Label-Free Super-Resolution Microscopy Vasily Astratov,2019-08-31 This book presents the advances in super-resolution microscopy in physics and biomedical optics for nanoscale imaging. In the last decade, super-resolved fluorescence imaging has opened new horizons in improving the resolution of optical microscopes far beyond the classical diffraction limit, leading to the Nobel Prize in Chemistry in 2014. This book represents the first comprehensive review of a different type of super-resolved microscopy, which does not rely on using fluorescent markers. Such label-free super-resolution microscopy enables potentially even broader applications in life sciences and nanoscale imaging, but is much more challenging and it is based on different physical concepts and approaches. A unique feature of this book is that it combines insights into mechanisms of label-free super-resolution with a vast range of applications from fast imaging of living cells to inorganic nanostructures. This book can be used by researchers in biological and medical physics. Due to its logically organizational structure, it can be also used as a teaching tool in graduate and upper-division undergraduate-level courses devoted to super-resolved microscopy, nanoscale imaging, microscopy instrumentation, and biomedical imaging.

Advances in Food Authenticity Testing Gerard Downey,2016-08-08 Advances in Food Authenticity Testing covers a topic that is of great importance to both the food industry whose responsibility it is to provide clear and accurate labeling of their products and maintain food safety and the government agencies and organizations that are tasked with the verification of claims of food authenticity. The adulteration of foods with cheaper alternatives has a long history, but the analytical techniques which can be implemented to test for these are ever advancing. The book covers the wide range of methods and techniques utilized in the testing of food authenticity, including new implementations and processes. The first part of the book examines, in detail, the scientific basis and the process of how these techniques are used, while other sections highlight specific examples of the use of these techniques in the testing of various foods. Written by experts in both academia and industry, the book provides the most up-to-date and comprehensive coverage of this important and rapidly progressing field. Covers a topic that is of great importance to both the food industry and the governmental agencies tasked with verifying the safety and authenticity of food products Presents a wide range of methods and techniques utilized in the testing of food authenticity, including new implementations and processes Highlights specific examples of the use of the emerging techniques and testing strategies for various foods

Encyclopedia of the Anthropocene ,2017-11-27 Encyclopedia of the Anthropocene presents a currency-based, global synthesis cataloguing the impact of humanity's global ecological footprint. Covering a multitude of aspects related to Climate Change, Biodiversity, Contaminants, Geological, Energy and Ethics, leading scientists provide foundational essays that enable researchers to define and scrutinize information, ideas, relationships, meanings and ideas within the Anthropocene concept. Questions widely debated among scientists, humanists, conservationists, politicians and others are included, providing discussion on when the Anthropocene began, what to call it, whether it should be considered an official geological epoch, whether it can be contained in time, and how it will affect future generations. Although the idea that humanity has driven the planet into a new geological epoch has been around since the dawn of the 20th century, the term 'Anthropocene' was only first used by ecologist Eugene Stoermer in the 1980s, and hence popularized in its current meaning by atmospheric chemist Paul Crutzen in 2000. Presents comprehensive and systematic coverage of topics related to the Anthropocene, with a focus on the Geosciences and Environmental science Includes point-counterpoint articles debating key aspects of the Anthropocene, giving users an even-handed navigation of this complex area Provides historic, seminal papers and essays from leading scientists and philosophers who demonstrate changes in the Anthropocene concept over time

TULA Jurgis Kuncinas,2016-11-01 A unique story of love set in the Uzupis district of Vilnius, this book is a modern-day classic of Lithuanian fiction.

The Churchill Factor Boris Johnson,2015-10-27 From London's inimitable mayor, Boris Johnson, the New York Times-bestselling story of how Churchill's eccentric genius shaped not only his world but our own. On the fiftieth anniversary of Churchill's death, Boris Johnson celebrates the singular brilliance of one of the most important leaders of the twentieth century. Taking on the myths and misconceptions along with the outsized reality, he portrays—with characteristic wit and passion—a man of contagious bravery, breathtaking eloquence, matchless strategizing, and deep humanity. Fearless on the battlefield, Churchill had to be ordered by the king to stay out of action on D-day; he pioneered aerial bombing and few could match his experience in organizing violence on a colossal scale, yet he hated war and scorned politicians who had not experienced its horrors. He was the most famous journalist of his time and perhaps the greatest orator of all time, despite a lisp and the chronic depression he kept at bay by painting. His maneuvering positioned America for entry into World War II, even as it ushered in England's postwar decline. His open-mindedness made him a trailblazer in health care, education, and social welfare, though he remained incorrigibly politically incorrect. Most of all, he was a rebuttal to the idea that history is the story of vast and impersonal forces; he is proof that one person—intrepid, ingenious, determined—can make all the difference.

