*Wright Panorama*, 2010 Wright Panorama amplifies the artistry of Frank Lloyd Wright's architecture with expanse. In the more than 140 Tom Schiff panoramic photographs contained in Wright Panorama, Schiff reveals nearly eighty extant buildings in Wright's oeuvre from a unique perspective. Wright Panorama exhibits the great architect's prolific, varied, and iconic body of work, pulling from it a new shape and offering it renewed appeal. Eric Lloyd Wright's compelling foreword to Wright Panorama introduces Tom Schiff and four noteworthy Frank Lloyd Wright scholars Cara Armstrong, Scott W. Perkins, Margo Stipe, and Marta Wojcik. Since Wright's architecture embraced his strong belief in and respect for Nature, these scholars draw from this and contribute essays from a new nature-centric perspective. They further our understanding of the ways each of the natural elements earth, air, fire, and water influences Wright's life and work. In addition, these four essays utilize Schiff's images to more fully illustrate the involvement of the natural elements on Wright's organic architecture. In his preface to Wright Panorama, Schiff conveys his desire to acknowledge the true as well as extend our framework of seeing, of vision. Schiff likes that his panoramic photography is true to the landscape as seen by the naked eye and is both expansive and challenging. He sees the resulting panoramic image in Wright Panorama as a unique way to see Frank Lloyd Wright's interiors and exteriors, from all vantage points, in one image. Wright Panorama is a continual discovery: A new way of viewing, a new way of discovering the architecture of Frank Lloyd Wright.

Beijing 360 Tamas D. Varga,Zemin Yu,2008-03-01 The author would like with this photoalbum to acquaint visitors with the capital of China and reacquaint the citizens who already know the city well with some famous sites. Since not all of them have the making of a good scene for panoramic photograph, his album does not follow the common and perhaps expected themes of similar endeavours. That's why there are some lesser known details and atmosphere in the book, on the other hand this makes it even more exciting and interesting. Each panoramic photo has an explanatory text that provides new knowledges about sites, events or habits.

**It's Time!** Bruce Buffer,2013-05-14 If you're reading these words, chances are that you, like me, are a fan of the great sport we call MMA. And if you're a fan, then you probably recognize my face. Yeah, that's right—I'm that guy you see at every UFC match, spinning around and roaring into the microphone and getting up in fighters' grills. Okay, so I might not be the most subtle or refined announcer in the business. But I hope I communicate my passion for the sport in a way no other announcer does. I'll say it again: Passion. Because that's what this book is about. In these pages, I want to tell you about the passion that first led me to bet everything on this sport of ours, way back when MMA was outlawed in half the country and there wasn't a dime to be made on it. I want to tell you how that passion all started, with my larger-than-life father, a former Marine Drill Sergeant who, by the time I was ten, had taught me to play poker and blackjack, field-strip a Luger pistol blindfolded, and recite poetry. He was a man who thought nothing of

confronting a group of thugs armed with nothing but his fists—and who expected the same strength and honor from his sons. I want to take you inside the incredible brotherhood that makes up the UFC as nobody ever has before, to tell you about the bond we all share and the crazy times I’ve had over the years with guys like Randy Couture, Tito Ortiz, Chuck Liddell, BJ Penn, and Jon “Bones” Jones. I want to give you my Octagon-side insights on many of the big fights you remember, and just maybe, to tell you about a few memorable fights that took place outside of the octagon, too—from my own sparring match with a youngster named Royce Gracie back before the phrase “Mixed Martial Arts” even existed, to some other brawls you might’ve heard about. And I want to tell you about the remarkable, late-life meeting with the celebrity brother I never knew I had—a brother whose existence my parents had never once breathed a word about!—that helped inspire me to chase my own dreams of standing up in the Octagon. Surprising stuff from the guy in the fancy tux, right? And that’s just the start. There’s a lot you don’t know about me yet. And now... IT’S TIME! I told you.

**A 360-Degree View of IoT Technologies** John Soldatos, 2020-12-31 This exciting book explores the past, present and future of IoT, presenting the most prominent technologies that comprise IoT applications, including cloud computing, edge computing, embedded computing, Big Data, Artificial Intelligence (AI), blockchain and cybersecurity. A comprehensive description of the full range of the building blocks that comprise emerging IoT systems and applications is provided, while illustrating the evolution of IoT systems from the legacy small scale sensor systems and wireless sensor networks, to today’s large scale IoT deployments that comprise millions of connected devices in the cloud and smart objects with (semi)autonomous behavior. It also provides an outlook for the future evolution of IoT systems, based on their blending with AI and the use of emerging technologies like blockchain for massively decentralized applications. The full spectrum of technologies that are closely associated with the term IoT since its introduction are explored. The book also highlights the main challenges that are associated with the development and deployment of IoT applications at scale, including network connectivity, security, and interoperability challenges. First tech sensors, wireless sensor networks and radio-frequency identification (RFID) tags are covered. Machine learning, big data and security issues are also explored.

