**Fiscal Year 2011 Annual Plan** U.s. Environment Protection Agency, 2014-10-09 This Office of Inspector General (OIG) Annual Plan for the U.S. Environmental Protection Agency (EPA) identifies mandated and selected assignment topics continuing from Fiscal Year (FY) 2010 and scheduled to be started during FY 2011, providing for unforeseen work that may be requested by Agency leadership and Congress, and through ongoing OIG Hotline activities. Because this is a living, flexible document subject to change, the reader is encouraged to consult our website, [www.epa.gov/oig](http://www.epa.gov/oig), for the most current listing of recently issued reports.

**The Sustainable Global Marketplace** Mary Conway Dato-on, 2014-10-27 Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights, complimenting the Academy's flagship journals, the Journal of the Academy of Marketing Science (JAMS) and AMS Review. Volumes are edited by leading scholars and practitioners across a wide range of subject areas in marketing science. This volume includes the full proceedings from the 2011 Academy of Marketing Science (AMS) Annual Conference held in Coral Gables, Florida, entitled The Sustainable Global Marketplace.

**Sustainability Management** Steven Cohen, 2011-07-12 Can we grow our world economy and create opportunities for the poor while keeping the planet intact? Can we maintain our vibrant, dynamic lifestyles while ensuring the Earth stays productive and viable? Aimed at managers, students, scholars, and policymakers, Sustainability Management answers these questions in the affirmative, arguing it is possible for environmentally sustainable business practices and policies to foster economic and long-term growth. Written by a former analyst and consultant with the EPA, this book originally combines sustainable efforts in water, agriculture, urban, and power management to achieve in practice, not just in theory a sustainable planet and economy. Steven Cohen begins with the technical, financial, managerial, and political challenges of such a project, and then honestly assesses sustainable practices in the manufacturing and service industries. He addresses renewable and carbon-free energy production; water sustainability, especially with regard to energy issues involving filtration, distribution, and changing rainfall patterns; food cultivation and distribution; and ways to maintain the interdependent systems on which we depend to live. Taking examples from New York City, one of the most sustainable and sustainability-minded metropolises in the world, Cohen explains how everything from construction to waste management can be designed to facilitate a sustainable environment, not just for New York but also for the world. He concludes with this macroscopic view, outlining the global efforts necessary to preserve biodiversity and ecosystems, and the impact of war, terrorism, and human conflict on sustainability.

Financial Sustainability in Public Administration Manuel Pedro Rodríguez Bolívar, 2017-08-10 This book analyses the methods used to assess financial sustainability as defined by the International Federation of Accountants (IFAC). Recently, there have been calls to consider sustainability as a fundamental guiding principle in public management. The financial and economic crisis has spurred a demand for greater financial sustainability in public administrations. Although the concept of sustainability has been traditionally associated with three dimensions (environmental, social and economic), this book focuses on the metrics used to evaluate financial sustainability and explores the concept of financial health. It will be of interest to researchers and academics in the field of financial sustainability.

*Resilient Cities 2* Konrad Otto-Zimmermann, 2012-05-04 Assembling papers originally presented at the Resilient Cities 2011 Congress in Bonn, Germany (June 2011), the second global forum on

cities and adaptation to climate change, this volume is the second in a series resulting from this annual event. These cutting-edge papers represent the latest research on the topic and reflect the intensification of the debate on the meaning of and interaction between climate adaptation, risk reduction and broader resilience. Thus, contributors offer more material related to resilience, such as water, energy and food security; green infrastructure; the role of renewables and ecosystem services; vulnerable communities and urban poor; and responsive financing for adaptation and multi-level governance. Overall, the book brings a number of different perspectives to bear on the most pressing issues and controversies surrounding climate change adaptation in cities. These papers will prove invaluable to anyone interested in deepening their understanding of urban resilience and contributing to tackling climate change at the local level.

