Etat de la migration dans le monde 2011 International Organization for Migration,2012-04-24 Le Rapport présente les informations disponibles sur les représentations et les attitudes du public au sujet de la migration. Il analyse la manière dont celles-ci sont façonnées, et comment elles peuvent influencer sur, ou être influencées par, l'action des pouvoirs publics et les médias. Il étudie en outre le rôle que jouent ces derniers lorsqu'ils relaient l'opinion, rendent compte des tendances migratoires et orientent le discours sur la migration, et livre des exemples de bonnes pratiques suivies par les pouvoirs publics, la société civile et les médias pour communiquer une image positive et nuancée des migrants. Enfin, il propose divers moyens pour mieux communiquer sur la migration, de façon à faciliter la compréhension et la reconnaissance des avantages de celle-ci, à encourager la formulation de politiques davantage fondées sur des données probantes, et à s'assurer une meilleure participation des migrants eux mêmes.

Handbook on the Use of Administrative Sources and Sample Surveys to Measure International Migration in CIS Countries United Nations Economic Commission for Europe,2016-12-09 Migration is a powerful driver and important consequence of economic, political and social change, and there fore needs to be adequately measured and understood. However, the improvement of statistical systems to measure migration has been a slow process because of weak coordination between migration statistics producers, discrepancies in the applied definitions, and challenges related to data collection. The objective of this handbook is to guide statisticians and other professionals in producing and using data on international migration from administrative sources and household surveys in the CIS region. It describes the key concepts and definitions for the measurement of international migration. It also provides practical information on the sources of administrative data and their use, and highlights the related methodological and organizational challenges.

The Foundations and Future of Financial Regulation Mads Andenas,Iris H-Y Chiu,2013-11-20 Financial regulation has entered into a new era, as many foundational economic theories and policies supporting the existing infrastructure have been and are being questioned following the financial crisis. Goodhart et al's seminal monograph *Financial Regulation: Why, How and Where Now?* (Routledge:1998) took stock of the extent of financial innovation and the maturity of the financial services industry at that time, and mapped out a new regulatory roadmap. This book offers a timely exploration of the Why, How and Where Now of financial regulation in the aftermath of the crisis in order to map out the future trajectory of financial regulation in an age where financial stability is being emphasised as a key regulatory objective. The book is split into four sections: the objectives and regulatory landscape of financial regulation; the regulatory regime for investor protection; the regulatory regime for financial institutional safety and soundness; and macro-prudential regulation. The discussion ranges from theoretical and policy perspectives to comprehensive and critical consideration of financial regulation in the specifics. The focus of the book is on the substantive regulation of the UK and the EU, as critical examination is made of the unravelling and the future of financial regulation with comparative insights offered where relevant especially from the US. Running throughout the book is consideration of the relationship between financial regulation, financial stability and the responsibility of various actors in governance. This book offers an important contribution to continuing reflections on the role of financial regulation, market discipline and corporate responsibility in the financial sector, and upon the roles of regulatory authorities, markets and firms in ensuring the financial health and security of all in the future.

Global Civil Society 2012 Hertie School of,2012-04-18 Activists and academics look back over ten years of 'politics from below', and ask whether it is merely the critical gaze upon the concept that has changed - or whether there is something genuinely new about the way in which civil society is now operating.

