CAA2014: 21st Century Archaeology F. Giligny, F. Djindjian, L. Costa, 2015-03-31 This volume brings together a selection of papers proposed for the Proceedings of the 42nd Computer Applications and Quantitative Methods in Archaeology conference (CAA), hosted at Paris 1 Pantheon-Sorbonne University from 22nd to 25th April 2014.

Global Learning in the 21st Century Tassos Barkatsas, Adam Bertram, 2016-10-26 In this 21st century, technological and social changes have never been as rapid as before, and educative practices must evolve and innovate to keep up. What is being done by educators today to prepare future global citizens? What are the skills and competencies that will be required by our students? What changes in how we approach education might need to be made? This book presents a modern focus on some significant issues in teaching, learning, and research that are valuable in preparing students for the 21st century. The book discusses these issues in four sections. The first section presents contemporary, innovative curriculum and pedagogical practices that are relevant for the 21st century. This also includes how social networking has an integrated role within current educative practice. The next section then explores issues and current research around motivation and engagement, and how these are changing in this era of technological and social change. The third section presents debates around inclusion and social contexts, both global and local. Finally, the fourth section explores current discourses in regard to internationalisation and globalisation and how these are being considered in educational research. The book is an important representation of some of the work currently being done for these rapidly changing times. It will appeal to academics, researchers, teacher educators, educational administrators, teachers and anyone interested in preparing students for a modern and globally interconnected world.

Peace Issues in the 21st Century Global Context John Duncan, Shreesh Juyal, 2017-08-21 Since the two Hague (Netherlands) multilateral peace conferences of 1899 and 1907, the fundamental issue of world peace and its long-term realization has engaged scholars, diplomats, statesmen, and students of international relations. This book presents a new endeavor in this direction through a collection of papers selected from the recent conferences of the Canadian Peace Research Association and independent scholars. Descriptive, analytical, constructive and balanced ideas and solutions in this text represent alternatives for the global community to be collectively secure and peaceful. This volume examines world peace in its foundational, descriptive, conceptual, and prescriptive aspects, and as a social and human concept in positive and negative contexts, including: the nonviolent perspective of peace; women theorists on peace and war; empowerment of women as peacemakers; and, peace research and education under siege. On violence and war, the topics included are the theory of violence, the new faces of war, including military robots, electromagnetic and information weapons, the cyber warfare and the militarization of neuroscience. In the area of case studies, Iran and nuclear deterrence, the Baha'i faith and Iran; the Western Sahara, Sudan and South Sudan, and the challenges of a Palestinian Nation are analysed. In addition, there is focus on the need to establish a Department of Peace in Canada and an attempt to seek establishment of world peace through direct democracy. This book will advance an understanding of the historic struggle and failures, as well as the accomplishments and shortcomings for peaceful change and a just world order. It will be of direct interest to students of political science, diplomacy, history, social science, international law, human rights, and other cognate disciplines.

Innovative Healthcare Systems for the 21st Century Hassan Qudrat-Ullah, Peter Tsasis, 2017-05-11 This book presents the latest in decision-making tools, techniques, and solutions

for policy makers to utilize in overcoming the challenges faced by healthcare systems. With contributions from experts world-wide, an array of healthcare management models, techniques, and integrative solutions are presented, drawing on econometric, system dynamics, and agent-based models as well as state-of-the-art empirical studies. As total healthcare spending (both total expenditures on health as a percentage of GDP and average spending on per capita) increases across most of the world's economies, healthcare systems continue to face challenges in terms of cost, quality, and access, as a result of its fragmented nature. Consequently, healthcare managers and policy makers require innovative integrative approaches and solutions to better manage complex, dynamic healthcare systems. This volume offers researchers and policy makers an insightful and critical review of the state of the art in healthcare modeling, with a particular focus on system dynamics, agent-based models, and modern empirical studies. It will be of interest to those in the fields of health, business management, and information systems.

The American Cancer Society's Principles of Oncology The American Cancer Society, 2018-03-20
Developed by the American Cancer Society this new textbook designed for a wide range of learners and practitioners is a comprehensive reference covering the diagnosis of cancer, and a range of related issues that are key to a multidisciplinary approach to cancer and critical to cancer control and may be used in conjunction with the book, *The American Cancer Society's Oncology in Practice: Clinical Management*. Edited by leading clinicians in the field and a stellar contributor list from the US

and Europe, this book is written in an easy to understand style by multidisciplinary teams of medical oncologists, radiation oncologists and other specialists, reflecting day-to-day decision-making and clinical practice. Input from pathologists, surgeons, radiologists, and other specialists is included wherever relevant and comprehensive treatment guidelines are provided by expert contributors where there is no standard recognized treatment. This book is an ideal resource for anyone seeking a deeper understanding of cancer prevention, screening, and follow-up, which are central to the ACS's worldwide mission on cancer control.