**The CSR International Research Compendium: Volume 2 - Environment** Wayne Visser, Ileana Magureanu, Karina Yadav, 2015-04-16 In this 610 page Compendium, CSR International has compiled summaries of the best research on corporate sustainability, social responsibility and business ethics since 2009. This second volume on Environment profiles over 500 research publications between 2009 and 2014 - including practitioner reports, market surveys and academic papers - from over 80 authors and more 400 organisations. Specifically, it contains research abstracts on the following environment-related topic areas: Sustainable Development and the Green Economy Sustainability Practices Sustainable Resource Use Prevention of Pollution Climate Change Protection of the Environment and Biodiversity Sectoral Approaches We believe this Compendium will serve as an invaluable resource for academics, students, researchers and professionals around the world who share our interest and passion for social responsibility, sustainability, business ethics and corporate accountability.

Timber consumption and sustainable forest use O'Brien, Meghan, 2016-07-08 The global demand for timber is increasing, with prognoses for the EU showing particularly high growth to meet renewable energy targets. However, there are limited options to meet rising timber demands within the EU, and global land competition to meet world food, energy and material needs, as well as to conserve high value nature areas, is increasing. This dissertation addresses the knowledge gap between the pressures of increased land use abroad and the underlying drivers of land use change. It argues that there is a high risk of problem shifting if EU policies to increase timber consumption are not accompanied by a monitoring system that accounts for consumption levels and provides a benchmark for sustainability.

**Ecological Consequences of Global Climate Change 2011** J. Emil Morhardt, 2011

Summary Washington (State). Department of Ecology, 2013

**Financial Sustainability of Local Authorities** Great Britain: National Audit Office, 2013-01-30 The Department for Communities and Local Government should work with other government departments to improve the evaluation of the impact of decisions on local authority finances and services. Local authorities have, so far, managed with reduced funding, but more are facing the challenge of avoiding financial difficulties while meeting their obligations. Central government planned at the 2010 spending review to reduce funding of local authorities by £7.6 billion (26 per cent) in real terms between April 2011 and March 2015. The effects on local authorities vary. In 2012-13, the overall reduction in spending power ranges from 1.1 per cent to 8.8 per cent. At the same time, demand for high-cost services, such as adult and children's social care, is increasing. The scope is diminishing for absorbing cost pressures through reducing other, lower cost, services given that spending on these services has already been reduced. Departments have assessed the impact of changes to local authority funding, but their approach needs to be more comprehensive in the future. The accountability framework for addressing widespread financial failure in local government is untested. Where there have been one-off failures requiring central government intervention, the failure regime has managed to resolve them. It is not known how the system would respond in the case of multiple financial failures in more challenging times for local authorities.

**Disclosure on sustainable development, CSR environmental disclosure and greater value recognized to the company by users** Olga Maria Stefania Cucaro, 2022-10-19 The study is

linked to the analysis of voluntary disclosure present in the financial statements of the companies. In particular, it is interesting to analyze that part of the relational capital defined as CSR (Corporate Social Responsibility) and the part of information falling within the risk disclosure (environmental and social). It is known that in 2017, for large organizations, the sustainability report, also known as the social report, also referred to as a non-financial statement pursuant to Legislative Decree 254/2016, will be mandatory. This Working Paper is linked to the previous Working Paper on Sustainability n.1 Disclosure on sustainable development and the greater value recognized to the company by the market by the same Author who analyzed the relevance of disclosure on sustainable development and environmental policies present in the financial statements of companies. This research is still in the first phase of study as only the financial statements for the year 2010 of the 21 selected companies have been analyzed. In this work, compared to the previous one, new keywords taken from the guidelines on CSR disclosure have been added with consequent expansion of the bibliography. The research continues with the detection of the keywords on sustainability deriving from the analysis of the financial statements of the companies selected from 2011 to 2017. The study of the evolution of the CSR disclosure of the two categories Environmental and Social will be the final goal of this research on sustainability. **Routledge Handbook of Sustainable Real Estate** Sara Wilkinson, Tim Dixon, Norm Miller, Sarah Sayce, 2018-03-21 With the built environment contributing almost half of global greenhouse emissions, there is a pressing need for the property and real estate discipline to thoroughly investigate sustainability concerns. The Routledge Handbook of Sustainable Real Estate brings together the latest research of leading academics globally, demonstrating the nature and extent of the impact as well as suggesting means of mitigating humankind's impact and building resilience. Four sections examine the different aspects of sustainable real estate: governance and policy valuation, investment and finance management redevelopment and adaptation. Covering all land uses from residential to commercial, retail and industrial, the Routledge Handbook of Sustainable Real Estate is an exciting mixture of received wisdom and emerging ideas and approaches from both the developed and developing world. Academics, upper-level students and researchers will find this book an essential guide to the very best of sustainable real estate research.

