Handbook of Research on Entrepreneurship Policy David B. Audretsch, Isabel Grilo, A. Roy Thurik, 2007 This book is a well written and handy source for readers. Additionally, it provides an overview of current issues relevant to the development of entrepreneurial policy, which is based on interesting case studies across a number of nations. . . Dessy Irawati, International Journal of Entrepreneurial Behaviour and Research What is new in the world is the need to understand business dynamics; the entry, exit and growth of firms in the economy. This dynamic firm structure, as opposed to the static firm structure that dominated past thinking, has spurred an outpouring of research. The heart of the issue is that while many have identified the importance of business dynamics (entry and exit) we have only recently taken a closer look at the ecological system in which some companies must die for others to thrive. Entrepreneurs are the predators of this system. Public policy in an entrepreneurial economy (dynamic) must limit the forces that prevent firm exit and foster the forces that promote firm entry. This book makes an important contribution to the debate. Zoltan J. Acs, George Mason University, US and Max Planck Institute of Economics, Germany This unique Handbook provides a solid foundation for essential study in the nascent field of entrepreneurship policy research. This foundation is initially developed via the exploration of two significant propositions underpinning the nature of entrepreneurship policy research. The first is that entrepreneurship has emerged as a bona fide focus of public policy, particularly with respect to economic growth and employment creation. The second is that neither scholars nor policy makers are presently equipped to understand the public policy role for entrepreneurship. The contributors experienced scholars, specialist researchers and dynamic policy makers thus grapple with novel questions of considerable policy relevance that few have previously posed. The Handbook therefore provides some of the first crucial, systematic analyses of important issues, and key questions to be raised in order to move entrepreneurship policy forward are also presented. Written by academics and practitioners drawing examples from both North America and Europe, this stimulating new Handbook is a prerequisite for students, scholars and practitioners in the incipient world of

entrepreneurship policy.

Entrepreneurship in Latin America Eduardo Lora, Francesca Castellani, 2013-12-18 This book looks at both the potential and limits of policies to promote entrepreneurship as an important vehicle for social mobility in Latin America and the Caribbean. Who are the region's entrepreneurs? They tend to be middle-aged males with secondary and, often, tertiary education who represent only a small segment of the economically active population in the six countries considered in this book. They come from families in which a parent is, or was, an entrepreneur. In fact, a parent's occupation is more important in the decision to become an entrepreneur than a parent's wealth, income or education. Middle class entrepreneurship tends to dominate the sample in part since this is the majority class in society. However, as a percentage of each social class, entrepreneurship tends to be higher in the upper class, followed by the middle and lower class. Entrepreneurs concentrate in micro enterprises with fewer than five employees. They enjoy greater social mobility than employees and the self-employed, but this mobility is not always in the upward direction. Entrepreneurs face multiple obstacles including stifling bureaucracy, burdensome tax procedures, and lack of financing, human capital, technological skills, and supportive networks. The support of family and friends and a modicum of social capital help cope with these obstacles to entrepreneurship.
