Media Moms & Digital Dads Yalda T Uhls,2016-10-04 Is social media ruining our kids? How much Internet activity is too much? What do FOMO (Fear of Missing Out), sexting, and selfies mean for teens? Are you curious about what research says about how media and technology are affecting childhood? Supported by academic research focused on technology, *Media Moms & Digital Dads* breaks down complex issues in a friendly, accessible fashion, making it a highly useful and, ultimately, reassuring read for anyone who worries about the impact that media might be having on young minds. Each chapter delves into a different issue related to kids and media so parents can easily find their particular issue of concern. Dr. Uhls ends each chapter with quick takeaways, in the form of tips and guidance for parents. Dr. Uhls' expertise as a former Hollywood film executive and as a current expert on child development and the media gives her a unique and important perspective. As a trained scientist she understands the myriad studies conducted by researchers, and as a mom of digital teens, she knows what actually works and can relate to the reality of being a parent in the 21st century. Dr. Uhls also describes the primary research she conducted at UCLA, including whether extensive screen time impacts non-verbal emotional understanding, which has been covered in the *New York Times*, *Time* magazine, and on National Public Radio. There are few more important issues for parents today than helping children safely navigate the digital world in which we live, a world that

provides immense opportunity for learning and connecting yet also puts kids in a position to make mistakes and even cause harm. Knowing what the facts are and when and how to get involved is perhaps one of the most challenging aspects of modern parenting. Media Moms & Digital Dads offers parents reassuring and fact-based guidance on how best to manage screens and media for their children.

Football Scouting Methods Steve Belichick, 2008 Considered the bible of scouting techniques according to the Los Angeles Times, Football Scouting Methods explains the basic scouting strategies and insights of author Steve Belichick. He was widely viewed as the ablest football scout of his time and coached at the U.S. Naval Academy for 33 years; his son is New England Patriots coach Bill Belichick, a three-time Super Bowl winner. When Steve Belichick died in November 2005, the New York Times headline cited him as Coach Who Wrote the Book on Scouting, and quoted Houston Texans General Manager Charley Casserly calling Football Scouting Methods the best book on scouting he had ever read. Joe Bellino, Navy's Heisman Trophy winner in 1960, told the Times that Steve Belichick was a genius. On Monday nights, he would give us his scouting reports, and even though we were playing powerhouses, I always felt we were prepared because he found a way for us to win. In recent years Football Scouting Methods has been one of the top ten most sought out-of-print books; used copies have been quite scarce. This reissue edition makes the original 1962 text available once again in exact facsimile. The book covers how to scout opponents, recognize defenses, analyze offenses, discover tip-offs that reveal the opponent's plays, compose a useful report, self-scout, and conduct postgame analysis. Steve Belichick taught many younger men how to scout and how to watch film and how to prepare their teams for the next week's game, David Halberstam noted in the Washington Post, and his best student was his own son Bill Belichick, one of whose greatest skills as a coach to this day remains his ability to analyze other teams, figuring out both their strengths and their vulnerabilities, and shrewdly deciding how to take away from them that which they most want to do. When CBS asked Bill Belichick to name his favorite book, he replied Well, I've got to go with my dad's. Football Scouting Methods. I'd have to go with that.

Doing School Denise Clark Pope, 2008-10-01 This book offers a highly revealing and troubling view of today's high school students and the ways they pursue high grades and success. Denise Pope, veteran teacher and curriculum expert, follows five motivated and successful students through a school year, closely shadowing them and engaging them in lengthy reflections on their school experiences. What emerges is a double-sided picture of school success. On the one hand, these students work hard in school, participate in extracurricular activities, serve their communities, earn awards and honours, and appear to uphold school values. But on the other hand, they feel that in order to get ahead they must compromise their values and manipulate the system by scheming,

lying, and cheating. In short, they do school, that is, they are not really engaged with learning nor can they commit to such values as integrity and community. The words and actions of these five students - two boys and three girls from diverse ethnic and socioeconomic backgrounds - underscore the frustrations of being caught in a grade trap that pins future success to high grades and test scores. Their stories raise critical questions that are too important for parents, educators, and community leaders to ignore. Are schools cultivating an environment that promotes intellectual curiosity, cooperation, and integrity? Or are they fostering anxiety, deception, and hostility? Do today's schools inadvertently impede the very values they claim to embrace? Is the success that current assessment practices measure the kind of success we want for our children?

