Settlements of Trade Disputes between China and Latin American Countries Dan Wei,2015-07-06 Presenting a wealth of highly original and innovative analyses and case studies, this book examines the strategic ties between various emerging economies, their different approaches to finding mutual trade solutions, and new trends in the use of contingent protection. The research methodology can also be applied to the study of specific Latin American countries or other developed or developing states in comparison to China. The book presents new theories and offers a valuable template for further studies in this area. Further, the application of the New Haven approach can further develop the studies' potential to offer guidance in a broader context.

Meeting Facilitation Berit Lakey,1982

Externalizing Migration Management Ruben Zaiotti,2016-02-05 The extension of border controls beyond a country's territory to regulate the flows of migrants before they arrive has become a popular and highly controversial policy practice. Today, remote control policies are more visible, complex and widespread than ever before, raising various ethical, political and legal issues for the governments promoting them. The book examines the externalization of migration control from an interdisciplinary and comparative perspective, focusing on 'remote control' initiatives in Europe and North America, with contributions from the fields of politics, sociology, law, geography, anthropology, and history. This book uses empirically rich analyses and compelling theoretical insights to trace the evolution of 'remote control' initiatives and assesses their impact and policy implications. It also explores competing theoretical models that might explain their emergence and diffusion. Individual chapters tackle some of the most puzzling questions underlying remote control policies, such as the reasons why governments adopt these policies and what might be their impact on migrants and other actors involved.

Our North America Professor Julián Castro-Rea,2013-04-28 What we call North America today is a human space that has been constructed over the centuries, perceived from time immemorial by its original inhabitants as a unified whole, and named Turtle Island. What is North America today? Is it more than the sum of its parts? Does it qualify as a distinct global region? Is it just a market or also something else? This book explores several neglected aspects of the key relationships between Canada, Mexico and the United States. Studies of societal relations in North America have typically been limited to trade, investment and intergovernmental relations. In contrast, the authors in this book address other vital issues which bind this global region together, including Indigenous peoples, security, migration, civil societies, democracy, identities and culture. Via a thorough examination of these issues, the historical, sociological, economic, and political aspects of regional linkages are highlighted. Rather than dealing with each country in isolation, each chapter in this collection considers North America as a single unit of analysis, therefore systematically addressing the regional dynamic as a whole, and engaging the country-specific differences in a truly comparative way. By providing the analytical tools needed, this important book makes sense of the different aspects of the complex societies of contemporary North America.

Knowledge Transfer To and Within Tourism Noel Scott,Mathilda van Niekerk,Marcella de Martino,2017-07-20 This volume presents and analyses 17 examples of knowledge transfer from countries around the world to identify future directions for business and government managers and academic researchers. Effective Knowledge transfer provides an opportunity to address unprecedented societal, environmental and technological change and disruption.

Religion and Inequality in Africa Ezra Chitando,Loreen Maseno,Joram Tarusarira,2023-01-12 This volume reveals how religion interfaces with inequality in different African contexts. Some contributors undertake detailed analyses of how religion creates (and justifies) different forms of inequality that holds back individuals, groups and communities across the continent from flourishing, while others show how religion can also mitigate inequality in Africa. Topics addressed include gender inequality, economic inequality, disability, ageism and religious homophobia. Specifically focusing on the United Nation's Sustainable Development Goal 10 to reduce inequality within and among countries, this book highlights the extent to which Africa's 'notoriously religious' identity needs to be taken into account in discourses on development.

Malcolm X A. B. Assensoh,Yvette M. Alex-Assensoh,2013-12-12 This fresh biography unearths previously unpublished nuances about Malcolm X's life. Malcolm X: A Biography is a historical and political analysis of the black leader's life and times, offering a detailed treatment of its subject's multifaceted story. Laid out chronologically, the book treats Malcolm's life from his birth through his childhood, adult life, work as a Civil Rights activist, and assassination. Readers will learn about the torching of Malcolm's family's Lansing, MI, home when he was a young child and about the death of his father a few years later—both acts attributed to a white supremacist organization. They will learn of his participation in narcotics, prostitution, and gambling rings and of his arrest and prison term. And they will learn about his discovery of the teachings of Nation of Islam leader Elijah Muhammad, his conversion to the Muslim faith, his break with NOI, and his eventual espousal of faith in integration. Finally, the book looks at Malcolm's assassination and at his legacy and importance today.

Mega Events in Post-Soviet Eurasia Andrey Makarychev,Alexandra Yatsyk,2016-06-29 The edited volume explains why sport mega events can be discussed from the viewpoint of politics and power, and what this discussion can add to the existing scholarship on political regimes, international norms, national identities, and cultural narratives. The book collects case studies written by insiders from different countries of post-Soviet Eurasia that have recently hosted— or intend to host in the future —sporting events of a global scale. Contributing authors discuss cultural, political, and economic strategies of host governments, examining them from the vantage point of an increasing shift of the global sport industry to non-Western countries. Mega-events often draw domestic lines of cultural and social exclusion within host's polities. It is these ruptures and gaps this volume explores, contributing to a better understanding of the intricate interconnections between global institutions and national identities.

A Power in the World Lorenz Gonschor,2019-06-30 Few people today know that in the nineteenth century, Hawai‘i was not only an internationally recognized independent nation but played a crucial role in the entire Pacific region and left an important legacy throughout Oceania. As the first non-Western state to gain full recognition as a coequal of the Western powers, yet at the same time grounded in indigenous tradition and identity, the Hawaiian Kingdom occupied a unique position in the late nineteenth-century world order. From this position, Hawai‘i’s leaders were able to promote the building of independent states based on their country’s model throughout the Pacific, envisioning the region to become politically unified. Such a pan-Oceanian polity would be able to withstand foreign colonialism and become, in the words of one of the idea’s pioneers, “a Power in the World.” After being developed over three decades among both native and non-native intellectuals close to the Hawaiian court, King Kalākaua’s government started implementing this vision in 1887 by concluding a treaty of confederation with Sāmoa, a first step toward a larger Hawaiian-led pan-Oceanian federation. Political unrest and Western imperialist interference in both Hawai‘i and Sāmoa prevented the project from advancing further at the time, and a long interlude of colonialism and occupation has obscured its legacy for over a century. Nonetheless it remains an inspiring historical precedent for movements toward greater political and economic integration in the Pacific Islands region today. Lorenz Gonschor examines two intertwined historical processes: The development of a Hawai‘i-based pan-Oceanian policy and underlying ideology, which in turn provided the rationale for the second process, the spread of the Hawaiian Kingdom’s constitutional model to other Pacific archipelagos. He argues that the legacy of this visionary policy is today re-emerging in the form of two interconnected movements—namely a growing movement in Hawai‘i to reclaim its legacy as Oceania’s historically leading nation-state on one hand, and an increasingly assertive Oceanian regionalism emanating mainly from Fiji and other postcolonial states in the Southwestern Pacific on the other. As a historical reference for both, nineteenth-century Hawaiian policy serves as an inspiration and guideline for envisioning de-colonial futures for the Pacific region.