Lean Thinking James P. Womack,Daniel T. Jones,2013-09-26 Lean Thinking was launched in the fall of 1996, just in time for the recession of 1997. It told the story of how American, European, and Japanese firms applied a simple set of principles called 'lean thinking' to survive the recession of 1991 and grow steadily in sales and profits through 1996. Even though the recession of 1997 never happened, companies were starving for information on how to make themselves leaner and more efficient. Now we are dealing with the recession of 2001 and the financial meltdown of 2002. So what happened to the exemplar firms profiled in Lean Thinking? In the new fully revised edition of this bestselling book those pioneering lean thinkers are brought up to date. Authors James Womack and Daniel Jones offer new guidelines for lean thinking firms and bring their groundbreaking practices to a brand new generation of companies that are looking to stay one step ahead of the competition.

Why Does the World Exist Jim Holt,2012-07-17 Expands the search for the origins of the universe beyond God and the Big Bang theory, exploring more bizarre possibilities inspired by physicists, theologians, mathematicians, and even novelists.

Routledge Handbook of Public Policy in Africa Gedion Onyango,2021-12-30 This Handbook provides an authoritative and foundational disciplinary overview of African Public Policy and a comprehensive examination of the practicalities of policy analysis, policymaking processes, implementation, and administration in Africa today. The book assembles a multidisciplinary team of distinguished and upcoming Africanist scholars, practitioners, researchers and policy experts working inside and outside Africa to analyse the historical and emerging policy issues in 21st-century Africa. While mostly attentive to comparative public policy in Africa, this book attempts to address some of the following pertinent questions: How can public policy be understood and taught in Africa? How does policymaking occur in unstable political contexts, or in states under pressure? Has the democratisation of governing systems improved policy processes in Africa? How have recent transformations, such as technological proliferation in Africa, impacted public policy processes? What are the underlying challenges and potential policy paths for Africa going forward? The contributions examine an interplay of prevailing institutional, political, structural challenges and opportunities for policy effectiveness to discern striking commonalities and trajectories across different African states. This is a valuable resource for practitioners, politicians, researchers, university students, and academics interested in studying and understanding how African countries are governed.

White Beech Germaine Greer, 2014-07-15 For years I had wandered Australia with an aching heart. Everywhere I had ever travelled across the vast expanse of the fabulous country where I was born I had seen devastation, denuded hills, eroded slopes, weeds from all over the world, feral animals, open-cut mines as big as cities, salt rivers, salt earth, abandoned townships, whole beaches made of beer cans... One bright day in December 2001, sixty-two-year-old Germaine Greer found herself confronted by an irresistible challenge in the shape of sixty hectares of dairy farm, one of many in southeast Queensland that, after a century of logging, clearing, and downright devastation, had been abandoned to their fate. She didn't think for a minute that by restoring the land she was saving the world. She was in search of heart's ease. Beyond the acres of exotic pasture grass and soft weed and the impenetrable curtains of tangled Lantana canes there were Macadamias dangling their strings of unripe nuts, and Black Beans with red and yellow pea flowers growing on their branches ? and the few remaining White Beeches, stupendous trees up to 120 feet in height, logged out within forty years of the arrival of the first white settlers. To have turned down even a faint chance of bringing them back to their old haunts would have been to succumb to despair. Once the process of rehabilitation had begun, the chance proved to be a dead certainty. When the first replanting shot up to make a forest and rare caterpillars turned up to feed on the leaves of the new young trees, she knew beyond a doubt that at least here biodepletion could be reversed. Greer describes herself as an old dog who succeeded in learning a load of new tricks, inspired and rejuvenated by her passionate love of Australia and of Earth, the most exuberant of small planets.

Global Corruption Report: Sport Transparency International, 2016-02-05 Sport is a global phenomenon engaging billions of people and generating annual revenues of more than US\$ 145 billion. Problems in the governance of sports organisations, fixing of matches and staging of major sporting events have spurred action on many fronts. Yet attempts to stop corruption in sport are still at an early stage. The Global Corruption Report (GCR) on sport is the most comprehensive analysis of sports corruption to date. It consists of more than 60 contributions from leading experts in the fields of corruption and sport, from sports organisations, governments, multilateral institutions, sponsors, athletes, supporters, academia and the wider anti-corruption movement. This GCR provides essential analysis for understanding the corruption risks in sport, focusing on sports governance, the business of sport, planning of major events, and match-fixing. It highlights the significant work that has already been done and presents new approaches to strengthening integrity in sport. In addition to measuring transparency and accountability, the GCR gives priority to participation, from sponsors to athletes to supporters an essential to restoring trust in sport.

