Profiling Cop-Killers Ann R. Bumbak, 2014-01-07

Drawing heavily on original research designed to train police officers to survive deadly encounters, Profiling Cop-Killers examines the sociological history, psychology, and motives of 50 murderers of police officers in 2011. The book identifies the commonalities and differences between groups of offenders by age, examining the previously hidden connections between an offender's lethal choices, criminal history, drug and alcohol usage, and interpersonal

relationships. Using Erikson's theory of life span development, the author applies the test of the struggle for identity to offender profiles, words, and actions—analyzing the interaction of offenders' maturity levels, mastery of challenges by phase, and degree of deviancy exhibited in their violent acts. The book also includes a closer look at diagnoses of concern and the crossroads of offender behavior and officer actions. This book aims to equip those who work with offenders, police officers, and the mentally ill to read the signs of future violence. Demonstrating the complex set of circumstances that may lead an individual to commit these crimes, this book will challenge readers to think differently about the people who take the lives of law enforcement officers. In doing so, it seeks to answer the question: Who are cop-killers and why do they commit the ultimate crime of violence against the peacekeepers of society?

Rugged Road to Justice Harsh Dobhal, Mathew Jacob, 2012

Exchange Politics David K. Jones, 2017-11-07 The Affordable Care Act (ACA) contained a threat that any state refusing to set up a health insurance exchange would lose control to the federal government. Republicans had supported the concept before it became part of Obamacare, and so virtually every state was expected to cooperate and implement this core part of the law through which millions would receive financial assistance to buy health insurance. However, 34 states refused to participate, using their flexibility as an opportunity to try to bring down the entire law. This is a stunning miscalculation by the Obama administration. This book tells the story of what happened in the final two states to choose state control (Idaho and New Mexico) and the two that came the closest but did not (Michigan and Mississippi). Contrary to how it is typically

described in the media, the most intense split was not between Republicans and Democrats, but within the Republican Party. Governors were the most important people in the fight over exchanges, but did not always get their way. The Tea Party was amazingly successful at defeating the most powerful interest groups. State-level and national conservative think tanks were important allies to the Tea Party. The relative power of these groups was shaped by differences in institutional design and procedures, such as whether a state has term limits and the length of legislative sessions. Opposition was more easily overcome in states whose conditions facilitated the development of legislative pockets of expertise. This is a dramatic example of opponents using federalism to block national reform and serves as a warning of the challenge of inducing state cooperation in other policy domains such as the environment and education.

Effectiveness versus Procedural Protection Allison Östlund, 2019-10-29 Die Arbeit untersucht das Spannungsfeld zwischen einem fairen Resultat und Fairplay im Rechtsverfahren. Bislang hat der Europäische Gerichtshof es traditionell abgelehnt, hier eine klare Wahl zu treffen, indem er sich in Vorabentscheidungen im Zusammenhang mit der ex officio-Überprüfung weitgehend dem nationalen Recht unterwirft. Diese Arbeit zeigt, dass spezifische Schutzvorrechte zunehmend substantiell korrekte Urteile hervorgebracht haben, während ein neuer Grundrechtsansatz den individuellen Verfahrensschutz nicht gefördert hat.

Beyond War David Rohde, 2013-04-18 A groundbreaking look at America's role in the Middle East—from the Pulitzer Prize-winning author of *A Rope* and a Prayer Distilling eleven years of expert reporting for the New York Times, Reuters, and the Atlantic, two-time Pulitzer

Prize winner David Rohde presents an incisive look at the calamitous privatization of the war on terror. *Beyond War* is a clarion call for change in American policies and attitudes toward a rapidly changing Middle East. Rohde argues that using lethal force is necessary at times, but economic growth and Muslim moderates—not American soldiers—will eradicate militancy in the long term. Vast mistakes have been made, but it is not too late. By scaling back our ambitions, focusing on economics and working with Muslim moderates, we will achieve more.

