2 Hellenistic Astrology Chris Brennan, 2017-02-10 Hellenistic astrology is a tradition of horoscopic astrology that was practiced in the Mediterranean region from approximately the first century BCE until the seventh century CE. It is the source of many of the modern traditions of astrology that still flourish around the world today, although it is only recently that many of the surviving texts of this tradition have become available again for astrologers to study. Hellenistic Astrology: The Study of Fate and Fortune is one of the first comprehensive surveys of this tradition in modern times. The book covers the history, philosophy, and techniques of ancient astrology, with a special focus on demonstrating how many of the fundamental concepts underlying the practice of western astrology originated during the Hellenistic period.

2 Caring for our future Great Britain: Department of Health, 2012-07-11 Care and support affects a large number of people: eight out of 10 people aged 65 will need some care and support in their later years; some people have impairments from birth or develop them during their working life; some 5 million people care for a friend or relative, some for more than 50 hours a week. The current system does not offer enough support until a crisis point is reached, the quality of care is variable and inconsistent, and the growing and ageing population is only going to increase the pressure. Consequently, two core principles lie at the heart of this White Paper. The first is that individuals, communities and government should do everything possible to prevent, postpone and minimise people’s need for formal care and support. The system should be built around the promotion of people’s independence and well-being. The second principle is that people should be in control of their own care and support, with personal budgets and direct payments, backed by clear, comparable information and advice that will allow individuals and their carers to make the choices that are right for them. This paper sets out the principles and approach, with sections covering: strengthening support within communities; housing; better information and advice; assessment, eligibility and portability for people who use care services; carers’ support; defining high-quality care; improving quality; keeping people safe; a better local care market; workforce; personalised care and support; integration and joined-up care.

2 Investing in Resilience Asian Development Bank, 2013-01-01 Investing in Resilience: Ensuring a Disaster-Resistant Future focuses on the steps required to ensure that investment in disaster resilience happens and that it occurs as an integral, systematic part of development. At-risk communities in Asia and the Pacific can apply a wide range of policy, capacity, and investment instruments and mechanisms to ensure that disaster risk is properly assessed, disaster risk is reduced, and residual risk is well managed. Yet, real progress in strengthening resilience has been slow to date and natural hazards continue to cause significant loss of life, damage, and disruption in the region, undermining inclusive, sustainable development. Investing in Resilience offers an approach and ideas for reflection on how to achieve disaster resilience. It does not prescribe specific courses of action but rather establishes a vision of a resilient future. It stresses the interconnectedness and complementarity of possible actions to achieve disaster resilience across a wide range of development policies, plans, legislation, sectors, and themes. The vision shows how resilience can be accomplished through the coordinated action of governments and their development partners in the private sector, civil society, and the international community. The vision encourages “investors” to identify and prioritize bundles of actions that collectively can realize that vision of resilience, breaking away from the current tendency to pursue disparate and fragmented disaster risk management measures that frequently trip and fall at unforeseen hurdles. Investing in Resilience aims to move the disaster risk reduction debate beyond rhetoric and to help channel commitments into investment, incentives, funding, and practical action