**Heidelberg** Barbara Roder, Hartmut Röder, Norbert Marewski, Helga Neubauer, 2009-01-01 Experience the fascinating world of panoramic photography. This volume shows the romantic University town of Heidelberg, with its baroque style Old Town and its countless sights. Poets and artists were inspired by this incomparable backdrop even back in the 19th century and help Heidelberg to establish itself as one of the places at the heart of

German romanticism. Today the city is one of the most visited in Germany. The famous castle ruins and the attractive banks of the Neckar River, the picturesque Old Town, its 1.6 km long pedestrian mall -- one of the longest in Europe -- beckon visitors to take extensive stroll and linger. Countless cafés and restaurants in the lively Old Town lanes invite for tasting traditional local specialities. The town is framed by the hills of the Königstuhl, Gaisberg and Heiligenberg with lookout points offering fantastic views of the town, the Neckar and the castle. These 360° views photographed by Hartmut Röder give you the unique opportunity to see Heidelberg and its magnificent sights at a glance.

**Jeff Wall and the Concept of the Picture** Naomi Merritt, 2020-12-30 This book grapples with fundamental questions about the evolving nature of pictorial representation, and the role photography has played in this ongoing process. These issues are explored through a close analysis of key themes that underpin the photography practice of Canadian artist Jeff Wall and through examining important works that have defined his oeuvre. Wall's strategic revival of 'the picture' has had a resounding influence on the development of contemporary art photography, by expanding the conceptual and technical frameworks of the medium and introducing a self-reflexive criticality. Naomi Merritt brings a new and original contribution to the scholarship on one of the most significant figures to have shaped the course of contemporary art photography since the 1970s and shines a light on the multilayered connections between photography and art. This book will be of interest to scholars in the history of photography, art and visual culture, and contemporary art history.

*The Camera Phone Book* Aimee Baldrige, 2007-06-12 Marketing experts predict that by 2009, nearly 90% of all cell phones will contain a camera, as manufacturers race to create cheaper, easier-to-use models with more sophisticated cameras, more pixels, flash units and even multiple lenses. Already revolutionizing audiovisual communication, it's a trend that will only grow more explosively—and who better than National Geographic to create a

how-to book aimed directly at the millions who carry a camera phone everywhere and want to make the most of it? Created by two top professionals, this generously illustrated nuts-and-bolts guide is the first of its kind to treat these units as genuine cameras instead of novelties, and the only one to include a full-color photo-essay demonstrating the full capabilities of the latest camera phones. In five easy-to-read chapters, the book explains how to choose good equipment; take better pictures; and store, print and send the best images. Readers will find practical tips on preventing or repairing water damage, protecting easily-scratched lenses inside pockets and purses, and retrieving accidentally-erased images. They'll also learn to access the events, advice, and opportunities of the burgeoning camera phone community, from film festivals to news organizations, moblogs, and more. Featuring the technical savvy of CNet.com's Aimee Baldrige and the creative skill of National Geographic photographer Robert Clark, a camera phone pioneer, this compact yet comprehensive reference combines up-to-the-minute expertise with superb examples, at an inexpensive price that makes it a perfect gift book—or an ideal impulse buy.

*Vienna* Helga Neubauer, Wolfgang Vorbeck, 2006 Immerse yourself in the fascinating world of 360° panoramic photographs by Werner Weiler. Breathtaking images, which can be unfolded to a width of over one metre, captivate the beholder. This volume takes you to Vienna, a city renowned for its music and hospitality. This city's special atmosphere, its magnificent architecture from the period when it was the former capital of the Hapsburg Empire and the home of many important artists can be enjoyed in these panoramic views. Wolfgang Amadeus Mozart wrote his most famous operas in Vienna and Johann Strauss was inspired to compose his Danube waltzes. As you enter the city, you are greeted with 'Vienna is different'.

*Hamburg* Helga Neubauer, Wolfgang Vorbeck, 2007-03 Presents the world of 360 panoramic photographs. This volume shows Hamburg, the commercial metropolis on the mouth of the river Elbe, City Hall Square, the Alster river at the heart of the city, the Alsterarkaden, Kehrwiederspitz, the park Planten und Blomen, the Fish Market, and, Reeperbahn.