**The CSR International Research Compendium: Volume 1 - Governance** Wayne Visser, Ileana Magureanu, Karina Yadav, 2015-04-17 Since 2009, CSR International has been identifying and summarising the best research on corporate sustainability, social responsibility and business ethics and sharing it through monthly Research Digests. Now, for the first time, CSR International are bringing together all of the research summaries since 2009 into three thematic volumes: on Governance, Environment, and Society. This Compendium will serve as an invaluable resource for academics, students, researchers and professionals around the world who share an interest and passion for social responsibility, sustainability, business ethics and corporate accountability. The first volume on Governance profiles over 450 research publications between 2009 and 2014 - including practitioner reports, market surveys and academic papers - from over 300 authors and more than 250 organisations. Specifically, it contains research abstracts on the following governance-related topic areas - Accountability, Transparency, Ethical Behaviour, Responsible Investment, Stakeholder Interests, Fair Operating Practices.

Sustainability in the Global City Cindy Isenhour, Gary McDonogh, Melissa Checker, 2015-03-05

This volume is a vital contribution to conversations about urban sustainability, looking beyond the propaganda to explore its consequences for everyday life.

**Securing the future financial sustainability of the NHS** Great Britain: National Audit Office, 2012-07-05 Although in 2011-12 there was a surplus of £2.1 billion across the NHS as a whole, there is also some financial distress, particularly in some hospital trusts. In the long term, achieving financially sustainable healthcare is likely to mean changes to how and where people access services, and some local commissioners are already consulting on and developing plans to do this. Currently, some organisations have relied on additional financial support from within the NHS. 10 NHS trusts, 21 NHS foundation trusts, and three Primary Care Trusts (PCTs) have reported a combined deficit of £356 million. There are four foundation trusts and 17 NHS trusts which between 2006-07 and 2011-12 needed injections of working capital from the Department of Health totalling £1 billion. The Department anticipates that NHS trusts and NHS foundation trusts are likely to need around £300 million more public dividend capital in 2012-13. 51 per cent of PCTs reported concern about the financial sustainability of their healthcare providers. Previously, PCTs and Strategic Health Authorities (SHAs) have been able to support otherwise weak providers. It is not yet clear whether clinical commissioning groups and the NHS Commissioning Board will agree to provide financial support to providers in this way. The NAO concludes that it is hard to see how continuing to give financial support to organisations in difficulty will be a sustainable way of reconciling growing demand for healthcare with the size of efficiency gains required within the NHS

**Crisis Communication, Liberal Democracy, and Ecological Sustainability** Majia Nadesan, 2016-05-18 Through detailed and empirical analysis of the institutions, governing logics, risk-management practices, and crisis communications involved in the 2007-2008 financial crisis, the 2010 BP oil crisis, and the 2011 Fukushima Daiichi nuclear crisis, this book demonstrates that contemporary financial and energy complexes pose significant threats to liberal democracy and ecological sustainability.

International Business, Sustainability and Corporate Social Responsibility Maria Alejandra Gonzalez-Perez, Liam Leonard, 2013-02-27 This is the first in a two volume study of Corporate Social Responsibility and corporate behaviour from around the world, taking in viewpoints from five continents and over ten countries. These case studies present a detailed analysis of best practice in the corporate world in the areas of social ethics and community engagement.

Sustainable Governance Indicators 2011 Bertelsmann Stiftung, 2011-08-19 The Sustainable Governance Indicators (SGI) 2011 make up the second and latest edition of this major study, and they build upon the work of the successful and widely acknowledged first edition, from 2009. The study examines 31 OECD countries and their performance during the period between May 2008 and April 2010, which witnessed the height of the global financial turmoil and economic crisis. In addition to the 2011 findings, this volume also includes essays on the project's conceptual framework and methodology as well as summaries and strategic forecasts for each of the countries.
