**The Institutional Topology of International Regime Complexes** Benjamin Daßler, 2023-09-12 The implicit topology of international institutional complexes varies greatly across policy areas. In some areas, the lion's share of everyday policy cooperation is shaped by a single institution with alternative and more regional institutions operating in its shadow. In other policy fields, institutional structures appear to be different, seeing a range of non-hierarchical, decentralized, alternative institutions. **The Institutional Topology of International Regime Complexes: Mapping Inter-Institutional Structures in Global Governance** provides a systematic conceptualization and explanation of the evolution of these varying institutional topologies underlying regime complexes across five issue areas of Global Governance: Intellectual Property Protection, Tax Avoidance, Financial Stability, Development Aid, and Energy Governance. By providing an empirically grounded, network-based conceptualization and mapping of institutional topologies, as well as a theoretical explanation for their variation across policy space and time, the book offers a comprehensive analysis of both the empirical manifestation of inter-institutional structures across various policy fields of Global Governance and the issue specific factors that shape the varying institutional trajectories spurring (de-) centralization. Daßler combines quantitative network analyses with qualitative case studies to

trace institutional decentralization processes across five highly relevant issue areas of Global Governance. This volume shows how the nature of issue-specific cooperation problems translates into disparate structures among multilateral institutions occupying the same regime complex. In light of growing concerns about the future trajectories of Global Governance in times of heightened geopolitical tensions, Daßler offers a fresh perspective to comparatively capture the profoundly varying institutional landscapes across different issue areas and their associated challenges and benefits of multilateral cooperation. Transformations in Governance is a major academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, and environmental and urban studies concerned with the dispersion of authority from central states to supranational institutions, subnational governments, and public-private networks. It brings together work that advances our understanding of the organization, causes, and consequences of multilevel and complex governance. The series is selective, containing annually a small number of books of exceptionally high quality by leading and emerging scholars. The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina, Chapel Hill, and Walter Mattli of the University of Oxford.

**STEM Integration in K-12 Education** National Research Council, National Academy of Engineering, Committee on Integrated STEM

Education, 2014-02-28 *STEM Integration in K-12 Education* examines current efforts to connect the STEM disciplines in K-12 education. This report identifies and characterizes existing approaches to integrated STEM education, both in formal and after- and out-of-school settings. The report reviews the evidence for the impact of integrated approaches on various student outcomes, and it proposes a set of priority research questions to advance the understanding of integrated STEM education. *STEM Integration in K-12 Education* proposes a framework to provide a common perspective and vocabulary for researchers, practitioners, and others to identify, discuss, and investigate specific integrated STEM initiatives within the K-12 education system of the United States. *STEM Integration in K-12 Education* makes recommendations for designers of integrated STEM experiences, assessment developers, and researchers to design and document effective integrated STEM education. This report will help to further their work and improve the chances that some forms of integrated STEM education will make a positive difference in student learning and interest and other valued outcomes.

*Battling the Student Engagement Front* Justin A. Collins, 2014-06-04 This book sought to explore whether school funding practices satisfy the equity and adequacy standards delineated by policymakers and judges, and demanded by the broader public. A funding formula myopia, the book argues, has left student engagement largely overlooked. It comes as no surprise, therefore,

that vast funding enhancements have introduced disappointing outcomes results. The book argues the front of the classroom must become and remain the epicenter of reform activity: and that transforming instructional and engagement behaviors are effort-intensive endeavors that very little in pecuniary terms.

