The book spells out, first of all, what our VUCA world entails, and how it affects businesses, organizations, and societies as a whole. These perspectives are interdisciplinary in nature, and are informed by e.g. management studies, leadership theory, philosophy, and theology.

E-Coaching Anne Ribbers, Alexander Waringa, 2015-03-24 In a rapidly moving world where so many of our day-to-day activities are now online, it has become essential to adapt coaching processes in order to better suit clients' circumstances and needs. Above all, clients want sustainable and time-efficient results. Electronic coaching (e-coaching) is an inevitable development for every professional who coaches, mentors, teaches, supervises, guides or helps people in their jobs. The book is underpinned by a theoretical framework that introduces a new model of people development (the ABC model), inspired by Graham Alexander's GROW model, and a new text-based coaching method inspired by Brown and Levinson's politeness theory. E-coaching is practical in its approach, with explanations on safeguarding the security and privacy of your clients, how to calculate rates, managing expectations and other important aspects of coaching online. The first English-language text available on e-coaching, this book presents a unique combined approach of method and technique, supplemented with a sample e-coaching programme. It is a must-read for all coaches, mentors, supervisors, teachers or HR professionals who want to coach in a modern way, as well as students studying on coaching courses. Homes for Our Time. Contemporary Houses Around the World Philip Jodidio, 2019-01-12 Across small cottages and lavish villas, beach houses and forest refuges, discover the world's finest crop of new homes. This cutting-edge global digest features such talents as Shigeru Ban, MVRDV, and Marcio Kogan alongside up-and-coming names like Aires Mateus, Xu Fu-Min, Vo Trong Nghia, Desai Chia, and Shunri Nishizawa. Here, there are homes in Australia and New Zealand, from China and Vietnam, in the United States and Mexico, and on to less expected places like Ecuador and Costa Rica. The result is a sweeping survey of the contemporary house and a revelation that homes across the globe may have more in common than expected. Among guava trees and abandoned forts in Western India is a sanctuary designed for and by Kamal Malik of Malik Architecture. The House of Three Streams is a sprawling spectacle with high ceilings, verandas, and pavilions, perched atop a ridge overlooking two ravines. A medley of steel, glass, wood, and stone, the house weaves along the contour of the landscape, almost as an extension of the forest. Encina House by Aranguren & Gallegos, an elegant, sloping structure reminiscent of a gazebo, similarly inhabits its surrounding vista. Ensconced in a pine forest north of Madrid, the lower level is embedded in rock and connected to the upper by a natural stone wall. Shinichi Ogawa's Seaside House is an immaculate two-story minimalist marvel in Kanagawa that overlooks the Pacific. Its living area spills onto a cantilevered terrace and infinity pool, almost dissolving into the ocean as one seamless entity. In Vietnam, Shunri Nishizawa's House in Chau Doc exudes tropical sophistication with exposed timber beams, woven bamboo, plants, concrete panels, and inner balconies and terraces. Its corrugated iron panels act as moveable walls and shutters, ushering in views of surrounding rice fields. These homes--along with more than 50 others--are each remarkably distinct in design. They all, however, toe the line between inside and outside, each one symbiotic with its surroundings.

Sadness, Depression, and the Dark Night of the Soul Glòria Durà-Vilà, 2017-01-19 Revealing a tension between the medical model of depression and the very different language of theology, this book explores how religious people and communities understand severe sadness, their coping mechanisms and their help-seeking behaviours. Drawing from her study of practicing Catholics, contemplative monks and nuns, priests and laypeople studying theology, the author describes how symptoms that might otherwise be described as pathological and meet diagnostic criteria for a depressive disorder are considered by some religious individuals to be normal and valued experiences. She explains how sadness fits into the 'Dark Night of the Soul' narrative - an active transformation of emotional distress into an essential ingredient for self-reflection and spiritual growth - and how sadness with a recognised cause is seen to 'make sense', whereas sadness without a cause may be seen to warrant psychiatric consultation. The author also discusses the role of the clergy in cases of sadness and depression and their collaboration with medical professionals. This is an insightful read for anyone with an interest in theology or mental health, including clergy, psychiatrists and psychologists.

Leadership styles in comparison. Effects of the three classic leadership styles as well as transactional and transformational leadership, 2022-01-18 Seminar paper from the year 2015 in the subject Leadership and Human Resource Management - Management Styles, grade: 1,0, University of Frankfurt (Main), language: English, abstract: The history of leadership research and leadership theory goes far back into the past. Ever since people have lived together in groups, there have been leaders and those who are led. The many different leadership styles have also been discussed and criticized since the 1950s. The question arises which style is the most efficient or the right style for leading people. For a company it is of great importance with which behavior their managers can influence or motivate the employees to the best possible performance and thus achieve the company's goals. Empirical studies show that the leadership style has a great influence on the work and well-being of leaders and employees and thus also on the economic success of the company. However, there is no one optimal leadership style as several studies and publications have already proven. Each of the styles can achieve both positive and negative results, depending on the situation and the individual employee. The leadership styles

should be adapted according to the situation. In this paper, after defining the terms leadership and leadership style, on the one hand the classical leadership styles and on the other hand the transactional and the transformational leadership styles are explained and compared. Possible advantages and disadvantages as well as their influence on employee motivation, willingness to perform and leadership success will be shown. In addition, results of current studies will provide an insight into the state of research. Finally, the most important points are summarized and a concluding conclusion is drawn on the basis of the knowledge gained.
