Phil Edmonston, Canada's automotive Dr. Phil for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of zombie vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: when you mess up, 'fess up.

We are confronted with a plethora of different approaches and frameworks which purport to answer this question from the classic Michael Porter approach to Kim and Mauborgne's blue ocean strategy to Steve Jobs' build it and they will come" philosophy. The difference between winning and losing has never been greater. And using the right approach pays off: firms that successfully match their approach to their environment realize significantly better returns than those who don't. And, they avoid the common frustrations stemming from lack of perceived relevance and engagement around on the strategy process. How you choose and execute the right approach is the focus of this book. From Global BCG strategy experts Martin Reeves, Knut Haanaes, Janmejaya Sinha (and based on the bestselling article in Harvard Business Review), Your Strategy Needs a Strategy offers a practical guide to help you to match your approach to strategy to your environment and execute it effectively, to combine different approaches for companies which operate in multiple environments, and to lead your organization in making better strategic choices. Organizing approaches into five strategic archetypes Be Big, Be Fast, Be First, Be the Orchestrator, Be Viable the authors explain the conditions under which each is appropriate, when and how to execute each one, and how to avoid common strategy traps. They richly illustrate the idea with interviews with CEOs from different industries from around the globe. How to Be Richer, Smarter, and Better-Looking Than Your Parents Zac Bissonnette,2012-04-24 Striking out on your own for the first time is exhilarating. But in a culture full of bad advice, predatory banks, and splurge-now-pay-later temptations, it can also be extremely dangerous—leading you to make financial decisions that could hurt you for years to come. Combine this with a slumped economy, mounds of student loans, and dubious examples from reality TV stars to politicians to your own parents, and it's no wonder so many twenty-somethings are struggling. Twenty-three-year-old Zac Bissonnette—the author of Debt-Free U—knows exactly what you're going through. He demystifies the many traps young people fall victim to in their post-college years. He offers fresh insights on everything from job hunting to buying a car to saving for retirement that will give you a foundation for a secure, stable, and happy life. In the process, he reveals why FICO scores are overrated, online job applications are a waste of time, car loans are for suckers, and credit card rewards are a scam. With detours to discuss wine connoisseurs, Really Broke Housewives, and Lenny Dykstra, Zac shows you how to make better choices today so you can be richer, smarter (and better-looking!) for years to come.

The White Coat Investor James M. Dahle,2014-01 Written by a practicing emergency physician, The White Coat Investor is a high-yield manual that specifically deals with the financial issues facing medical students, residents, physicians, dentists, and similar high-income professionals. Intellectual Property, Competition Law and Economics in Asia R Ian McEwin, 2011-10-07 This book results from a conference held in Singapore in September 2009 that brought together distinguished lawyers and economists to examine the differences and similarities in the intersection between intellectual property and competition laws in Asia. The prime focus was how best to balance these laws to improve economic welfare. Countries in Asia have different levels of development and experience with intellectual property and competition laws. Japan has the longest experience and now vigorously enforces both competition and intellectual property laws. Most other countries in Asia have only recently introduced intellectual property laws (due to the Trade-Related Aspects of Intellectual Property Rights (TRIPS) Agreement) and competition laws (sometimes due to the World Bank, International Monetary Fund or free trade agreements). It would be naïve to think that laws, even if similar on the surface, have the same goals or can be enforced similarly. Countries have differing degrees of acceptance of these laws, different economic circumstances and differing legal and political institutions. To set the scene, Judge Doug Ginsburg, Greg Sidak, David Teece and Bill Kovacic look at the intersection of intellectual property and competition laws in the United States. Next are country chapters on Asia, each jointly authored by a lawyer and an economist. The country chapters outline the institutional background to the intersection in each country, discuss the policy underpinnings (theoretically as well as describing actual policy initiatives), analyse the case law in the area, and make policy prescriptions.

The Wide Lens Ron Adner, 2012-03-01 How can great companies do everything right - identify real customer needs, deliver excellent innovations, beat their competitors to market - and still fail? The sad truth is that many companies fail because they focus too intensely on their own innovations, and then neglect the innovation ecosystems on which their success depends. In our increasingly interdependent world, winning requires more than just delivering on your own promises. It means ensuring that a host of partners - some visible, some hidden - deliver on their promises, too. In *The Wide Lens*, innovation expert Ron Adner draws on over a decade of research and field testing to take you on far ranging journeys from Kenya to California, from transport to telecommunications, to reveal the hidden structure of success in a world of interdependence. A riveting study that offers a new perspective on triumphs like Amazon's e-book strategy and Apple's path to market dominance; monumental failures like Michelin with run-flat tires and Pfizer with inhalable insulin; and still unresolved issues like electric cars and electronic health records, *The Wide Lens* offers a powerful new set of frameworks and tools that will multiply your odds of innovation success. *The Wide Lens* will change the way you see, the way you think - and the way you win.