Handbook of Research on Technology Tools for Real-World Skill Development Rosen, Yigal, 2015-10-19 Education is expanding to include a stronger focus on the practical application of classroom lessons in an effort to prepare the next generation of scholars for a changing world economy centered on collaborative and problem-solving skills for the digital age. The Handbook of

Research on Technology Tools for Real-World Skill Development presents comprehensive research and discussions on the importance of practical education focused on digital literacy and the problem-solving skills necessary in everyday life. Featuring timely, research-based chapters exploring the broad scope of digital and computer-based learning strategies including, but not limited to, enhanced classroom experiences, assessment programs, and problem-solving training, this publication is an essential reference source for academicians, researchers, professionals, and policymakers interested in the practical application of technology-based learning for next-generation education.

Robotics in Education Munir Merdan, Wilfried Lepuschitz, Gottfried Koppensteiner, Richard Balogh, David Obdržálek, 2021-07-31 This book comprises the latest achievements in research and development in educational robotics presented at the 12th International Conference on Robotics in Education (RiE), which was carried out as a purely virtual conference from April 28 to 30, 2021. Researchers and educators find valuable methodologies and tools for robotics in education that encourage learning in the fields of science, technology, engineering, arts, and mathematics (STEAM) through the design, creation, and programming of tangible artifacts for creating personally meaningful objects and addressing real-world societal needs. This also involves the introduction of technologies ranging from robotics platforms to programming environments and languages. Evaluation results prove the impact of robotics on the students' interests and competence development. The presented approaches cover the whole educative range from kindergarten, primary and secondary school, to the university level and beyond. Chapters "17 and 25" are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Harnessing Public Research for Innovation in the 21st Century Anthony Arundel, Suma Athreye, Sacha Wunsch-Vincent, 2021-03-04 A guide to maximizing the impact of work done at public

research institutions and universities to boost innovation and growth.

Repurposing the Green Belt in the 21st Century Peter Bishop, Alona Martinez Perez, Rob Roggema, Lesley Williams, 2020-11-09 The green belt has been one of the UK's most consistent and successful planning policies. Over the past century, it has limited urban sprawl and preserved the countryside around our cities, but is it still fit for purpose in a world of unprecedented urban growth and potentially catastrophic climate change? *Repurposing the Green Belt in the 21st Century* examines the history of the green belt in the UK and how it has influenced planning regimes in other countries. Despite its undoubted achievements, it is time to review the green belt as an instrument of urban planning and landscape design. The problem of the ecological impact of cities and the mitigation measures of major climate changes are at the top of the urban agenda across the world. Urban agriculture, blue and green infrastructures, and forestation are the new ecological design imperatives driving urban policymaking.

Paradigm Shifts in 21st Century Teaching and Learning Orakc?, ?enol, 2020-04-24 One of the most important transformations in the world today is the adaptation to education and teaching methods that must be made to enhance the learning experience for Millennial and Generation Z students. The system in which the student is passive and the teacher is active is no longer the most effective form of education. Additionally, with the increased availability to information, knowledge transfer is no longer done solely by the teacher. Educators need to become moderators in order to promote effective teaching practices. *Paradigm Shifts in 21st Century Teaching and Learning* is an essential scholarly publication that examines new approaches to learning and their application in the teaching-learning process. Featuring a wide range of topics such as game-based learning, curriculum design, and sustainability, this book is ideal for teachers, curriculum developers, instructional designers,

researchers, education professionals, administrators, academicians, educational policymakers, and students.

2014 International Conference on Social Science and Environment Protection (SSEP2014) ,2014-02-11 This conference promises to be both informative and stimulating with a wonderful program. Delegates will have a wide range of sessions to choose from and will have a difficult to choose which session to attend. The program consists of invited session, technical workshop and discussions covering a wide range of topics in social science including communication, culture, economics, education, finance, law, management, politics, psychology and society. This rich program provides all attendees with the opportunities to meet and interact with one another. We hope that your experience with SSEP2014 is a fruitful and long lasting one.

Microbial Versatility in Varied Environments Raghvendra Pratap Singh,Geetanjali Manchanda,Indresh Kumar Maurya,Yunlin Wei,2020-04-09 The book compiles the latest studies on microorganisms thriving in extreme conditions. Microbes have been found in extremely high and low temperatures, highly acidic to saline conditions, from deserts to the Dead sea, from hot-springs to underwater hydrothermal vents- the diversity is incredible. The various chapters highlight the microbial life and describe the mechanisms of tolerance to these harsh conditions, and show how an understanding of these phenomena can help us exploit the microbes in biotechnology. The theme of the book is highly significant since life in these environments can give vital clues about the origin and evolution of life on earth, as a lot of these conditions simulate the environment present billions of years ago. Additionally, the study of adaptation and survival of organisms in such environments can be important for finding life on other planets. This book shall be useful for students, researchers and course instructors interested in evolution, microbial adaptations and ecology in varied environments.

