Space Strategy in the 21st Century Eligar Sadeh,2013-02-11 This book offers an overview of space strategy in the 21st century. The purpose of space strategy is to coordinate, integrate, and prioritize space activities across security, commercial, and civil sectors. Without strategy, space activities continue to provide value, but it becomes difficult to identify and execute long-term programs and projects and to optimize the use of space for security, economic, civil, and environmental ends. Strategy is essential for all these ends since dependence on, and use of, space is accelerating globally and space is integrated in the fabric of activities across all sectors and uses. This volume identifies a number of areas of concern pertinent to the development of national space strategy, including: intellectual foundations; political challenges; international cooperation and space governance; space assurance and political, organizational, and management aspects specific to security space strategy. The contributing authors expand their focus beyond that of the United States, and explore and analyse the international developments and implications of national space strategies of Russia, China, Europe, Japan, India, Israel, and Brazil. This book will be of much interest to students of space power and politics, strategic studies, foreign policy and International Relations in general.

Women, Power and Politics in 21st Century Iran Tara Povey, 2016-02-17 This book examines the women's movement in Iran and its role in contesting gender relations since the 1979 revolution. Looking at examples from politics, law, employment, environment, media and religion and the struggle for democracy, this book demonstrates how material conditions have important social and political consequences for the lives of women in Iran and exposes the need to challenge the dominant theoretical perspectives on gender and Islam. A truly fascinating insider's look at the experiences of Iranian women as academics, political and civil society activists, this book counters the often inaccurate and misleading stereotyping of Iranian women to present a vibrant and diverse picture of these women's lives. A welcome and unique addition to the vibrant and growing literature on women, Islam, development, democracy and feminisms.

International Drug Control into the 21st Century Hamid Ghodse, 2016-12-05 Providing a comprehensive analysis of drug misuse, dependence and the ways in which different parts of the world have responded to these problems, this volume examines aspects of the contemporary drug problem, the related debate and the way in which society is responding to it. Various controversial issues are covered, taking into account the way in which pressure groups would like to see changes in national and/or international drug control regimes. The book is drawn from extensive studies carried out by the UN over the last 15 years; each of the themes has been examined by a group of experts and lends itself to debate. Among the many topics discussed are: the legalization of drugs, prevention, treatment, rehabilitation, the macro and micro economy, supply and demand reduction and money laundering. The book will be a valuable resource for professionals and academics in law enforcement, health, social services, behavioural sciences, pharmacy and drug regulatory agencies.

Space Warfare in the 21st Century Joan Johnson-Freese,2016-11-08 This book examines the recent shift in US space policy and the forces that continually draw the US back into a space-technology security dilemma. The dual-use nature of the vast majority of space technology, meaning of value to both civilian and military communities and being unable to differentiate offensive from defensive intent of military hardware, makes space an area particularly ripe for a security dilemma. In contrast to previous administrations, the Obama Administration has pursued a less militaristic space policy, instead employing a strategic restraint approach that stressed multilateral diplomacy to space challenges. The latter required international solutions and the United States, subsequently, even voiced support for an International Code of Conduct for Space. That policy held until the Chinese anti-satellite (ASAT) test in 2013, which demonstrated expanded Chinese capabilities. This volume explores the issues arising from evolving space capabilities across the world and the security challenges this poses. It subsequently discusses the complexity of the space environment and argues that all tools of national power must be used, with some degree of balance, toward addressing space challenges and achieving space goals. This book will be of much interest to students of space policy,

defence studies, foreign policy, security studies and IR.