Leadership and Cultural Change Ramona Houmanfar, Mark Mattaini, 2018-10-16 Contemporary confluences of leadership decision-making and citizenship behavior often unintentionally contribute to the depletion of the world's resources - escalating health, education, and social crises, as well as community, societal, and cultural struggles - to adapt to emerging global shifts. Leadership and management practices in this context affect the wellbeing of organizational members (e.g., their safety, health, financial security, etc.) but also entail positive or negative impacts on consumer practices and collective community well-being (e.g., education, obesity, cancer, safe or green driving, energy conservation, diversity based health care, etc.). Decision-making in most businesses and organizations is largely responsive to demands for short-term profit or cost minimization. On the consumer side, both cultural values and the corporate marketing practices that sustain them encourage high levels of consumption necessary to sustain corporate practices. In exploring the emerging applications of behavior science to these challenges, this book showcases emerging work by internationally recognized scholars on leadership and cultural change. The book will aid organizations and leaders in creating new models of stewardship, and will open opportunities for innovation while adapting and responding to growing social upheaval, technological advances, and environmental concerns, as well as crises in the global economy, health, education, and environment. This book was originally published as a special issue of the *Journal of Organizational Behavior Management*.

Transitions to Alternative Vehicles and Fuels National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on Transitions to Alternative Vehicles and Fuels, 2013-04-14 For a century, almost all light-duty vehicles (LDVs) have been powered by internal combustion engines operating on petroleum fuels. Energy security concerns about petroleum imports and the effect of greenhouse gas (GHG) emissions on global climate are driving interest in alternatives. *Transitions to Alternative Vehicles and Fuels* assesses the potential for reducing petroleum consumption and GHG emissions by 80 percent across the U.S. LDV fleet by 2050, relative to 2005. This report examines the current capability and estimated future performance and costs for each vehicle type and non-petroleum-based fuel technology as options that could significantly contribute to these goals. By analyzing scenarios that combine various fuel and vehicle pathways, the report also identifies barriers to implementation of these technologies and suggests policies to achieve the desired reductions. Several scenarios are promising, but strong, and effective policies such as research and development, subsidies, energy taxes, or regulations will be necessary to overcome barriers, such as cost and consumer choice.

Winning the Long Game Steven Krupp, Paul J.H. Schoemaker, 2014-12-02 Are you winning the battle but losing the war? Every leader has to deliver the goods—make budget, meet deadlines, and deftly manage people—to provide the inspirational fuel that keeps their business running day-in and day-out. But therein lies the danger of winning today's battle and losing the war—that is the long game of creating sustainable value in a volatile, uncertain world that is becoming ever-more complex and ambiguous. The greater purpose—today's number one business challenge—is winning the long game by being more strategic; developing the skills to look outside the four walls of the organization and see the world from the future back. Steven Krupp and Paul J. H. Schoemaker bridge the gap between what many see as the separate domains of strategy and leadership to show how to develop the discipline of strategic leadership in a world of growing uncertainty. While pragmatic to the core, *Winning the Long Game* creates vivid insights into the discipline of strategic leadership by applying it systemically through personal portraits of successful business leaders. The book profiles Elon Musk, Richard Branson, and Sara Blakely, as well as world-renowned figures like Pope Francis, Oprah Winfrey, and Nelson Mandela. What makes these strategic leaders successful is highlighted by contrasting them with others who are either mediocre or outright failures. *Winning the Long Game* is the must-have playbook for every leader and for any manager seeking to become more strategic in today's topsy-turvy world.

The 100 Greatest Bands of All Time [2 volumes] David V. Moskowitz, 2015-11-10 This one-of-a-kind reference investigates the music and the musicians that set the popular trends of the last half century in America. Many rock fans have, at one time or another, ranked their favorite artists in order of talent, charisma, and musical influence on the world as they see it. In this same spirit, author and music historian David V. Moskowitz expands on the concept of top ten lists to provide a lineup of the best 100 musical groups from the past 60 years. Since the chosen bands are based on the author's personal taste, this two-volume set provokes discussion of which performers are included and why, offering insights into the surprising influences behind them. From the Everly Brothers, to the Ramones, to Public Enemy, the work covers a wide variety of styles and genres, clearly illustrating the connections between them. Entries focus on the group's history, touring, membership, major releases, selected discography, bibliography, and influence. Contributions from leading scholars in popular music shed light on derivative artists and underscore the overall impact of the performers on the music industry.