E-Systems for the 21st Century Seifedine Kadry, Abdelkhalak El Hami, 2019-07-10 E-based systems and computer networks are becoming standard practice across all sectors, including health, engineering, business, education, security, and citizen interaction with local and national government. With contributions from researchers and practitioners from around the world, this two-volume book discusses and reports on new and important developments in the field of e-systems, covering a wide range of current issues in the design, engineering, and adoption of e-systems.

Global Governance and the Emergence of Global Institutions for the 21st Century Augusto Lopez-Claros, Arthur L. Dahl, Maja Groff, 2020-01-23 Identifies the major weaknesses in the current United Nations system and proposes fundamental reforms to address each. This title is also available as Open Access.

Public Participation for 21st Century Democracy Tina Nabatchi, Matt Leighninger, 2015-05-26 A comprehensive text on the theory and practice of public participation Written by two leaders in the field, *Public Participation for 21st Century Democracy* explores the theory and practice of public participation in decision-making and problem-solving. It examines how public participation developed over time to include myriad thick, thin, and conventional opportunities, occurring in both face-to-face meetings and online settings. The book explores the use of participation in various arenas, including education, health, land use, and state and federal government. It offers a practical framework for thinking about how to engage citizens effectively, and clear explanations of participation scenarios, tactics, and designs. Finally, the book provides a sensible approach for reshaping our participation infrastructure to meet the needs of public officials and citizens. The book is filled with illustrative examples of innovative participatory activities, and numerous sources for more information. This important text puts the spotlight on the need for long-term, cross-sector, participation planning, and

provides guidance for leaders, citizens, activists, and others who are determined to improve the ways that participation and democracy function. *Public Participation for 21st Century Democracy*: Helps students and practitioners understand the history, theory, and practice of public participation. Contains a wealth of case studies that explore the application of public participation in different settings. Covers vital issues such as education, health, land use, and state and federal government. Has accompanying instructor resources, such as PowerPoint slides, discussion questions, sample assignments, case studies and research from www.participedia.net, and classroom activities.

The State of Food Security and Nutrition in the World 2019 Food and Agriculture Organization, 2019-07-15 *The State of Food Security and Nutrition in the World* gives updates on the prevalence of undernourishment globally and the absolute number of undernourished, as well as the latest estimates for a number of global nutrition targets. This latest edition looks at the role of economic slowdowns and downturns in the rise of hunger and makes policy recommendations to safeguard food security and nutrition worldwide.

Re-thinking Postcolonial Education in Sub-Saharan Africa in the 21st Century Edward Shizha, Ngoni Makuvaza, 2017-04-17 What have postcolonial Sub-Saharan African countries achieved in their education policies and programmes? How far have they contributed to successful attainment of the targeted 2015 Millennium Development Goals (MDGs) on education? What were the constraints and barriers for developing an education system that appeals to the needs of the sub-region? *Re-thinking Postcolonial Education in Sub-Saharan Africa in the 21st Century: Post-Millennium Development Goals* is an attempt to demonstrate that Sub-Saharan Africa has the potential and capability to provide solutions to challenges facing its desire and ability to provide sustainable education to its people. To that end, the contributors are academics with an African vision attempting to come up with African

home-grown perspectives to fill the gap created by the lapse of the MDGs as the guiding vision and framework for educational provision in Africa and beyond. The book seeks to articulate and address African issues from an informed as well as objective African perspective. The book is also intended to provide insights to scholars who are interested in studying and understanding the nature of postcolonial education in the Sub-Saharan African region. Given the objectives and themes of this book, it is intended for academic scholars, undergraduate and graduate students, human rights scholars, curriculum developers, college and university academics, teachers, education policy makers, international organisations, and local and international non-governmental organisations that are interested in African education policies and programmes. “Rethinking Postcolonial Education in Sub-Saharan Africa in the 21st Century provides contemporary reflections from multiple perspectives and re-positions the issue of education at the forefront of the debates on African development.” – Lamine Diallo, Associate Professor, Wilfrid Laurier University, Canada “The book is a welcome addition to discourses and analyses on education in sub-Saharan Africa with reference to a postcolonial critique and the Millennium Development Goals framework on education in Africa.” – Michael Tonderai Kariwo, PhD, Instructor and Research Fellow, University of Alberta, Canada
