History of the Persian Empire A. T. Olmstead, 2022-08-29 Out of a lifetime of study of the ancient Near East, Professor Olmstead has gathered previously unknown material into the story of the life, times, and thought of the Persians, told for the first time from the Persian rather than the traditional Greek point of view. The fullest and most reliable presentation of the history of the Persian Empire in existence.—M. Rostovtzeff

Egyptian Obelisks Henry Honeychurch Gorringe, 1885 A deluxe book produced at the point that Harroun and Bierstadt dissolved their business ... The Artotypes in this book are some of the finest produced by Bierstadt. The pictorial record of this engineering feat is remarkable in itself; casing and tilting the obelisk, loading it into the side of the ship by removing part of the hull, pulling it out on a special dock in the Hudson and then moving it by custom made rail from the river to the site next to the Metropolitan Museum. The illustrations show the hieroglyphics, now mostly lost due to New York's polluted air, bright and clear.--Hanson Collection catalog, p. 82

ArtTalk, Student Edition McGraw-Hill Education, 1999-05-06 The perfect blend of art criticism, art history, aesthetics, and studio production ArtTalk is the most comprehensive multilevel art education program available. It has expanded its coverage of art history, strengthened its technology integration features, and placed more emphasis on the performing arts--all while maintaining its focus on a media approach to the elements and principles of art. Students learn to look at, appreciate, and criticize art through more than 200 artworks that represent a variety of cultures, styles, and media. At the same time, they develop their creativity and studio skills by participating in a multitude of hands-on experiences.

Cuisine and Culture Linda Civitello, 2011-03-29 An illuminating account of how history shapes our diets—now in a new revised and updated Third Edition Why did the ancient Romans believe cinnamon grew in swamps guarded by giant killer bats? How did African cultures imported by slavery influence cooking in the American South? What does the 700-seat McDonald's in Beijing serve in the age of globalization? With the answers to these and many more such questions, *Cuisine and Culture*, Third Edition presents an engaging, entertaining, and informative exploration of the interactions among history, culture, and food. From prehistory and the earliest societies in the Fertile Crescent to today's celebrity chefs, *Cuisine and Culture*, Third Edition presents a multicultural and multiethnic approach to understanding how and why major historical events have affected and defined the culinary traditions in different societies. Now revised and updated, this Third Edition is more comprehensive and insightful than ever before. Covers prehistory through the present day—from

the discovery of fire to the emergence of television cooking shows Explores how history, culture, politics, sociology, and religion have determined how and what people have eaten through the ages Includes a sampling of recipes and menus from different historical periods and cultures Features French and Italian pronunciation guides, a chronology of food books and cookbooks of historical importance, and an extensive bibliography Includes all-new content on technology, food marketing, celebrity chefs and cooking television shows, and Canadian cuisine. Complete with revealing historical photographs and illustrations, Cuisine and Culture is an essential introduction to food history for students, history buffs, and food lovers.

The End of Development Andrew Brooks, 2017-05-15 Why did some countries grow rich while others remained poor? Human history unfolded differently across the globe. The world is separated into places of poverty and prosperity. Tracing the long arc of human history from hunter-gatherer societies to the early twenty-first century in an argument grounded in a deep understanding of geography, Andrew Brooks rejects popular explanations for the divergence of nations. This accessible and illuminating volume shows how the wealth of 'the West' and poverty of 'the rest' stem not from environmental factors or some unique European cultural, social or technological qualities, but from the expansion of colonialism and the rise of America. Brooks puts the case that international inequality was moulded by capitalist development over the last 500 years. After the Second World War, international aid projects failed to close the gap between 'developed' and 'developing' nations and millions remain impoverished. Rather than address the root causes of inequality, overseas development assistance exacerbate the problems of an uneven world by imposing crippling debts and destructive neoliberal policies on poor countries. But this flawed form of development is now coming to an end, as the emerging economies of Asia and Africa begin to assert themselves on the world stage. The End of Development provides a compelling account of how human history unfolded differently in varied regions of the world. Brooks argues that we must now seize the opportunity afforded by today's changing economic geography to transform attitudes towards inequality and to develop radical new approaches to addressing global poverty, as the alternative is to accept that impoverishment is somehow part of the natural order of things.