A Combat Artist in World War II Edward Reep, 2014-07-15 Many artists have fought in wars, and renowned painters have recorded heroic scenes of great battles, but those works were usually done long after the battles were waged. Artists have also been commissioned to visit, briefly, war-torn areas and make notes of the devastation and horror. Yet few artists who were members of any armed services have drawn or painted daily while they fought alongside their comrades. Edward Reep, as an official combat artist in World War II, painted and sketched while the battles of the Italian campaign raged around him. He was shelled, mortared, and strafed. At Monte Cassino, the earth trembled as he attempted to paint the historic bombing of that magnificent abbey. Later, racing into Milan with armed partisans on the fenders of his Jeep, he saw the bodies of Mussolini and his beautiful mistress cut down from the gas station where they had been hanged by their heels. That same day he witnessed at first hand the spectacle of a large German army force holed up in a high-rise office tower, waiting for the chance to surrender to the proper American brass for fear of falling into the hands of the vengeful partisans. Reep's recollections of such desperate days are made more memorable in *Combat Artist* by the many painfully vivid paintings and drawings that accompany the text. Reep's battlefield drawings show us, with unrelenting honesty, the horrors and griefs -- and the bitter comedy -- of that war fought to end wars that only spawned more.

The Leisure Commons Payal Arora, 2014-06-27 There is much excitement about Web 2.0 as an unprecedented, novel, community-building space for experiencing, producing, and consuming leisure, particularly through social network sites. What is needed is a perspective that is invested in neither a utopian or dystopian posture but sees historical continuity to this cyberleisure geography. This book investigates the digital public sphere by drawing parallels to another leisure space that shares its rhetoric of being open, democratic, and free for all: the urban park. It makes the case that the history and politics of public parks as an urban commons provides fresh insight into contemporary debates on corporatization, democratization and privatization of the digital commons. This book takes the reader on a metaphorical journey through multiple forms of public parks such as Protest Parks, Walled Gardens, Corporate Parks, Fantasy Parks, and Global Parks, addressing issues such as virtual activism, online privacy/surveillance, digital labor, branding, and globalization of digital networks. Ranging from the 19th century British factory garden to Tokyo Disneyland, this book offers numerous spatial metaphors to bring to life aspects of new media spaces. Readers looking for an interdisciplinary, historical and spatial approach to staid Web 2.0 discourses will undoubtedly benefit from this text.

Noricum (Routledge Revivals) Geza Alföldy, 2014-06-17 The Roman province of Noricum occupied most of Austria as well as parts of Italy, Germany and the Balkans. *Noricum*, first published in 1974, presents a comprehensive history of Noricum, from 400 BC to the end of Roman rule in AD 600. Professor Alföldy's account is predicated on the methodical interpretation of literary, epigraphic and archaeological sources, and emphasises the problems of demography and socio-economic history. The chapters are arranged chronologically, ensuring a sense of the continuity of historical events and illuminating the history and archaeology of Noricum both before it came into contact with the Romans as well as under Roman rule. *Noricum* includes a review of much recent research on the province, detailed references to the source material, a comprehensive bibliography and valuable appendices. It is a substantial work of ancient history and archaeology and will interest both the specialist and the general reader.

Summer at the Lake Erica James, 2014-02-27 From Lake Como in Italy to Oxford, a wonderfully compelling novel about lost love, fate and second chances from the Sunday Times bestselling author. Lake Como - beautiful, enchanting, romantic... For Floriana, it is the place where the love of her life is getting married to another woman. And she's been invited to the wedding. For Esme, it is where, over sixty years ago, she fell in love for the first time. So often she's wondered what happened to the man who stole her heart - and changed the course of her life. Adam is in danger of burying himself entirely in his work after his girlfriend left him. Could a trip to Lake Como be the distraction he needs? Now it's time for each of them to understand that the past is not only another country, it can also cast haunting shadows over everyone's lives...

From Dust to Digital Maja Kominko, 2015-02-16 Much of world's documentary heritage rests in vulnerable, little-known and often inaccessible archives. Many of these archives preserve information that may cast new light on historical phenomena and lead to their reinterpretation. But such rich collections are often at risk of being lost before the history they capture is recorded. This volume celebrates the tenth anniversary of the Endangered Archives Programme at the British Library, established to document and publish online formerly inaccessible and neglected archives from across the globe. *From Dust to Digital* showcases the historical significance of the collections identified, catalogued and digitised through the Programme, bringing together articles on 19 of the 244 projects

supported since its inception. These contributions demonstrate the range of materials documented — including rock inscriptions, manuscripts, archival records, newspapers, photographs and sound archives — and the wide geographical scope of the Programme. Many of the documents are published here for the first time, illustrating the potential these collections have to further our understanding of history.

Covid-19: The Great Reset Thierry Malleret,Klaus Schwab,2020-07-09 The Corona crisis and the Need for a Great Reset is a guide for anyone who wants to understand how COVID-19 disrupted our social and economic systems, and what changes will be needed to create a more inclusive, resilient and sustainable world going forward. Thierry Malleret, founder of the Monthly Barometer, and Klaus Schwab, founder and executive Chairman of the World Economic Forum, explore what the root causes of these crisis were, and why they lead to a need for a Great Reset.Theirs is a worrying, yet hopeful analysis. COVID-19 has created a great disruptive reset of our global social, economic, and political systems. But the power of human beings lies in being foresighted and having the ingenuity, at least to a certain extent, to take their destiny into their hands and to plan for a better future. This is the purpose of this book: to shake up and to show the deficiencies which were manifest in our global system, even before COVID broke out.