Gleick and his colleagues at the world-renowned Pacific Institute. US-China Strategic Competition S. Mahmud Ali, 2015-05-14 This book examines the nature and consequences of strategic competition between the US and China, which affects the global security landscape and the

emerging security architecture across the broader Asia-Pacific region. The author illustrates the evolution of Sino-US security interactions from the anti-Soviet alliance, to temporary marginalization, to eventual strategic competition and examines cases that could potentially escalate into greater conflicts. The analysis offers tantalizing glimpses into both the dangers and promising opportunities presented by this strategic fork in the road, making it of great interest to researchers and scholars in the fields of international relations and security studies.

Divided We Stand John Horgan, 2013-01-10 Terrorism has returned to the streets of Northern Ireland. In the years after the 1998 Real IRA bombing of Omagh, which killed 29 people, violent dissident Republican groups have re-emerged as a major security threat to a region that has been denied peace, stability, and prosperity for too long. Those responsible have many names. They are breakaways, splinter factions, spoilers, and residual terrorists. The Real IRA, Continuity IRA, and Óglaigh na hÉireann are only some of the groups now responsible for a growing wave of bombings, shootings, threats, and intimidation across Northern Ireland. Commonly known as the dissidents, these are the rejectionists for whom there seems to be no negotiated settlement, no peace deal, no consensus solution that will convince them to accept the will of the majority of the people on the island of Ireland. *Divided We Stand: The Strategy and Psychology of Ireland's Dissident Terrorists* presents the results of meticulous research conducted by the International Center for the Study of

Terrorism at the Pennsylvania State University. Since 2007, John Horgan, Director of the center, has led a research project to monitor the activities of Ireland's new terrorists. Drawing on one of the largest open-source militant databases ever assembled, *Divided We Stand* describes the activities, histories, motivations, psychology, and strategy of the small, dynamic, and rapidly evolving splinter groups that continue to erode peace, stability, and normalization in Northern Ireland.

European Criminal Law Kai Ambos, 2018-06-07 Since their creation, the European Union and the Council of Europe have worked to harmonise the justice systems of their member states. This project has been met with a series of challenges. *European Criminal Law* offers a compelling insight into the development and functions of European criminal law. It tracks the historical development of European criminal law, offering a detailed critical analysis of the criminal justice systems responsible for its implementation. While the rapid expansion and transnationalisation of criminal law is a necessary response to the growing numbers of free movement of persons and goods, it has serious implications for the rights of European citizens and needs to be balanced with rights protections. With its close analysis of secondary legislation and reliance on a wide variety of original sources, this book provides a thorough understanding of European Criminal Law and the institutions involved.

Advanced Economies and Emerging Markets Marcus Goncalves, José Alves, Carlos Frota, Harry Xia, Rajabahadur V. Arcot, 2014-09-08 There is intense competition among emerging markets to capture their share of the global economy. This book addresses questions that are germane to accomplishing this goal. Most important to this end is the study and practice of

international business and foreign trade.

Black 9/11 Mark Gaffney,2012-06-01 The weeks following the attacks of September 11, 2001, were traumatic for nearly every American, but for some, the answers they received from the media and the government to explain the horrific events was not satisfactory. Accusations of cover-ups, internal plots, and sabotage from within the ranks of the U.S. government were—and continue to be—not uncommon. But compelling evidence contrary to the accepted narrative has, for some skeptics, been lacking. This investigation into the events of that day reveals dark secrets about United States-sponsored terrorism. Taking highly complex technical and scientific information, and distilling it for the consumption of the lay person, this inquiry attempts to reveal the truth behind that infamous day.

A Trust Betrayed Mike Magner,2014-03-11 While the big bad corporation has often been the offender in many of the world's greatest environmental disasters, in the case of the mass poisoning at Camp Lejeune the culprit is a revered institution: the US Marine Corps. For two decades now, revelations have steadily emerged about pervasive contamination, associated clusters of illness and death among the Marine families stationed there, and military stonewalling and failure to act. Mike Magner's chilling investigation creates a suspenseful narrative from the individual stories, scientific evidence, and smoldering sense of betrayal among those whose motto is undying fidelity. He also raises far-reaching and ominous questions about widespread contamination on US military bases worldwide.

