World Heritage Sites and Tourism Laurent Bourdeau, Maria Gravari-Barbas, Mike Robinson, 2016-11-10 Not all World Heritage Sites have people living within or close by their boundaries, but many do. The designation of World Heritage status brings a new dimension to the functioning of local communities and particularly through tourism. Too many tourists accentuated by the World

Heritage label, or in some cases not enough tourists, despite anticipation of increased numbers, can act to disrupt and disturb relations within a community and between communities. Either way, tourism can be seen as a form of activity that can generate interest and concern as it is played out within World Heritage Sites. But the relationships that World Heritage Sites and their consequent tourism share with communities are not just a function of the number of tourists. The relationships are complex and ever changing as the communities themselves change and are built upon long-standing and wider contextual factors that stretch beyond tourism. This volume, drawing upon a wide range of international cases relating to some 33 World Heritage Sites, reveals the multiple dimensions of the relations that exist between the sites and local communities. The designation of the sites can create, obscure and heighten the power relations between different parts of a community, between different communities and between the tourism and the heritage sector. Increasingly, the management of World Heritage is not only about the management of buildings and landscapes but about managing the communities that live and work in or near them.

**The Legacy of Serbia's Great War** Alex Tomić, 2024-01-05 In the winter of 1915, following the invasion of Serbia by the Central Powers, the Serbian Army retreated across the mountains of Albania and Montenegro together with thousands of civilians. Around 240,000 lost their lives. Today, the story of the retreat is little known, except in Serbia where it is represents the heroic Serbian sacrifice in the Great War. In this book Alex Tomić examines the centenary events memorializing the First World War with the retreat at its core, and provides a persuasive account of the ways in which the remembrance of Serbian history has been manipulated for political purposes. Whether through commemorations, ceremonies, or grass- root initiatives, she demonstrates how these have been used as distractions from the more recent unexamined past and in doing so provides an important new perspective on the cultural history of commemoration.

*Headquarters Economy* J. Myles Shaver, 2018-10-18 Metropolitan areas with a high concentration of headquarters from diverse industries stand out as influential, dynamic economies. However, there is little discussion about the characteristics of these 'headquarters economies'. Why do some regions develop vibrant headquarters economies, whereas others do not? The answer lies in understanding the essence of headquarters - the managerial talent pool that guides and governs these companies. By investigating an exemplar headquarters economy - Minneapolis-St. Paul - this volume demonstrates that the talent pool (managers), its movement among companies and industries in a region (mobility), and the nature of its inflow and outflow from a region (migration), can create a virtuous cycle that strengthens regional companies, and draws in additional talent. Comparing the migration pattern of educated, high-earning individuals across metropolitan areas in the United States, and drawing upon a proprietary survey of thousands of headquarters employees in Minneapolis-St. Paul, this book provides supportive evidence for this dynamic. A central insight of the research is that professional managerial talent is a determinant of regional vitality that has largely been overlooked. The underlying factors of managers, mobility, and migration, here identified in the context of Minneapolis-St. Paul, exist in metropolitan areas around the world, demonstrating the scope of application of the research findings, and highlighting the benefit of focusing on these underlying factors.

Routledge Handbook of Sport, Gender and Sexuality Jennifer Hargreaves, Eric Anderson, 2014-03-05 The Routledge Handbook of Sport, Gender and Sexuality brings together important new work from 68 leading international scholars that, collectively, demonstrates the intrinsic interconnectedness of sport, gender and sexuality. It introduces what is, in essence, a sophisticated sub-area of sport sociology, covering the field comprehensively, as well as signalling ideas for future research and analysis. Wide-ranging across different historical periods, different sports, and different local and global contexts, the book incorporates personal, ideological and political narratives; varied conceptual, methodological and theoretical approaches; and examples of complexities and nuanced ways of understanding the gendered and sexualized dynamics of sport. It examines structural and cultural forms of gender segregation, homophobia, heteronormativity and transphobia, as well as the ideological struggles and changes that have led to nuanced ways of thinking about the sport, gender and sexuality nexus. This is a landmark work of reference that will be a key resource for students and researchers working in sport studies, gender studies, sexuality studies or sociology.

*Culinary Linguistics* Cornelia Gerhardt, Maximiliane Frobenius, Susanne Ley, 2013-07-04 Language and food are universal to humankind. Language accomplishes more than a pure exchange of information, and food caters for more than mere subsistence. Both represent crucial sites for socialization, identity construction, and the everyday fabrication and perception of the world as a meaningful, orderly place. This volume on Culinary Linguistics contains an introduction to the study of food and an extensive overview of the literature focusing on its role in interplay with language. It is the only publication fathoming the field of food and food-related studies from a linguistic perspective. The research articles assembled here encompass a number of linguistic fields, ranging from historical and ethnographic approaches to literary studies, the teaching of English as a foreign language, psycholinguistics, and the study of computer-mediated communication, making this volume compulsory reading for anyone interested in

genres of food discourse and the linguistic connection between food and culture. Now Open Access as part of the Knowledge Unlatched 2017 Backlist Collection.
