*Soils Under Stress* Yuriy Dmytruk,David Dent,2021-06-01 Dokuchaev carried out most of his research in Ukraine. His student and friend, Volodymyr Vernadsky, went on to create trans-disciplinary environmental sciences and the concept of Earth as a living organism, famously taken up by James Lovelock. That spring of ideas still flows and the researches captured in this volume are relevant to present-day problems, and not only in Ukraine. Soils have always been under stress but, in the Anthropocene, mankind is in the driving seat. As a sequel to Soil Science Working for a Living: Applications of soil science to present-day problems, we consider issues of policy as well as soil genesis, attributes and functions in various environments, natural and man-made. We consider human impacts on the soil cover through its use and misuse, highlight methods of research and assessment of soil quality, and the threats of soil degradation. The distinguished contributors also describe and propose various options for evaluation and remediation of degraded soils, drawing on the latest methods of modelling and cartography as well as long-term field experiments and long experience. The book will be invaluable to researchers and practitioners in soil science including graduate and post-graduate education, academics and professionals.

**The Persian Gulf and the West** Charles Kupchan,2011-02-25 This volume provides a broadly comparative and historical re-examination of the fundamental strategic dilemmas that confront the Western world in the Persian Gulf region. This systematic study of how the West has defined and dealt with its security interests in this region reveals three central strategic dilemmas: strategy versus capability, globalism versus regionalism, and unilateralism versus collectivism. The first part of the book focuses on US policy with particular emphasis on the Iranian Revolution and the Soviet invasion of Afghanistan. The author explains why there has been a persistent gap between American perceptions of the Middle East and the political and strategic realities of the region. The second part of the book examines the frustrated efforts of NATO members to form a cooperative response to their collective interests in the region.