The Digital Citizenship Handbook for School Leaders Mike Ribble, Marty Park, 2022-08-24 Learn how to develop a meaningful approach to embedding digital citizenship into an established program, helping your students succeed in a digital world. In today's schools and districts, just saying "no" to bad technology practices is not enough. This leadership posture can take the form of extreme blocking and filtering of websites, providing little access to devices and declining to integrate digital tools and resources into learning out of fear of what else a student might do. Such a mindset can also lead to adults choosing not to engage -- or being unable to engage -- in conversations when students share stories about what a peer did online or through the latest app. Digital citizenship curriculum needs to be taught at two levels at once -- horizontal (the world immediately around students) and vertical (connecting to the rest of the world). This book provides education leaders a strategic road map that demonstrates how to incorporate these concepts into the curriculum so that digital citizenship isn't just "one more thing," but is threaded into the DNA of how educators teach and work. The book: • Provides a five-year-plan for developing a digital citizenship program in your school. • Covers such topics as digital ethics and

leveled approaches to digital citizenship. • Walks through the digital citizenship responsibilities and opportunities inherent in various roles, including library media specialists, classroom educators and special ed teachers. • Offers strategies for spreading digital citizenship internationally and explores the future of digital citizenship. The book offers school and district leaders a path toward a shared and collective understanding so that digital citizenship is embedded in the way students and educators interact with technology and each other. It is a guide for school communities to discover which practices, in the end, will lead to better people.

The Triple Agent Joby Warrick,2012-05-01 NATIONAL BESTSELLER • From the Pulitzer-Prize winning reporter, a stunning narrative account of the mysterious Jordanian who penetrated both the inner circle of al-Qaeda and the highest reaches of the CIA, with a devastating impact on the war on terror. Warwick is a brilliant reporter...A gripping true-life spy saga.—Los Angeles Times In December 2009, a group of the CIA's top terrorist hunters gathered at a secret base in Khost, Afghanistan, to greet a rising superspy: Humam Khalil al-Balawi, a Jordanian double-agent who infiltrated the upper ranks of al-Qaeda. For months, he had sent shocking revelations from inside the terrorist network and now promised to help the CIA assassinate Osama bin Laden's top deputy. Instead, as he stepped from his car, he detonated a thirty-pound bomb strapped to his chest, instantly killing seven CIA operatives, the agency's worst loss of life in decades. In *The Triple Agent*, Pulitzer Prize-winning reporter Joby Warrick takes us deep inside the CIA's secret war against al-Qaeda, a war that pits robotic planes and laser-guided missiles against a cunning enemy intent on unleashing carnage in American cities. Flitting precariously between the two sides was Balawi, a young man with extraordinary gifts who managed to win the confidence of hardened terrorists as well as veteran spymasters. With his breathtaking accounts from inside al-Qaeda's lair, Balawi appeared poised to become America's greatest double-agent in half a century—but he was not at all what he seemed. Combining the powerful momentum of *Black Hawk Down* with the institutional insight of Jane Mayer's *The Dark Side*, Warrick takes the readers on a harrowing journey from the slums of Amman to the inner chambers of the White House in an untold true story of miscalculation, deception, and revenge.

The Existence of God Stig Borsen Hansen, 2010-09-22 This study breaks new ground on the question of the existence of God. It innovatively combines biblical scholarship with an analysis of existence drawn from the writings of the philosopher Gottlob Frege. It shows that the strength of Frege's approach is its emphasis on the notions of proper name and predicate; this in turn sheds new light on important elements of theological language. Finally, the Fregean approach in this book is defended against objections drawn from readings of Ludwig Wittgenstein's *Tractatus Logico-Philosophicus*.
