Inherently Governmental Functions Craig A. Montey,2011 An inherently governmental function is one that, as a matter of law and policy, must be performed by federal government employees and cannot be contracted out because it is intimately related to the public interest. This book provides background, issues and options for Congress on defining inherently governmental functions within the context of DOD operations. It situates contemporary debates over which functions are inherently governmental within the context of the broader debate about the proper roles of the public and private sectors.

The Greatest Comeback Patrick J. Buchanan,2014-07-08 Patrick J. Buchanan, bestselling author and senior advisor to Richard Nixon, tells the definitive story of Nixon's resurrection from the political graveyard and his rise to the presidency. After suffering stinging defeats in the 1960 presidential election against John F. Kennedy, and in the 1962 California gubernatorial election, Nixon's career was declared dead by Washington press and politicians alike. Yet on January 20, 1969, just six years after he had said his political life was over, Nixon would stand taking the oath of office as 37th President of the United States. How did Richard Nixon resurrect a ruined career and reunite a shattered and fractured Republican Party to capture the White House? In *The Greatest Comeback*, Patrick J. Buchanan--who, beginning in January 1966, served as one of two staff members to Nixon, and would become a senior advisor in the White House after 1968--gives a firsthand account of those crucial years in which Nixon reversed his political fortunes during a decade marked by civil rights protests, social revolution, The Vietnam War, the assassinations of JFK, RFK, and Martin Luther King, urban riots, campus anarchy, and the rise of the New Left. Using over 1,000 of his own personal memos to Nixon, with Nixon's scribbled replies back, Buchanan gives readers an insider's view as Nixon gathers the warring factions of the Republican party--from the conservative base of Barry Goldwater to the liberal wing of Nelson Rockefeller and George Romney, to the New Right legions of an ascendant Ronald Reagan--into the victorious coalition that won him the White House. How Richard Nixon united the party behind him may offer insights into how the Republican Party today can bring together its warring factions. *The Greatest Comeback* is an intimate portrayal of the 37th President and a fascinating fly on-the-wall account of one of the most remarkable American political stories of the 20th century.

South African National HIV Prevalence, HIV Incidence, Behaviour and Communication Survey, 2005 Olive Shisana,2005 A follow-up to the Nelson Mandela Foundation's 2002 national household survey of HIV/AIDS prevalence in South Africa, this 2005 report seeks to provide further understanding of the HIV pandemic. Using data that tested for HIV incidence rather than just using mortality statistics, this study looks at which socio-demographic groups are most vulnerab≤ whether new policies have been successful in fighting the disease; what exactly is being done by key players, such as the government, churches, and other civil society organizations; and how the spread of HIV can be reduced in South Africa.

The Tibetan Policy Act of 2002 Congressional Research Congressional Research Service,2015-06-22 The Tibetan Policy Act of 2002 (TPA) is a core legislative measure guiding U.S. policy toward Tibet. Its stated purpose is to support the aspirations of the Tibetan people to safeguard their distinct identity. Among other provisions, the TPA establishes in statute the State Department position of Special Coordinator for Tibetan Issues and defines the Special Coordinator's central objective as being to promote substantive dialogue between the government of the People's Republic of China and Tibet's exiled spiritual leader, the Dalai Lama, or his representatives. The Special Coordinator is also required, among other duties, to coordinate United States Government policies, programs, and projects concerning Tibet; vigorously promote the policy of seeking to protect the distinct religious, cultural, linguistic, and national identity of Tibet; and press for improved respect for human rights.

Nelson Mandela/HSRC Study of HIV/AIDS Human Sciences Research Council,2002 Over 20 years ago Acquired Immune Deficiency Syndrome (AIDS) was first documented and more than 15 years ago HIV was first identified as a causative agent for AIDS. Since then, the epidemic has spread throughout the world, but at an uneven pace. It is estimated that more than 60 million people worldwide have lived with HIV/AIDS since the beginning of the epidemic and 20 million of these have died (UNAIDS 2002). HIV/AIDS now affects every country in the world. Despite advances made in knowledge about HIV prevention, the disease continues to spread. Globally, sub-Saharan Africa is the most severely affected, with the Southern African Development Community (SADC) being home to half of the estimated 24 million people living with HIV/AIDS in this region (UNAIDS 2000). Country level estimates of HIV infection are usually based on surveys of women attending antenatal clinics. In South Africa over the past decade, this has been the primary means of monitoring the spread of HIV. Antenatal surveillance systems provide countries with a low-cost tool for regularly monitoring key aspects of the HIV epidemic. For example, the data can be used to track the epidemic in different parts of a country or among a specific age cohort. The antenatal survey's major usefulness is to track trends of HIV infections over time.

