**Assessing for Learning** Peggy L. Maki,2023-07-03 While there is consensus that institutions need to represent their educational effectiveness through documentation of student learning, the higher education community is divided between those who support national standardized tests to compare institutions' educational effectiveness, and those who believe that valid assessment of

student achievement is based on assessing the work that students produce along and at the end of their educational journeys. This book espouses the latter philosophy—what Peggy Maki sees as an integrated and authentic approach to providing evidence of student learning based on the work that students produce along the chronology of their learning. She believes that assessment needs to be humanized, as opposed to standardized, to take into account the demographics of institutions, as students do not all start at the same place in their learning. Students also need the tools to assess their own progress. In addition to updating and expanding the contents of her first edition to reflect changes in assessment practices and developments over the last seven years, such as the development of technology-enabled assessment methods and the national need for institutions to demonstrate that they are using results to improve student learning, Maki focuses on ways to deepen program and institution-level assessment within the context of collective inquiry about student learning. Recognizing that assessment is not initially a linear start-up process or even necessarily sequential, and recognizing that institutions develop processes appropriate for their mission and culture, this book does not take a prescriptive or formulaic approach to building this commitment. What it does present is a framework, with examples of processes and strategies, to assist faculty, staff, administrators, and campus leaders to develop a sustainable and shared core institutional process that deepens inquiry into what and how students learn to identify and improve patterns of weakness that inhibit learning. This book is designed to assist colleges and universities build a sustainable commitment to assessing student learning at both the institution and program levels. It provides the tools for collective inquiry among faculty, staff, administrators and students to develop evidence of students' abilities to integrate, apply and transfer learning, as well as to construct their own meaning. Each chapter also concludes with (1) an Additional Resources section that includes references to meta-sites with further resources, so users can pursue particular issues in greater depth and detail and (2) worksheets, guides, and exercises designed to build collaborative ownership of assessment. The second edition now covers:

- \* Strategies to connect students to an institution's or a program's assessment commitment
- \* Description of the components of a comprehensive institutional commitment that engages the institution, educators, and students--all as learners
- \* Expanded coverage of direct and indirect assessment methods, including technology-enabled methods that engage students in the process
- \* New case studies and campus examples covering undergraduate, graduate education, and the co-curriculum
- \* New chapter with case studies that presents a framework for a backward designed problem-based assessment process, anchored in answering open-ended research or study questions that lead to improving pedagogy and educational practices
- \* Integration of developments across professional, scholarly, and accrediting bodies, and disciplinary organizations
- \* Descriptions and illustrations of assessment management systems
- \* Additional examples, exercises, guides and worksheets that align with new content

**Coming to Terms with Student Outcomes Assessment** Peggy L. Maki,2023-07-03  
"Assessment on college campuses has a sordid history, and it is fairly simple to find someone with a traumatic tale to tell. It is wise to respect that that reputation is deserved." "How do you modify the inner workings and culture of a massive institution with minimal resources and even less authority (other than GE course approvals), and thousands and thousands of talented people busy doing other things?" "The road to departmental assessment can seem both dramatic and apocalyptic, especially if one's departmental 'centre cannot hold,' and purpose falls apart. The Department of English and Linguistics is presently on this journey, slouching towards its own revelations of mission and fulfillment of purpose." "I have become more optimistic about the potential value of the process, even if some of my initial skepticism remains. This skepticism, however, has been valuable, forcing me to think in more concrete ways about what I do in the classroom." As these excerpts show, this is no conventional book about assessment. It presents the unvarnished first-person accounts of fourteen faculty and administrators about how they grappled, and engaged, with assessment and how - despite misgivings and an often-contentious process - they were able to gain the collaboration of their peers as the benefits for student learning became evident. This is a book for skeptical faculty, for those who have been tasked to spearhead their institution's call to create a culture of assessment; and, on campuses where assessment has been widely accepted and implemented, for those who now need to ensure this commitment will endure. For all these audiences, this book offers valuable advice, strategies, models and ideas.

Formative Assessment in Practice Margaret Heritage,2013 Margaret Heritage presents a practical guide to formative assessment as a process of inquiry and action essential to twenty-first century learning. In the wake of the development of the Common Core standards and the effort to develop the appropriate assessments to accompany them, formative assessment has attracted increasing attention from policy makers and practitioners alike. Yet this powerful and promising approach is often applied in ways that fail to capture its potential for improving student learning. In her book, Margaret Heritage presents a practical guide to formative assessment as a process of inquiry and action essential to twenty-first century learning. Heritage's approach is distinctive in

that it is grounded in a children's rights framework--that is, the belief that assessment should be in the best interest of all students, that students should be involved in the decisions that ensue from assessment use, and that opportunities to learn, progress, and succeed will be available to all children equally. Accordingly, she addresses the students' own role in learning about themselves as learners and examines the classroom as a community of practice. The book also includes chapters on learning progressions and the policy contexts that support formative assessment. Skillfully interweaving theory and practice, this book promises to be an invaluable resource for teachers, teacher educators, and those interested in the academic and policy aspects of assessment.