Collected Works of Velimir Khlebnikov: Letters and theoretical writings Велимир Хлебников, 1987 Dubbed by his fellow Futurists the King of Time, Velimir Khlebnikov (1885-1922) spent his entire brief life searching for a new poetic language to express his convictions about the rhythm of history, the correspondence between human behavior and the language of the stars. The result was a vast body of poetry and prose that has been called hermetic, incomprehensible, even deranged. Of all this tragic generation of Russian poets (including Blok, Esenin, and Mayakovsky), Khlebnikov has been perhaps the most praised and the more censured. This first volume of the Collected Works, an edition sponsored by the Dia Art Foundation, will do much to establish the counterimage of

Khlebnikov as an honest, serious writer. The 117 letters published here for the first time in English reveal an ebullient, humane, impractical, but deliberate working artist. We read of the continuing involvement with his family throughout his vagabond life (pleas to his smartest sister, Vera, to break out of the mold, pleas to his scholarly father not to condemn and to send a warm overcoat); the naive pleasure he took in being applauded by other artists; his insistence that a young girl's simple verses be included in one of the typically outrageous Futurist publications of the time; his jealous fury at the appearance in Moscow of the Italian Futurist Marinetti; a first draft of his famous zoo poem (O Garden of Animals!); his seriocomic but ultimately shattering efforts to be released from army service; his inexhaustibly courageous confrontation with his own disease and excruciating poverty; and always his deadly earnest attempt to make sense of numbers, language, suffering, politics, and the exigencies of publication. The theoretical writings presented here are even more important than the letters to an understanding of Khlebnikov's creative output. In the scientific articles written before 1910, we discern foreshadowings of major patterns of later poetic work. In the pan-Slavic proclamations of 1908-1914, we find explicit connections between cultural roots and linguistic ramifications. In the semantic excursions beginning in 1915, we can see Khlebnikov's experiments with consonants, nouns, and definitions spelled out in accessible, if arid, form. The essays of 1916-1922 take us into the future of Planet Earth, visions of universal order and accomplishment that no longer seem so farfetched but indeed resonate for modern readers.

Archaeology of Empire in Achaemenid Egypt Henry P. Colburn, 2019-09-11 A study of the material culture of Egypt during the period of Achaemenid Persian rule, c. 526-404 BCE Provides a clear overview of the archaeological evidence for Achaemenid Egypt, including temples, tombs, irrigation works, statues, stelae, seals and coins Demonstrates how different types of evidence, both textual and archaeological - including material of uncertain provenance - can be used to address a single historical question Offers critical discussion of the dating criteria used by archaeologists for Egyptian Late Period material Elucidates strategies used by the Persians to establish and maintain control of Egypt Examines how these strategies may have affected the lives of people living in Egypt during the 27th Dynasty Creates a new explanatory model for the introduction of coinage to ancient Egypt Previous studies have characterised Achaemenid rule of Egypt either as ephemeral and weak or oppressive and harsh. These characterisations, however, are based on the perceived lack of evidence for this period, filtered through ancient and modern preconceptions about the Persians. Henry Colburn challenges these views by assembling and analyzing the archaeological remains from this period, including temples, tombs, irrigation works, statues, stelae, sealings, drinking vessels and coins. By looking at the decisions made about material culture - by Egyptians, Persians and others - it becomes possible to see both how the Persians integrated Egypt into their empire and the full range of experiences people had as a result.

Chance and the Sovereignty of God Vern S. Poythress, 2014-04-30 What if all events—big and small, good and bad—are governed by more than just blind chance? What if they are governed by God? In this theologically informed and philosophically nuanced introduction to the study of probability and chance, Vern Poythress argues that all events—including the seemingly random or accidental—fall under God's watchful gaze and are part of his eternal plan. Poythress tackles questions related to everything from natural disasters to the roll of the dice, explaining how God's sovereignty functions as the lens through which we study subjects such as

science, mathematics, modern physics, evolutionary biology, human choice, and gambling. Comprehensive in its scope, this book lays the theistic foundation for our scientific assumptions about the world while addressing personal questions about the meaning and significance of everyday events.