Ensuring compliance with International Humanitarian Law. The EU, France, and Spain Steible, Bettina,2020-08-24 Según los términos del Artículo 1 Común a los cuatro Convenios de Ginebra de 1949, los Estados partes quedan sujetos a una obligación de respetar y de hacer respetar el Derecho Internacional Humanitario (DIH). En este libro se analiza si la Unión Europea (UE) y dos de sus Estados Miembros -Francia y España- ejecutan su obligación de hacer respetar el DIH. Concretamente, se trata de analizar cómo dos corpus jurídicos originalmente indiferentes el uno del otro, el DIH y el Derecho de la Unión, llegaron a converger y entrelazarse. Se sostiene que la aplicación del DIH ha de ser analizada desde una perspectiva multinivel. Mientras el DIH depende de los Estados para asegurar su efectividad, el proceso de integración europea obliga a añadir el nivel supranacional: la UE. Esta configuración genera un círculo virtuoso de cumplimiento del DIH según el cual la autoridad jurídica del Artículo 1 Común queda reforzada, lo cual conlleva una mejor implementación del DIH. Asimismo, la UE proyecta sus valores en la escena internacional y se ve reforzada en su calidad de líder en materia de derechos humanos. Además, la UE constituye un nivel adicional tanto de garantía como de actuación para sus Estados Miembros, que la usan para dar efecto a sus obligaciones derivadas del DIH. Se sostiene pues, que la UE se ha establecido como un actor esencial del DIH en la escena internacional. La UE -un autoproclamado líder en materia de derechos humanos- y sus Estados Miembros no solamente quedan vinculados por el Artículo 1 Común, sino que han aceptado de

ejecutar su mandato de manera efectiva en la escena internacional.

The Global Capitalist Crisis and Its Aftermath Berch Berberoglu,2016-12-05 Written by a team of experts on the contemporary global capitalist political economy who are able to shed light on the inner workings of global capitalism and the capitalist globalization process that has led to the growth and development of capitalism from the national to the global level, this groundbreaking volume provides critical analyses of the causes and consequences of the Great Recession of 2008-2009. Through a careful examination of the origin, development and aftermath of the catastrophic economic crisis from which the world is still trying to recover, editor Berch Berberoglu and his colleagues demonstrate that those most responsible for the economic collapse are the ones least affected by its devastating impact felt most severely by working people around the world. Ultimately, this book argues that it is only through the systematic restructuring of the world economy by the working class that society will be able to prevent the boom and bust cycle of global capitalist crises and usher in a more egalitarian socialist economy and society.

2010 Global Hunger Index Klaus von Grebmer, Maximo Torero, Tolulope Olofinbiyi, Heidi Fritschel, Doris Wiesmann & Yisehac Yohannes,2010-10-17 As the world approaches the 2015 deadline for achieving the Millennium Development Goals (MDGs), which include a goal of reducing the proportion of hungry people by half, the 2010 Global Hunger Index (GHI) offers a useful multidimensional overview of global hunger. The 2010 GHI is the fifth in an annual series that records the state of global, regional, and national hunger. The 2010 GHI shows some improvement over the 1990 GHI, falling by almost one-quarter, but overall the index for hunger in the world remains at a level characterized as serious. The GHI captures three dimensions of hunger: insufficient availability of calories, shortfalls in the nutritional status of children, and child mortality. Accordingly, the Index includes the following three equally weighted indicators: the proportion of people who are undernourished, as estimated by the Food and Agriculture Organization of the United Nations (FAO); the prevalence of underweight in children under the age of five, as compiled by the World Health Organization (WHO); and the under-five mortality rate, as reported by the United Nations Children's Fund (UNICEF). The 2010 Index reflects data from 2003 to 2008, the most recent global data available on the three GHI components.

Defining and Measuring Circular Migration United Nations Economic Commission for Europe,2017-02-13 Circular migration – a repetition of migration by the same person between two or more countries – is a topic of growing importance, on which information is needed for policy development. To meet this demand, there is a need to establish an international statistical definition of what circular migration is and how it can be measured and compared between different reporting countries. This publication presents the results of the work of the UNECE Task Force on Measuring Circular Migration in addressing this need, including a proposal for a common international statistical definition of circular migration. Key definitions of international migration statistics and already-existing definitions of circular migration are analyzed as are five dimensions of circular migration: repetition of move (frequency), directionality, duration, purpose or reason for move, and developmental impact. The report presents proposals for a statistical definition of circular migration while also identifying several important challenges in measuring circular migration, such as measuring short-term migration and measuring a series of events within a specific period as a single statistic. Practical applications of the proposed definitions are presented with examples from Italy and Sweden.
