vibrant locus of modern cultural production. As The Draw of the Alps attests, the Alps are nothing less than a crucible in which understandings of what it means to be human have been forged.
