Publicly Traded Partnerships Matthew W. Lay, Eric B. Sloan, Amy L. Sutton (Accountant), Tax Management Inc, Bloomberg BNA., ... analyzes in depth the U.S. federal income taxation of publicly traded partnerships and their partners--Portfolio description.

Real Estate Investment Trusts Su Han Chan, John Erickson, Ko Wang, 2003 This work provides the investing public, real estate practitioners, regulators and real estate and finance academics with up-to-date information on what modern scholarly research tells us about Real Estate Investment Trusts (REITs). REITs are credited to allow institutional and individual investors to invest in real estate via a corporate entity. The increasing interest in REITs as indicated by their growth in market capitalization and institutional holdings in the United States and around the world suggests that REITs are becoming an increasingly important part of investors' diversified portfolio.

The Rise of the Uncorporation Larry E. Ribstein, 2010 So far the analysis of business associations largely has been limited to corporations. Yet unincorporated firms, including general and limited partnerships and limited liability companies, comprise about a third of the firms in the United States, and even larger percentages elsewhere in the world. The Rise of the Uncorporation covers the history, law, and finance of unincorporated firms. --Book Jacket.

The New Finance Robert A. Haugen, 2012 A supplement for junior/senior and graduate level courses in Investments, Behavioral Finance Theory, and related courses. Teach the concepts that expose the inefficiency of capital markets. The New Finance is a comprehensive and organized collection of evidence and arguments that develop a persuasive case for an inefficient, complex and, at times, nearly chaotic stock market. This brief text also shows students how the complexity and uniqueness of investor interactions have important market pricing consequences. The fourth edition includes two new chapters on the real determinants of expected stock returns and the nature of stock volatility that the Financial Crisis of 2008 has exposed.

The Winning Investment Habits of Warren Buffett and George Soros Mark Tier, 2008 Warren Buffet and George Soros both started with nothing and made billion-dollar fortunes solely by investing. At first glance they seem to have nothing in common: Buffett buys bargain-priced stocks and businesses for cash; and Soros is renowned for his highly-leveraged, quick-footed bets in the currency markets. So what do they have in common? As Mark Tier demonstrates in The Winning Investment Habits of Warren Buffet and George Soros, they practice exactly the same mental habits and strategies when investing, and these tactics have since been used successfully by all other traders and investors that Tier has worked with - without exception. By sharing 23 key investment habits in this ground-breaking book, the author provides you with the rare opportunity to understand the logic behind them and make them your own.

The Frackers Gregory Zuckerman, 2013 Meet the Frackers. George Mitchell, the son of a Greek goatherder, who tried to extract gas from rock that experts deemed worthless. He faced an unexpected obstacle in his quest to change history. Aubrey McClendon, the charismatic descendant of an Oklahoma energy dynasty, who scored billions leading a land grab. He wasn't prepared for the shocking fallout of his discoveries. Tom Ward, who overcame a troubled childhood to become one of the nation's wealthiest men. He could handle natural-gas fields but had more trouble with a Wall Street power broker. Harold Hamm, the son of poor farmer, who believed America had more oil than anyone imagined. Hamm was determined to find the crude before others caught on. Charif Souki, the dashing Lebanese immigrant who saw his career crumble and his fortune disintegrate, leaving one last, unlikely chance for success. Mark Papa, the Enron castoff who panicked when he realized a resurgence of American natural gas was at hand: one that his company wasn't prepared for. Praise for The Greatest Trade Ever 'Simply terrific. Easily the best of the post-crash financial books.' Malcolm Gladwell 'The definitive account of a strange and wonderful subplot of the financial crisis.' Michael Lewis 'Zuckerman is a first-rate reporter who is able to explain the complexities of finance in layman's terms. At times, The Greatest Trade Ever reads like a thriller.' The New York Times

Oil and Governance David G. Victor, David R. Hults, Mark C. Thurber, 2011-12-08 National oil companies (NOCs) play an important role in the world economy. They produce most of the world's oil and bankroll governments across the globe. This book explains the variation in performance and strategy for NOCs and provides fresh insights into the future of the oil industry.

National Oil Companies and Value Creation Silvana Tordo, 2011-07-13 National Oil Companies (NOCs) directly or indirectly control the majority of oil and gas reserves. As such, they are of great consequence to their country's economy, to importing countries' energy security, and to the stability of oil and gas markets. The paper analyzes the available evidence on the objectives, governance and performance of 20 NOCs from both net importing and net exporting countries, and draws conclusions about the design of policies and measures that are more likely to lead to social value creation. NOCs differ from private companies on a number of very important variables, including the level of competition in the market in which they operate, their business profile along the sector value chain, and their degree of commercial orientation and internationalization. Most share some core characteristics: they are usually tied to the 'national purpose' and serve political and economic goals

other than maximizing the firm's profits. This paper introduces a conceptual model to analyze value creation by NOCs that takes into consideration their complex objective function. Our analysis aims to answer the following questions: Are certain corporate governance arrangements more suited than others to promote value creation? Is good geology a pre-condition for NOC value creation? Are there benefits from exposing the NOC to competition from private oil companies? Does the development of forward and backward linkages hamper NOC value creation?

Investments: Portfolio theory and asset pricing Edwin J. Elton,Martin Jay Gruber,1999 This collection of articles in investment and portfolio management spans the thirty-five-year collaborative effort of two key figures in finance. Each of the nine sections begins with an overview that introduces the main contributions of the pieces and traces the development of the field. Each volume contains a foreword by Nobel laureate Harry Markowitz. Volume I presents the authors' groundbreaking work on estimating the inputs to portfolio optimization, including the analysis of alternative structures such as single and multi-index models in forecasting correlations; portfolio maximization under alternative specifications for return structures; the impact of CAPM and APT in the investment process; and taxes and portfolio composition. Volume II covers the authors' work on analysts' expectations; performance evaluation of managed portfolios, including commodity, stock, and bond portfolios; survivorship bias and performance persistence; debt markets; and immunization and efficiency.

Global Energy Governance Andreas Goldthau,Jan Martin Witte,2010-03-01 The global market for oil and gas resources is rapidly changing. Three major trends—the rise of new consumers, the increasing influence of state players, and concerns about climate change—are combining to challenge existing regulatory structures, many of which have been in place for a half-century. Global Energy Governance analyzes the energy market from an institutionalist perspective and offers practical policy recommendations to deal with these new challenges. Much of the existing discourse on energy governance deals with hard security issues but neglects the challenges to global governance. Global Energy Governance fills this gap with perspectives on how regulatory institutions can ensure reliable sources of energy, evaluate financial risk, and provide emergency response mechanisms to deal with interruptions in supply. The authors bring together decisionmakers from industry, government, and civil society in order to address two central questions: •What are the current practices of existing institutions governing global oil and gas on financial markets? •How do these institutions need to adapt in order to meet the challenges of the twenty-first century? The resulting governance-oriented analysis of the three interlocking trends also provides the basis for policy recommendations to improve global regulation.