Assessment Center Perspectives for Talent Management Strategies George C. Thornton III, Deborah E. Rupp, Brian J. Hoffman, 2014-11-27 Written by three leading scholars with vast experience in the science and practice of assessment centers (ACs), this is the first volume to comprehensively integrate variations of the assessment center method with alternative talent management strategies. A useful reference guide, it examines the many ways in which organizations can apply the assessment center method to achieve their talent management goals. It provides balanced and in-depth coverage of theory, research, and practice pertaining to the dimension-, task-, and multifaceted-perspectives on the AC method. Ideal for researchers, practitioners, and students alike, and well suited for courses in testing and measurement, personnel selection, HR planning and staffing, training and development, and organizational change, Assessment Center Perspectives for Talent Management Strategies is a complete and up-to-date account of the assessment center method.

Fagan, 2015-01-21 Make formative assessment work for you—and your math students! Finally, formative assessment that adds up! Bringing Math Students Into the Formative Assessment Equation is the ultimate resource for helping teachers implement formative assessment in the middle school mathematics classroom. And it's much more than that. With this research-based, teacher-tested guide, you won't just learn effective teaching strategies—you'll turn your students into self-regulated learners. They'll monitor and assess their own progress—and communicate to you about it! Features include: A clear and manageable six-aspect instructional model Detailed strategies for helping students own their successes Real-life examples from middle school mathematics teachers Useful resources and a companion website to help you implement formative assessment in your classroom Formative assessment isn't just for teachers anymore. With the help of this essential resource, you'll work together with your students toward a common goal of math success. This book is outstanding. I would recommend it to any math educator. The depth of research integrated into practice is extensive and, as a result, it is the most practical book I have come across related to formative assessment and mathematics. The self-regulation aspects, as well as the ownership and involvement emphasized in the book, went beyond the traditional cognitive strategies endorsed in most books. Marc Simmons, Principal Ilwaco Middle School, Ocean Beach School District, Long Beach, WA The ideas in this book are brought to life with examples of teachers and students in the classroom. The teacher voices, comments, and quotes lend credibility and are a big component of the book's strengths as well as the visuals and graphics. *A Preparation Guide for the Assessment Center Method* Tina Lewis Rowe, 2006 This book presents the concepts and describes the methods that have helped law enforcement officers at all ranks successfully prepare for participation in law enforcement assessment centers at the local, county, State, and Federal levels. An assessment center is a process that uses many techniques and assessors in deciding whether a participant shows the skills and knowledge to perform well in specific law enforcement positions. One chapter explains what to expect in the assessment center experience, as it describes assessment center guidelines and methods. A chapter on planning for preparation and performance suggests how to structure study time, the physical and psychological preparation required, the use of advisors and mentors, preparation resources, rehearsals, and

exercises. A chapter on center assessors, rating methods, and rating forms explains how assessment-center decisions and scores are derived and what they mean. Another chapter identifies and discusses the various skills and knowledge that are assessed at a center, including communication, counseling, delegation, discipline, interpersonal sensitivity, job knowledge, motivation, planning and coordination, leadership, management, and problem-solving and decision making. The concluding chapter suggests how to demonstrate knowledge, skill, and attitude in the various center exercises.

*Treatment for Posttraumatic Stress Disorder in Military and Veteran Populations* Institute of Medicine, Board on the Health of Select Populations, Committee on the Assessment of Ongoing Efforts in the Treatment of Posttraumatic Stress Disorder, 2014-06-17 Posttraumatic stress disorder (PTSD) is one of the signature injuries of the U.S. conflicts in Afghanistan and Iraq, but it affects veterans of all eras. It is estimated that 7-20% of service members and veterans who served in Operation Enduring Freedom and Operation Iraqi Freedom may have the disorder. PTSD is characterized by a combination of mental health symptoms - re-experiencing of a traumatic event, avoidance of trauma-associated stimuli, adverse alterations in thoughts and mood, and hyperarousal - that last at least 1 month and impair functioning. PTSD can be lifelong and pervade all aspects of a service member's or veteran's life, including mental and physical health, family and social relationships, and employment. It is often concurrent with other health problems, such as depression, traumatic brain injury, chronic pain, substance abuse disorder, and intimate partner violence. The Department of Defense (DoD) and the Department of Veterans Affairs (VA) provide a spectrum of programs and services to screen for, diagnose, treat for, and rehabilitate service members and veterans who have or are at risk for PTSD. The 2010 National Defense Authorization Act asked the Institute of Medicine to assess those PTSD programs and services in two phases. The Phase 1 study, Treatment for Posttraumatic Stress Disorder in Military and Veteran Populations: Initial Assessment, focused on data gathering. Treatment for Posttraumatic Stress Disorder in Military and Veteran Populations Final Assessment is the report of the second phase of the study. This report analyzes the data received in Phase 1 specifically to determine the rates of success for each program or method. Treatment for Posttraumatic Stress Disorder in Military and Veteran Populations Final Assessment considers what a successful PTSD management system is and whether and how such a system is being implemented by DoD and VA. This includes an assessment of what care is given and to whom, how effectiveness is measured, what types of mental health care providers are available, what influences whether a service member or veteran seeks care, and what are the costs associated with that care. This report focuses on the opportunities and challenges that DoD and VA face in developing, implementing, and evaluating services and programs in the context of achieving a high-performing system to care for service members and veterans who have PTSD. The report also identifies where gaps or new emphases might be addressed to improve prevention of, screening for, diagnosis of, and treatment and rehabilitation for the disorder. The findings and recommendations of Treatment for Posttraumatic Stress Disorder in Military and Veteran Populations: Final Assessment will encourage DoD and VA to increase their efforts in moving toward a high-performing, comprehensive, integrated PTSD management strategy that addresses the needs of current and future service members, veterans, and their families.