*Empowered Educators in Australia* Dion Burns, Ann McIntyre, 2017-02-22 BEST PRACTICES FROM

AUSTRALIA'S HIGH-PERFORMING SCHOOL SYSTEMS

*Empowered Educators in Australia* is one volume in a series that explores how high-performing educational systems from around the world achieve strong results. The anchor book, *Empowered Educators: How High-Performing Systems Shape Teaching Quality Around the World*, is written by Linda Darling-Hammond and colleagues, with contributions from the authors of this volume. The authors of *Empowered Educators in Australia* take an in-depth look at the policies and practices surrounding teaching quality in two different states: New South Wales (NSW) and Victoria. NSW offers significant support for government schools in areas such as staffing and teacher professional development. Victoria operates a highly devolved school system. Each provides a contrasting view of how federal and state policies combine to shape learning outcomes for students in Australia. The interplay between state and federal policy characterizes an intriguing centralizing decentralization. Initiatives to create national curricular, teaching, and teacher education standards all sit in balanced tension with a movement towards greater devolution of authority

to schools. Together the NSW and Victoria case studies provide insights into policies that can support high-quality teaching in a federal education system. Australia's current educational reforms place increasing emphasis on issues of teaching quality, reshaping teaching as a standards-based, evidence-informed profession, and one that seeks to foster collegiality and professional exchange. These reforms encompass many aspects of a system that supports teaching quality, and highlight: the way teachers are trained, how they are inducted into the teaching profession and supported with mentors, the professional learning they receive, how they are appraised on their work, and the career pathways for teachers.

Technology Enhanced Innovative Assessment Hong Jiao, Robert W. Lissitz, 2017-11-01 Assessment innovation tied to technology is greatly needed in a wide variety of assessment applications. This book adopts an interdisciplinary perspective to learn from advances in developing technology enhanced innovative assessments from multiple fields. The book chapters address the development of virtual assessments including game-based assessment, simulation-based assessment, and narrative based assessment as well as how simulation and game based assessments serve both formative and summative purposes. Further, chapters address the critical challenge of integrating assessment directly into the learning process so that teacher effectiveness and student learning can be enhanced. Two chapters specifically address the psychometric challenges

related to innovative items. One chapter talks about evaluating the psychometric properties of innovative items while the other chapter presents a new psychometric model for calibrating innovative items embedded in multiple contexts. In addition, validity issues are addressed related to technology enhanced innovative assessment. It is hoped that the book provides readers with rich and useful information about the development of several types of virtual assessments from multiple perspectives. The authors include experts from industry where innovative items have been used for many years and experts from research institutes and universities who have done pioneering work related to developing innovative items with formative applications to facilitate learning. In addition, expert advice has been provided on validating such work.

*Biomedical Visualisation* Paul M. Rea, 2020-01-01  
This edited volume explores the use of technology to enable us to visualise the life sciences in a more meaningful and engaging way. It will enable those interested in visualisation techniques to gain a better understanding of the applications that can be used in visualisation, imaging and analysis, education, engagement and training. The reader will be able to explore the utilisation of technologies from a number of fields to enable an engaging and meaningful visual representation of the biomedical sciences, with a focus in this volume related to anatomy, and clinically applied scenarios. The first four chapters highlight the diverse uses of CT and MRI scanning. These chapters demonstrate the uses of modern scanning

techniques currently in use both clinically and in research and include vascular modelling, uses of the stereoscopic model, MRI in neurovascular and neurodegenerative diseases, and how they can also be used in a forensic setting in identification. The remaining six chapters truly demonstrate the diversity technology has in education, training and patient engagement. Multimodal technologies are discussed and include art and history collections, photogrammetry and games engines, augmented reality and review of the current literature for patient rehabilitation and education of the health professions. These chapters really do provide “something for everyone” whether you are a student, faculty member, or part of our curious global population interested in technology and healthcare.

*Innovative Solutions in Fluid-Particle Systems and Renewable Energy Management* Tannous, Katia, 2015-07-01 The threat of natural resource depletion due to high energy demands has become a key concern in both the developed and developing worlds. To alleviate these concerns, researchers around the world are exploring sustainable methods for generating energy. *Innovative Solutions in Fluid-Particle Systems and Renewable Energy Management* presents phenomenological, experimental, and theoretical research, as well as market criteria and business models concerning the development of small- and large-scale chemical and energy plants. Associating academic and industrial experiences, this book highlights current topics in sustainable energy management and development with an emphasis on obtaining liquid, gaseous, and

solid fuels using residues and energetic biomasses. Academicians, researchers, and technology developers will find this book useful in furthering their own knowledge and research in this field. A pivotal publication in the field of engineering, this title covers a range of topics including, among others, cellulosic feedstock, agricultural biomass, fluid dynamics, gasification processes, energy extraction from raw materials, and environmental sustainability.