Activities in Action Phyllis M. Foster,2014-01-14 Here is an invaluable resource for activities professionals specializing in geriatrics. *Activities in Action* reflects the goals of the National Association of Activity Professionals in that it serves as a catalyst for professional and personal growth and provides a national forum on geriatric and activity issues. Some of the highlights of this significant volume include a historical perspective of the activities profession, its growth and current contributions to the life and care of nursing home residents, and an overview of a national organization representing activities professional and how this organization has contributed to the growth of the profession. An extensive aging and leisure bibliography of timely publications related to activities and aging is also included. Specific chapters emphasize a variety of topics such as the impact of federally mandated nursing home resident assessment for activity professionals; the growing concern for the quality of life and its definition for nursing home inhabitants; the role of activity professionals in providing for the spiritual needs of the elderly whom they serve; how to deal with relocation stress and territoriality in nursing home occupants; and practical guidelines on how to employ and supervise activity assistants and work effectively with other staff as well as an activity coordinator. Activities directors, coordinators, assistants, and supervisors from all levels of experience will benefit from the insightful information in this innovative book.

Visualizing Data Patterns with Micromaps Daniel B. Carr,Linda Williams Pickle,2010-04-29 After more than 15 years of development drawing on research in cognitive psychology, statistical graphics, computer science, and cartography, micromap designs are becoming part of mainstream statistical visualizations. Bringing together the research of two leaders in this field, *Visualizing Data Patterns with Micromaps* presents the many design variations and applications of micromaps, which link statistical information to an organized set of small maps. This full-color book helps readers simultaneously explore the statistical and geographic patterns in their data. After illustrating the three main types of micromaps, the authors summarize the research behind the design of visualization tools that support exploration and communication of spatial data

patterns. They then explain how these research findings can be applied to micromap designs in general and detail the specifics involved with linked, conditioned, and comparative micromap designs. To compare and contrast their purposes, limitations, and strengths, the final chapter applies all three of these techniques to the same demographic data for Louisiana before and after Hurricanes Katrina and Rita. Supplementary website Offering numerous ancillary features, the book’s website at <http://mason.gmu.edu/~dcarr/Micromaps/> provides many boundary files and real data sets that address topics, such species biodiversity and alcoholism. One complete folder of data examples presents cancer statistics, risk factors, and demographic data. The site includes CCmaps, the dynamic implementation of conditioned micromaps written in Java, as well as a link to a generalized micromaps program. It also contains R functions and scripts for linked and comparative micromaps, enabling re-creation of all the corresponding examples in the book.

The Many Faces of Corruption J. Edgardo Campos, Sanjay Pradhan, 2007-04-04 Corruption... How can policymakers and practitioners better comprehend the many forms and shapes that this socialpandemic takes? From the delivery of essential drugs, the reduction in teacher absenteeism, the containment of illegal logging, the construction of roads, the provision of water andelectricity, the international trade in oil and gas, the conduct of public budgeting and procurement, and the management of public revenues, corruption shows its many faces. 'The Many Faces of Corruption' attempts to bring greater clarity to the often murky manifestations of this virulent and debilitating social disease. It explores the use of prototype road maps to identify corruption vulnerabilities, suggests corresponding 'warning signals,' and proposes operationally useful remedial measures in each of several selected sectors and for a selected sampleof cross cutting public sector functions that are particularlyprone to corruption and that are critical to sector performance.Numerous technical experts have come together in this effort to develop an operationally useful approach to diagnosing and tackling corruption. 'The Many Faces of Corruption' is an invaluable reference for policymakers, practitioners, andresearchers engaged in the business of development.

The Handbook of Business and Corruption Michael S. Aßländer, Sarah Hudson, 2017-09-13 The Handbook of Business and Corruption provides an overview of corrupt business practices in general and, more particularly, in different industry sectors, considering such practices from an ethical perspective.

Patterns in Play Graeme MacDonald Boone, 1999-01-01 The relationship between text and music is a central issue in fifteenth-century music studies. Decades of research and performance have failed to provide clear answers to the most basic questions, such as which notes go with which syllables and why. Patterns in Play focuses on the early French songs of Guillaume Dufay and proposes a basis for determining some rules of common procedure for interpreting both underlay and style. Graeme M. Boone examines questions of rhythm and declamation, considering mensuration, linguistic and poetic prosody, and prosody in song. The first three chapters comprise a set of discussions preliminary to close rhythmic analysis of Dufay?s texted song melodies. Beginning with mensural rhythm and proceeding to poetics and the relationship between Dufay?s poetic and musical rhythms and musical declamation, Boone examines the musical features of rhythm, melody, tonal organization, counterpoint, text setting, and text expression. Offering fresh insight into the issues he raises, Boone clarifies the relationship between underlay and style and provides a better understanding of the technical and aesthetic issues that Dufay and other composers faced in weaving their patterns of song.
