Security in Cyberspace Giampiero Giacomello, 2014-07-31 Today, the Internet has become a source of information that no country or company can forgo. It is not only used to communicate or entertain, but most importantly to operate utilities and public services such as banking or air traffic. As the reliance on computer networks across societies and economies keeps growing, so do security risks in cyberspace - referred to as cybersecurity. Cybersecurity means protecting information and control systems from those who seek to compromise them. It also involves actors, both malicious or protective, policies and their societal consequences. This collection of essays provides a better understanding of the risks, perceptions, and myths that surround cybersecurity by looking at it from three different levels of analysis: the sovereign state, the infrastructure and stakeholders of the Internet, and the individual. The essays explore such issues as information ownership, censorship, cyberwars, cyberterrorism, privacy, and rebellion, bringing together expert knowledge from computer science and the social sciences with case studies. It reviews existing policies and practices and discusses the threats and benefits of living in an increasingly networked world. This authoritative analysis of one of the most controversial and compelling security debates of the twenty-first century will appeal to scholars and practitioners interested in security, international relations and policymaking.

Barrowland Nuala Naughton, 2013-09-12 Barrowland: A Glasgow Experience charts the amazing resurrection of the legendary rock concert venue from its humble beginnings as a popular Glasgow dance hall through its commercial decline in the 1960s and beyond until it was reinvented in the early '80s as a concert venue that remains feted by fans and artistes alike. This book documents many of the gigs to have been held in the Barrowland, complete with reminiscences about backstage shenanigans and fascinating contributions from many of the musicians who have played there, as well as from fans who cherish memories of unforgettable concerts. Packed with interviews from the stars of popular music past and present, Barrowland: A Glasgow Experience allows readers to take a trip down memory lane and remember their favourite gigs at the world-famous venue in Glasgow's East End.

Ending the U.S. War in Iraq Richard R. Jr. Brennan, Charles P. Ries, Larry Hanauer, Ben Connable, Terrence K. Kelly, 2013-11-05 Ending the U.S. war in Iraq required redeploying 100,000 military and civilian personnel; handing off responsibility for 431 activities to the Iraqi government, U.S. embassy, USCENTCOM, or other U.S. government entities; and moving or transferring ownership of over a million pieces of property in accordance with U.S. and Iraqi laws, national policy, and DoD requirements. This book examines the planning and execution of this transition.

An Unworthy Future Joseph Toomey, 2014-07-22 It is difficult to find an area of public policy more plagued by misunderstanding than energy policy. Even worse, every time the subject is raised, we are obligated to get mired in pointless arguments about the weather. This book helps set the record straight. Not convinced? Consider some of these inconvenient truths: The cost of 'green energy' climate remediation is anywhere from 10-to-1,000 times greater than the damage from the climate change it attempts to alleviate. Germany, the world's leader in solar energy, will spend more than \$280 billion by 2030 on solar subsidies. But all of that investment will only forestall 22nd century global warming by 37 hours. Obama's carbon tax would cost Americans \$1.2 trillion over just ten years. But it would only reduce the midrange 3 degree modeled 22nd century global temperature increase by 0.038 degrees Celsius. At their current emissions growth rate, it will take China nine months to replace the entire U.S. emissions cut that Obama wants to achieve over seven years, at a staggering cost in American jobs and lost economic growth. The U.S. biofuel program imposes a cost on consumers 9,862 times greater than any climate benefit they or their distant progeny will ever derive. This is not another skeptical global warming polemic but an economic evaluation of how and why green energy will fail. The world has too many pressing needs. For the money Obama squandered on just a single bankrupt crony solar company, the U.S. could have prevented 300,000 childhood malaria deaths in poor countries. A thoroughly researched, heavily documented book by an

expert in his field, it will demonstrate in meticulous detail how wasteful and economically inefficient Obama's 'green energy' dead end future will be compared to other worthy alternatives. It's time to end the hysterical climate cynicism and get on humanity's side.

Strategic Cultures in Europe Heiko Biehl,Bastian Giegerich,Alexandra Jonas,2013-04-09 European countries work together in crisis management, conflict prevention and many other aspects of security and defence policy. Closer cooperation in this policy arena seems to be the only viable way forward to address contemporary security challenges. Yet, despite the repeated interaction, fundamental assumptions about security and defence remain remarkably distinct across European nations. This book offers a comparative analysis of the security and defence policies of all 27 EU member states and Turkey, drawing on the concept of 'strategic culture', in order to examine the chances and obstacles for closer security and defence cooperation across the continent. Along the lines of a consistent analytical framework, international experts provide case studies of the current security and defence policies in Europe as well as their historical and cultural roots.

Contraception for Adolescent and Young Adult Women Amy Whitaker,Melissa Gilliam,2014-06-27 Forty-five percent of adolescents ages 15-19 have had sexual intercourse. By age 19, 75% of all adolescents have had sexual intercourse. Most adolescents select condoms as their most reliable method of contraception. The United States continues to rank among the highest of all similarly developed countries in rates of adolescent pregnancy, and the unintended pregnancy rate is highest among women ages 20-24. The reasons for these public health statistics are myriad, but a major issue is that adolescents and young women use contraception inconsistently. Thus, there is a need for youth to learn about and use contraception consistently and effectively. Unfortunately, misinformation abounds, even among practicing clinicians. Young people need a clinician who is up to date on clinical recommendations regarding contraceptive care. The busy clinician needs information at his or her fingertips, needs to know how to create a teen-friendly environment and must exhibit best contraceptive counseling practices. Gynecologists and primary care practitioners (as well as family physicians, adolescent medicine physicians and pediatricians) are on the front lines when it comes to discussing, recommending and prescribing contraceptive options to adolescent and young women. This book is a valuable resource for these clinicians; it is the only handbook on the market on contraception for the adolescent and young adult women and it is filled with evidence-based information in an easy to read and easy to digest format. Now is an optimal time for a book of this sort. The Centers for Disease Control and Prevention just completed a clinical guideline for contraceptive care based on the World Health Organization's Medical Eligibility Criteria (MEC). The United States MEC seeks to demystify contraceptive care for all women. It also lays the groundwork

for helping providers improve clinical practice in contraceptive care. Contraception for Adolescent and Young Adult Women will complement these efforts in a manner tailored to the unique needs of this population.
