Digital technology is advancing all the time, and how we pay for things is getting high tech, too. Instead of paper money and coins, or even credit and debit cards, this book introduces Bitcoins, a currency made up of bits and bytes. Readers will learn the essentials about Bitcoins, the sometimes-turbulent history of this open source currency, as well as examples of how it is used and when it has the most practical value. This intriguing resource reviews some of Bitcoins' pros and cons and discusses the future of this fascinating financial tool.

Lightspeed John C. H. Spence,2019-10-14 This is the human story and adventures of the great scientists who measured the speed of light -- which takes eight minutes to get here from the sun, so that when we look at the stars we are looking back in time. The book narrates how, since the ancient Greeks, scientists from Faraday, Maxwell, Fizeau and Michelson struggled to understand how light can travel through the vacuum of outer space, unless it is filled with a ghostly invisible vortex Aether foam. Thereader moves from Galileo's observations of the eclipses of Jupiter's moon for navigation, to Einstein's theories and his equation  $E = mc^2$ , and all the quantum weirdness which followed. Space probes,the Transit of Venus expeditions, the discovery of radio, optics and satellite navigation, and the amazing scientific instruments built to detect the Aether wind are described.

**Transcending the Speed of Light** Marc

Seifer,2008-08-13 The space-time continuum of physics ignores the realm of the mind. But consciousness is unconfined by space or time and represents a higher organizing principle, a fifth dimension, that transcends the speed of light. Marc Seifer examines relativity, ether theory, precognition, telepathy, and synchronicity, all from the perspective of the conscious universe.

**Relativity in Curved Spacetime** Eric Baird,2007

Relativity theory has become one of the icons of Twentieth Century science. It's reckoned to be a difficult subject, taught as a layered series of increasingly difficult mathematics and increasingly abstract concepts. We're told that relativity theory is supposed to be this complicated and counter-intuitive. But how much of this historical complexity is really necessary? Can we bypass the interpretations and paradoxes and pseudoparadoxes of Einstein's special theory and jump directly to a deeper and more intuitive description of reality? What if curvature is a fundamental part of physics, and a final theory of relativity shouldn't reduce to Einstein's flat 1905 theory //on principle//? Relativity... takes us on a whistlestop tour of Twentieth Century physics - from black holes, quantum mechanics, wormholes and the Big Bang to the workings of the human mind, and asks: what would physics look like without special relativity? 394 printed pages, 234156 mm, 200 figures and illustrations, includes bibliography and

**The Oxford Handbook of Venture Capital** Douglas Cumming, 2012-04-20 Venture capital (VC) refers to investments provided to early-stage, innovative, and high growth start-up companies. A common characteristic of all venture capital investments is that investee companies do not have cash flows to pay interest on debt or dividends on equity. Rather, investments are made with a view towards capital gain on exit. The most sought after exit routes are an initial public offering (IPO), where a company lists on a stock exchange for the first time, and an acquisition exit (trade sale), where the company is sold in entirety to another company. However, VCs often exit their investments by secondary sales, wherein the entrepreneur retains his or her share but the VC sells to another company or investor buybacks, where the entrepreneur repurchases the VC's interest and write-offs (liquidations). The Oxford Handbook of Venture Capital provides a comprehensive picture of all the issues dealing with the structure, governance, and performance of venture capital from a global perspective. The handbook comprises contributions from 55 authors currently based in 12 different countries.
