Historical Atlas of Dermatology and Dermatologists John

Thorne Crissey, Lawrence C. Parish, Karl Holubar, 2013-05-30
Ranging from the Egypt of the Pharaohs to the present day, *Historical Atlas of Dermatology and Dermatologists* offers a unique insight into the history of dermatology and the influences that led to present practice. It sheds new light on the emergence of dermatology as a separate medical speciality and on some of the key players who have contributed

Cancers of the Skin R. Dummer, F.O. Nestle, G. Burg, 2011-09-27

Skin cancer is the most frequent malignancy in humans and its incidence is still increasing. This situation calls for major efforts to manage the disease. Preventive measures must include reduced UV exposure and an enhanced common awareness of skin lesions. Advanced surgical techniques allow safe removal with excellent cosmetic results. In many cases alternative treatment modalities such as radiotherapy, cryosurgery and photodynamic therapy are applicable. The development of optimal sun screens and UV-protective clothes, new tools for early diagnosis of malignant lesions including videomicroscopy, improved evaluation of biopsy material and new treatment schemes will contribute to better patient care. New developments in therapy including pegylated interferons, cytokine-inducing molecules, monoclonal antibodies and vaccination approaches using peptides, dendritic cells, viruses or nDNA give hope for well-tolerated and efficient treatments.

Drug Delivery in Dermatology Célia Luiza Petersen Vitello

Kalil, Valéria Campos, 2021-09-19 Skin accounts for approximately 15% of an adult's total body weight, with a surface of about 2m². It provides an entry and exit barrier to various substances, offers effective protection against harmful substances, microorganisms and ultraviolet radiation, and is also paramount in immunology and body homeostasis, preventing dehydration and loss of essential minerals. The topical route has a number of advantages over oral and parenteral routes: no first-pass metabolism, greater convenience resulting in better treatment compliance, lower side-

effect frequency, and prompt dosing cessation if required. However, the stratum corneum allows penetration of only 1 to 5% of substances applied topically, making this application route much less efficient. Lipophilic and small molecules (up to 500 Da) can cross the stratum corneum, since keratinocytes are covered by a lipid matrix, while it is virtually impossible for hydrophilic and large drugs to cross intact, normal skin, which means that passive topical delivery is restricted. To address this, techniques have been developed aimed at optimizing drug skin penetration by means of chemical, mechanical and physical methods, such as adding permeating active agents and using occlusion, iontophoresis, microneedling, lasers and intense pulsed light, and it is now possible to deliver medication to different skin layers or transdermally to the systemic circulation. Drug delivery is a hot topic in dermatology, with a Pubmed search generating 203431 articles. Offering a detailed review of this emerging therapeutic option, including the various methods available, this unique book guides physicians and doctors in selecting the correct technologies, technique and products for each patient.

Nanotechnology in Dermatology Adnan Nasir, Adam Friedman, Steven Wang, 2012-12-02 Nanotechnology in Dermatology is the first book of its kind to address all of the important and rapidly growing aspects of nanotechnology as it relates to dermatology. In the last few years there has been an explosion in research and development for products and devices related to nanotechnology, including numerous applications for consumers, physicians, patients, and industry. Applications are underway in medicine and dermatology for the early detection, diagnosis, and targeted therapy of disease, and nanodesigned materials and devices are expected to be faster, smaller, more powerful, more efficient, and more versatile than their traditional counterparts. Written by experts working in this exciting field, Nanotechnology in Dermatology specifically addresses nanotechnology in consumer skin care products, in the diagnosis

of skin disease, in the treatment of skin disease, and the overall safety of nanotechnology. The book also discusses future trends of this ever-growing and changing field, providing dermatologists, pharmaceutical companies, and consumer cosmetics companies with a clear understanding of the advantages and challenges of nanotechnology today.

Stoelting's Pharmacology & Physiology in Anesthetic Practice
Pamela Flood, James P. Rathmell, Richard D. Urman, 2021-03-31
Comprehensive, readable, and clinically oriented, *Stoelting's Pharmacology & Physiology in Anesthetic Practice*, Sixth Edition, covers all aspects of pharmacology and physiology that are relevant either directly or indirectly to the anesthetic practice—a challenging topic that is foundational to the practice of anesthesia and essential to master. This systems-based, bestselling text has been thoroughly updated by experts in the field, giving you the detailed information needed to make the most informed clinical decisions about the care of your patients.

Nursing Interventions Classification (NIC) Gloria M. Bulechek, PhD, RN, FAAN, Howard K. Butcher, Joanne M. McCloskey Dochterman, PhD, RN, FAAN, Cheryl Wagner, 2012-11-01
Covering the full range of nursing interventions, *Nursing Interventions Classification (NIC)*, 6th Edition provides a research-based clinical tool to help in selecting appropriate interventions. It standardizes and defines the knowledge base for nursing practice while effectively communicating the nature of nursing. More than 550 nursing interventions are provided - including 23 NEW labels. As the only comprehensive taxonomy of nursing-sensitive interventions available, this book is ideal for practicing nurses, nursing students, nursing administrators, and faculty seeking to enhance nursing curricula and improve nursing care. More than 550 research-based nursing intervention labels with nearly 13,000 specific activities
Definition, list of activities, publication facts line, and background readings provided for each intervention. NIC Interventions Linked to 2012-2014 NANDA-I Diagnoses promotes

clinical decision-making. New! Two-color design provides easy readability. 554 research-based nursing intervention labels with nearly 13,000 specific activities. NEW! 23 additional interventions include: Central Venous Access Device Management, Commendation, Healing Touch, Dementia Management: Wandering, Life Skills Enhancement, Diet Staging: Weight Loss Surgery, Stem Cell Infusion and many more. NEW! 133 revised interventions are provided for 49 specialties, including five new specialty core interventions. NEW! Updated list of estimated time and educational level has been expanded to cover every intervention included in the text.

Melanocytic Lesions Mai P. Hoang,Martin C. Mihm Jr.,2014-06-26 Melanocytic Lesions: A Case Based Approach provides a concise yet comprehensive guideline on how to diagnose common as well as problematic and challenging melanocytic lesions. In the first 11 chapters, each entity is illustrated by an actual case; followed by discussion of how the diagnosis is reached, of the histologic differential diagnoses and of diagnostic pitfalls and ends with bulleted teaching points. Pertinent and up to date references are included at the end of each chapter. The latter chapters cover current microstaging and classification of melanoma, ancillary techniques including immunohistochemistry as well as available molecular assays and molecular targeted therapy. All figures and glass slides of the discussed cases are hosted online for easy viewing and access. Melanocytic Lesions: A Case Based Approach will serves as a useful resource for pathologists, dermatologists and researchers dealing with melanocytic lesions.
