You Wouldn't Want to Live Without Gaming! Jim Pipe, David Salariya, 2021-02-02 Humans have always loved to play games, from dice games in ancient Iran 5,000 years ago to chess and cards in the Middle Ages. Today, fanaticism over console games is at an all-time high, with players arguing passionately why one console is better than another. Learn about the many uses and positive effects of video games: how they can be a teaching aid, exercise our bodies and brains, stimulate our creativity, and bring people together. **You Wouldn't Want to Live Without Gaming!** is part of a brand-new science and technology strand within the internationally acclaimed **You Wouldn't Want to Be** series. The clear, engaging text and

humorous illustrations bring the subject to life and stimulate young readers' curiosity about the world around them. Specially commissioned cartoon-style illustrations in full colour make these books attractive and accessible even to reluctant readers. Information is conveyed through captions, labels and humorous speech bubbles in addition to the main text. Illustrated sidebars headed 'How It Works', 'Top Tip' or 'You Can Do It' supply more facts, describe simple, safe experiments, or steps that readers can take to help make the world a better place. Each volume includes a timeline and a list of 'Did You Know?' facts.

Economics and Finance of Risk and of the Future Robert Kast,André Lapied,2006-06-14 This book uses real-world examples to show how individual and collective risks can be blended and treated in a reliable decision-making framework that draws its inspiration from decision theory and market based mechanisms. It then goes into deeper detail by looking at the implications of having to face risks (a) where some kind of probabilistic description is available and (b) where none is available, using the example of insurable risks vs non-insurable risks. Again, by using real-world examples it shows how decision-makers can cope with such situations by a proper understanding and use of modern financial techniques.