Complexity, Security and Civil Society in East Asia Peter Hayes,Kiho Yi,2015-06-22 Complexity, Security and Civil Society in East Asia offers the latest understanding of complex global problems in the region, including nuclear

weapons, urban insecurity, energy, and climate change. Detailed case studies of China, North and South Korea, and Japan demonstrate the importance of civil society and 'civic diplomacy' in reaching shared solutions to these problems in East Asia and beyond. Each chapter describes regional civil society initiatives that tackle complex challenges to East Asia's security. In doing so, the book identifies key pressure points at which civil society can push for constructive changes—especially ones that reduce the North Korean threat to its neighbors. Unusually, this book is both theoretical and practical. Complexity, Security and Civil Society in East Asia presents strategies that can be led by civil society and negotiated by its diplomats to realize peace, security, and sustainability worldwide. It shows that networked civic diplomacy offers solutions to these urgent issues that official 'complex diplomacy' cannot. By providing a new theoretical framework based on empirical observation, this volume is a must read for diplomats, scholars, students, journalists, activists, and individual readers seeking insight into how to solve the crucial issues of our time.

Dreams in the New Century Gary R.

Mormino, 2022-05-17 Florida Book Awards, Gold Medal for Florida Nonfiction Florida Historical Society Charlton Tebeau Book Award A leading Florida historian explores one of the state's most consequential eras. It was a time of stunning episodes of boom and bust, an era of extremes, a decade of historic changes that point to Florida's future. In this book, eminent historian Gary Mormino illuminates early twenty-first-century Florida and its connections to some of the most significant events in contemporary American history. Following Mormino's milestone work *Land of Sunshine*, *State of Dreams*, which details the dynamic history of Florida from 1950 to 2000, *Dreams in the New Century*

explores the state's tumultuous next chapter, a period that included the Bush v. Gore election, 9/11, the housing bubble and Great Recession, and the election of Barack Obama. During these years the Elián González story engrossed the country, Tim Tebow rose to football fame, and Donald Trump became a Florida celebrity. From hurricanes to Ponzi schemes, red tides, climate change, the "Stand-Your-Ground" gun law, demographic diversity, and more, Florida offered nonstop news fodder that reflected its extraordinary internal trends and its importance in the nation. As Mormino shows, Florida is a place of deep conflicts—North and South, liberal and conservative, newcomer and local, growth and conservation—with histories that can be traced back centuries. In 2000–2010, Mormino argues, these tensions collided to produce a "Big Bang" that will continue to resonate in years to come. Mormino takes stock of this crucible of change and explains the social, cultural, and political intricacies of a state the world struggles to understand. *Dreams in the New Century* unravels Florida's complicated recent history in a gripping, informative, and fascinating narrative.

Workers' Rights and Labor Compliance in Global Supply Chains Jennifer Bair, Doug Miller, Marsha

Dickson, 2013-11-26 This book provides insight into the potential for the market to protect and improve labour standards and working conditions in global apparel supply chains. It examines the possibilities and limitations of market approaches to securing social compliance in global manufacturing industries. It does so by tracing the historic

origins of social labelling both in trade union and consumer constituencies, considering industry and consumer perspectives on the benefits and drawbacks of social labelling, comparing efforts to develop and implement labelling initiatives in various countries, and locating social labelling within contemporary debates and controversies about the implications of globalization for workers worldwide. Scholars and students of globalisation, development, corporate social responsibility, human geography, labour and industrial relations, business ethics, consumer behaviour and fashion will find its contents of relevance. CSR practitioners in the clothing and other industries will also find this useful in developing policy with respect to supply chain assurance.

Doing Business in Emerging Markets Marcus Goncalves, Jose Alves, Rajabahadur Arcot, 2014-11-15 Like Advanced Economies and Emerging Markets, the 'flagship' book of the series, from which this book is derived Doing Business in Emerging Markets recognizes that there is intense competition among emerging markets to capture their share of the global economy. The series addresses questions that are germane to accomplishing this goal. Most important to this end is the study and practice of international business and foreign trade. Undertaking such a study raises many questions which the series will attempt to answer: Why are emerging markets and the firms doing business in them internationalizing so aggressively; and why in the past decade has the pace of internationalization accelerated so rapidly? What competitive advantages do these emerging economies enjoy in comparison to advanced economies, such as the G20, and what are the origins of those advantages? This volume is devoted to presenting the practical aspects and challenges of doing business in global emerging markets.