Artistry in Bronze Jens M Daehner, Kenneth Lapatin, Ambra Spinelli, 2017-11-21 The papers in this volume derive from the proceedings of the nineteenth International Bronze Congress, held at the Getty Center and Villa in October 2015 in connection with the exhibition Power and Pathos: Bronze Sculpture of the Hellenistic World. The study of large-scale ancient bronzes has long focused on aspects of technology and production. Analytical work of materials, processes, and techniques has significantly enriched our understanding of the medium. Most recently, the restoration history of bronzes has established itself as a distinct area of investigation. How does this scholarship bear on the understanding of bronzes within the wider history of ancient art? How do these technical data relate to our ideas of styles and development? How has the material itself affected ancient and modern perceptions of form, value, and status of works of art? www.getty.edu/publications/artistryinbronze

The 12th Planet Zecharia Sitchin, 1991-05-01 Over the years, startling evidence has been unearthed, challenging established notions of the origins of Earth and life on it, and suggesting the existence of a superior race of beings who once inhabited our world. The product of thirty years of intensive research, The 12th Planet is the first book in Zecharia Sitchin's prophetic Earth Chronicles series--a revolutionary body of work that offers indisputable documentary proof of humanity's extraterrestrial forefathers. Travelers from the stars, they arrived eons ago, and planted the genetic seed that would ultimately blossom into a remarkable species...called Man. The 12th Planet brings to life the Sumerian civilization, presenting millennia-old evidence of the existence of Nibiru, the home planet of the Anunnaki, and of the landings of the Anunnaki on Earth every 3,600 years, and reveals a complete history of the solar system as told by these early visitors from another planet. Zecharia Sitchin's Earth Chronicles series, with millions of copies sold worldwide, deal with the history and prehistory of Earth and humankind. Each book in the series is based upon information written on clay tablets by the ancient civilizations of the Near East. The series is offered here, for the first time, in highly readable, hardbound collector's editions with enhanced maps and diagrams.

Archaeology and History of Eighth-century Judah Zev Farber, Jacob L. Wright, 2018 The book explores what we know about eighth-century Judah from multiple angles, including a survey of what we know about Judah's neighbors, the land and its cities, daily life and material culture, religious beliefs and practices, and early forms of what are now biblical texts.

The Wars of Gods and Men Zecharia Sitchin, 1992-06-01 The Earth Chronicles series, in six volumes, deals with the history and prehistory of Earth and humankind. Each book in the series, based upon information written on clay tablets by the ancient civilizations

of the Near East, records the fantastic and real battles that occurred between the original creator gods over control of planet Earth. Asserting the premise that mythology is not fanciful but the repository of ancient memories, The Earth Chronicles series suggests that the Bible ought to be read literally as a historic/scientific document, and that ancient civilizations--older and greater than assumed--were the product of knowledge brought to Earth by the Anunnaki, Those Who from Heaven to Earth Came. The 12th Planet, the first book of the series, presents ancient evidence for the existence of an additional planet in the Solar System: the home planet of the Anunnaki. In confirmation of this evidence, recent data from unmanned spacecraft has led astronomers to actively search for what is being called Planet X. The subsequent volume, The Stairway to Heaven, traces man's unending search for immortality to a spaceport in the Sinai Peninsula and to the Giza pyramids, which had served as landing beacons for it--refuting the notion that these pyramids were built by human pharaohs. Recently, records by an eye-witness to a forgery of an inscription by the pharaoh Khufu inside the Great Pyramid corroborated the book's conclusions. In The Wars of Gods and Men, the third volume of his series, Zacharia Sitchin recounts events closer to our times, concluding that the Sinai spaceport was destroyed 4,000 years ago with nuclear weapons. Photographs of Earth from space clearly show evidence of such an explosion. The Wars of Gods and Men additionally embraces Canaanite, Hittite, and Hindu sources to include in these investigations the incidents of The Great Flood, the Tower of Babel, and the upheaval of Sodom and Gomorrah. Sitchin's unique reexamination of ancient mysteries explains these past cataclysmic events in the history of humanity, opening insights into our future.