*Myanmar's Political Transition and Lost Opportunities (2010–2016)* Ye Htut, 2019-09-17 This book is about the politics of Myanmar under the reformist president Thein Sein. After taking office in March 2011, Thein Sein initiated the bloodless Myanmar Spring. He was able to transform Myanmar into a more transparent and dynamic society, bring Aung San Suu Kyi and other opposition activists into the political process, initiate a peace process with the ethnic armed organizations, reintegrate Myanmar into the international community after five decades of isolation, and, most importantly, for the first time since the country regained independence in 1948, he was able to enact the peaceful transfer of power from one elected government to another. But Thein Sein also lost opportunities to deliver what the people anticipated, and he failed to bring his USDP party to victory in the 2015 election. This book is not about the successes of the Thein Sein administration. Rather, it examines the reasons behind the lost opportunities in the transition to democracy. It draws on the author's experiences as a member of Thein Sein's cabinet as

well as on extensive interviews with other cabinet members and politicians involved in the crucial events that took place between 2010 and 2016. The book is a must-read for anyone interested in this critical period of change for Myanmar.

Community Engagement Program Implementation and Teacher Preparation for 21st Century Education  
Crosby, Cathryn, Brockmeier, Frederick, 2016-08-26  
Education in the 21st century has been tasked with preparing students to begin the journey towards a place in their communities in which they feel fulfilled and autonomous. Service learning is one way to introduce students to careers and knowledge that will prepare them for a successful life. Community Engagement Program Implementation and Teacher Preparation for 21st Century Education examines the many ways in which community engagement is carried out in all educational settings, from K-12 to higher education. This publication is unique in its mission to examine these topics from a holistic perspective. From online education to volunteer organizations, this book gives educators, administrators, community volunteers, and students a window into the successful deployment of such programs to prepare students for a global society.

Yearbook of the United Nations 2014 United

Nations,2019-10-28 With its comprehensive coverage of political and security matters, human rights issues, economic and social questions, legal issues, and administrative and budgetary matters, the Yearbook of the United Nations stands as the authoritative reference work on the annual activities and concerns of the Organization. Fully indexed, the Yearbook includes all major General Assembly, Security Council and Economic and Social Council resolutions and decisions, uniquely placing them in a narrative context of United Nations consideration, deliberation and action. This sixty-eighth volume presents the work of the United Nations in dealing with recurring conflicts with severe humanitarian consequences including in the Syrian Arab Republic, where more than 12 million people were in need of basic food, clothing and shelter. The volume also highlights the Organization's rapid response to an escalatory global health emergency—the Ebola virus disease outbreak across West Africa. It documents the Organization's coordination of policy discussions to finalize a global sustainable development agenda, with the security of future generations as the core concern; and its efforts to rebuild societies emerging from conflict while keeping the fragile peace in other places. It further details the entry into force of the landmark Arms Trade Treaty, the missile downing of a passenger airliner in the midst of a geopolitical crisis in eastern Ukraine, and securing international human rights and humanitarian law and prosecuting abusers.

Beyond \$15 Jonathan Rosenblum,2017-02-07 The

inside story of the first successful \$15 minimum wage campaign that renewed a national labor movement With captivating narrative and insightful commentary, labor organizer Jonathan Rosenblum reveals the inside story of the first successful fight for a \$15 minimum wage, which renewed a national labor movement through bold strategy and broad inclusiveness. Just outside Seattle, an unlikely alliance of Sea-Tac Airport workers, union and community activists, and clergy staged face-to-face confrontations with corporate leaders to unite a diverse, largely immigrant workforce in a struggle over power between airport workers and business and political elites. Digging deep into the root causes of poverty wages, Rosenblum gives a blunt assessment of the daunting problems facing unions today. Beyond \$15 provides an inspirational blueprint for a powerful, all-inclusive labor movement and is a call for workers to reclaim their power in the new economy.
