PHRASES

*2 Billion Under 20* Jared Kleinert, Stacey Ferreira, 2015-07-28 Of the roughly 6.97 billion people on

Earth today, approximately 2 billion of them are under 20 years old. Millennials have a lot of reputations these days, but powerful, smart, and affective are not usually the adjectives used to describe them. Jared Kleinert and Stacey Ferreira want to change that and empower these young people to follow their dreams, set goals, and achieve success. Both young successful entrepreneurs themselves, they believe in breaking down age barriers to make a difference. Jared, best-known as the Founder and CEO of Synergist, and Stacey, best-known as the Co-Founder of MySocialCloud.com met in 2012 at the Under 20 Thiel Fellowship Summit. After speaking with their equally impressive peers, they realized that these 2 billion young voices have inspiring stories to share with the world and they wanted to bring them to life through 2 Billion Under 20. Jared and Stacey also decided to start an online community, [www.2BillionUnder20.com](http://www.2BillionUnder20.com) where young people could help each other grow and develop their dreams into reality. They've curated an anthology of amazing stories from their peers. Contributors like Paige McKenzie who started her own YouTube channel at the age of 16 that now has more than 55 million views and Jack Andraka who created an early detection Pancreatic cancer test at age 14 have joined forces to show the world that age is just a number.

*Gender, Media, Sport* Susanna Hedenborg, Gertrud Pfister, 2017-10-02 Despite the position that sport occupies at the centre of public attention, and despite the billions of consumers and immense coverage which it attracts from around the globe, it seems that the media prioritise coverage of only a very small fraction of sporting events, and a few prominent athletes. It goes without saying that sport in the media is dominated by men – they are a large majority among athletes, consumers, journalists, and producers. This book will shed new light on the long discussed question of gendered sporting coverage, in an era when the Olympics can be dubbed the ‘women’s games’. Some of the contributions present new perspectives such as: the relationship between media and sport in Poland; media presentations of men and women in gender ‘adequate’ and ‘inadequate’ sports; competition between women and men participating in the same events; the presentation of celebrities; and the framing of doping within the context of gender relations. Furthermore, the book focuses not only on athletes, sports and events, but also on consumers, such as hooligans and their brand of masculinity, and on journalists, such as Mike Penner, who attempted to transgress gender boundaries. This book was originally published as a special issue of *Sport in Society*.

**Gaming the World** Andrei S. Markovits, Lars Rensmann, 2013-12 The globalizing influence of professional sports Professional sports today have truly become a global force, a common language that anyone, regardless of their nationality, can understand. Yet sports also remain distinctly local, with regional teams and the fiercely loyal local fans that follow them. This book examines the twenty-first-century phenomenon of global sports, in which professional teams and their players have become agents of globalization while at the same time fostering deep-seated and antagonistic local allegiances and spawning new forms of cultural conflict and prejudice. Andrei Markovits and Lars Rensmann take readers into the exciting global sports scene, showing how soccer, football, baseball,

basketball, and hockey have given rise to a collective identity among millions of predominantly male fans in the United States, Europe, and around the rest of the world. They trace how these global—and globalizing—sports emerged from local pastimes in America, Britain, and Canada over the course of the twentieth century, and how regionalism continues to exert its divisive influence in new and potentially explosive ways. Markovits and Rensmann explore the complex interplay between the global and the local in sports today, demonstrating how sports have opened new avenues for dialogue and shared interest internationally even as they reinforce old antagonisms and create new ones. *Gaming the World* reveals the pervasive influence of sports on our daily lives, making all of us citizens of an increasingly cosmopolitan world while affirming our local, regional, and national identities.

**Women in Sports [2 volumes]** Adrienne N. Milner, Jomills Henry Braddock II, 2017-07-28  
Covering a breadth of topics surrounding the current state of women in sports, this two-volume collection taps current events, sociological and feminist theory, and recent research to contextualize women's experiences in sports within a patriarchal society and highlight areas for improvement. Women are continuing to break barriers in all aspects of sports, and a growing number of people are beginning to recognize sex disparities in sports as a social problem. Additionally, women's inclusion and exclusion in sports—and their equitable and inequitable treatment on the playing field—have large-scale social, legal, health, and economic consequences. *Women in Sports: Breaking Barriers, Facing Obstacles* comprehensively examines the state of women in sports by considering current events, controversies, and trends as well as qualitative and quantitative research. The contributors to this volume take a sociological approach to discussing women in sports by questioning dominant assumptions surrounding notions of women's biological athletic inferiority and by examining other social constructs that affect women's experiences in sports, such as race and ethnicity,

socioeconomic status, and sexual orientation. The book offers a complete and up-to-date account of women's experiences in sports through coverage of the history of women's participation in sports (with a focus on exceptional female athletes) and of the increasing number of women who are competing in traditionally male sports, such as football, baseball, and mixed martial arts. Readers will come away with a greater appreciation for the issues of equity that women face, both within the world of sports and in society in general.

**We Are What We Sell [3 volumes]** Danielle Sarver Coombs, Bob Batchelor, 2014-01-15 For the last 150 years, advertising has created a consumer culture in the United States, shaping every facet

of American life—from what we eat and drink to the clothes we wear and the cars we drive. In the United States, advertising has carved out an essential place in American culture, and advertising messages undoubtedly play a significant role in determining how people interpret the world around them. This three-volume set examines the myriad ways that advertising has influenced many aspects of 20th-century American society, such as popular culture, politics, and the economy. Advertising not only played a critical role in selling goods to an eager public, but it also served to establish the now world-renowned consumer culture of our country and fuel the notion of the American dream. The collection spotlights the most important advertising campaigns, brands, and companies in American history, from the late 1800s to modern day. Each fact-driven essay provides insight and in-depth analysis that general readers will find fascinating as well as historical details and contextual nuance students and researchers will greatly appreciate. These volumes demonstrate why advertising is absolutely necessary, not only for companies behind the messaging, but also in defining what it means to be an American.

*GPS Declassified* Richard D. Easton, 2013-10-01 GPS Declassified examines the development of GPS from its secret, Cold War military roots to its emergence as a worldwide consumer industry. Drawing on previously unexplored documents, the authors examine how military rivalries influenced the creation of GPS and shaped public perceptions about its origin. Since the United States' first program to launch a satellite in the late 1950s, the nation has pursued dual paths into space—one military and secret, the other scientific and public. Among the many commercial spinoffs this approach has produced, GPS arguably boasts the greatest impact on our daily lives. Told by the son of a navy insider—whose work helped lay the foundations for the system—and a science and technology journalist, the story chronicles the research and technological advances required for the development of GPS. The authors peek behind the scenes at pivotal events in GPS history. They note how the technology moved from the laboratory to the battlefield to the dashboard and the smartphone, and they raise the specter of how this technology and its surrounding industry affect public policy. Insights into how the system works and how it fits into a long history of advances in navigation tie into discussions of the myriad applications for GPS.
