ANNO 2023 L'AMBIENTE TERZA PARTE ANTONIO

GIANGRANDE, Antonio Giangrande, orgoglioso di essere diverso. ODIÒ OSTENTAZIONE, IMPOSIZIONE E MENZOGNA. Si nasce senza volerlo. Si muore senza volerlo. Si vive una vita di prese per il culo. Tu esisti se la tv ti considera. La Tv esiste se tu la guardi. I Fatti son fatti oggettivi naturali e rimangono tali. Le Opinioni sono atti soggettivi cangianti. Le opinioni se sono oggetto di discussione ed approfondimento, diventano testimonianze. Ergo: Fatti. Con me le Opinioni cangianti e contrapposte diventano fatti. Con me la Cronaca diventa Storia. Noi siamo quello che altri hanno voluto che diventassimo. Facciamo in modo che diventiamo quello che noi avremmo (rafforzativo di saremmo) voluto diventare.

Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italiani. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

Intelligent Transport Systems Ana Lucia Martins,Joao C.

Ferreira,Alexander Kocian,Ulpan Tokkozhina,Berit Irene

Helgheim,Svein Bråthen,2023-12-11 This book constitutes the

refereed proceedings of the 7th International Conference on

Intelligent Transport Systems, INTSYS 2023, held in Molde,

Norway, during September 6-7, 2023. With the globalization of

trade and transportation and the consequent multi-modal solutions

used, additional challenges are faced by organizations and

countries. Intelligent Transport Systems make transport safer, more

efficient, and more sustainable by applying information and

communication technologies to all transportation modes. The 14 full

papers included in this book were carefully reviewed and selected

from 39 submissions and are organized in three thematic sessions

on transportation; smart cities and blockchain; networks.

Cyber-Physical Security for Critical Infrastructures Protection

Habtam Abie, Silvio Ranise, Luca Verderame, Enrico Cambiaso, Rita Ugarelli, Gabriele Giunta, Isabel Praça, Federica Battisti, 2021-03-21

This book constitutes the refereed proceedings of the First International Workshop on Cyber-Physical Security for Critical

Infrastructures Protection, CPS4CIP 2020, which was organized in conjunction with the European Symposium on Research in Computer Security, ESORICS 2020, and held online on September 2020. The 14 full papers presented in this volume were carefully reviewed and selected from 24 submissions. They were organized in topical sections named: security threat intelligence; data anomaly detection: predict and prevent; computer vision and dataset for security; security management and governance; and impact propagation and power traffic analysis. The book contains 6 chapters which are available open access under a CC-BY license.

Extreme Events in Geospace Natalia Buzulukova, 2017-12-01
Extreme Events in Geospace: Origins, Predictability, and Consequences helps deepen the understanding, description, and forecasting of the complex and inter-related phenomena of extreme space weather events. Composed of chapters written by representatives from many different institutions and fields of space research, the book offers discussions ranging from definitions and historical knowledge to operational issues and methods of analysis. Given that extremes in ionizing radiation, ionospheric irregularities, and geomagnetically induced currents may have the potential to disrupt our technologies or pose danger to human health, it is

increasingly important to synthesize the information available on not only those consequences but also the origins and predictability of such events. *Extreme Events in Geospace: Origins, Predictability, and Consequences* is a valuable source for providing the latest research for geophysicists and space weather scientists, as well as industries impacted by space weather events, including GNSS satellites and radio communication, power grids, aviation, and human spaceflight. The list of first/second authors includes M. Hapgood, N. Gopalswamy, K.D. Leka, G. Barnes, Yu. Yermolaev, P. Riley, S. Sharma, G. Lakhina, B. Tsurutani, C. Ngwira, A. Pulkkinen, J. Love, P. Bedrosian, N. Buzulukova, M. Sitnov, W. Denig, M. Panasyuk, R. Hajra, D. Ferguson, S. Lai, L. Narici, K. Tobiska, G. Gapirov, A. Mannucci, T. Fuller-Rowell, X. Yue, G. Crowley, R. Redmon, V. Airapetian, D. Boteler, M. MacAlester, S. Worman, D. Neudegg, and M. Ishii. Helps to define extremes in space weather and describes existing methods of analysis
Discusses current scientific understanding of these events and outlines future challenges
Considers the ways in which space weather may affect daily life
Demonstrates deep connections between astrophysics, heliophysics, and space weather applications, including a discussion of extreme space weather

events from the past Examines national and space policy issues concerning space weather in Australia, Canada, Japan, the United Kingdom, and the United States

The Secret Society of Moses Flavio Barbiero, 2010-01-19 A radical reexamination of Western history that suggests the descendants of Moses were the architects of the rise of the Roman Church and the ancestors of European aristocracy • Answers the inexplicable disappearance of all mention of Moses's descendants from the Bible • Reveals the key role played by Josephus Flavius in shaping early Christianity • Explains the connection of this secret priesthood to modern secret societies like the Freemasons After the book of Exodus, Moses's two sons and numerous descendants all vanish from the Bible. Flavio Barbiero's investigation of this strange absence and his study of the centuries-long power struggle between the priestly families fighting for control of the Temple of Jerusalem starts with the rebellion against Rome--and the emergence of Josephus Flavius, one of Moses's descendants, on the world stage. In AD 70 when the Temple in Jerusalem was destroyed by Titus Flavius and thousands of Jewish priests were exterminated, Josephus, now bearing his sponsor's last name, followed Titus Flavius to Rome with at least 250

relatives and friends. Here they were made Roman citizens but then subsequently disappeared from recorded history. Barbiero's careful study of early Christianity shows, however, that these surviving members of Moses's high-priest lineage succeeded in taking control of the nascent Roman Church and masterminded its extraordinary success. Using a wide range of evidence drawn from fields as disparate as archaeology, heraldry, and genetics, Barbiero shows how these descendants of Moses used the cult of Mithras to eventually seize control of the secular Roman authority as well. He then follows, step by step, the spread of the members of this secret priestly elite into what was to become the aristocracy of medieval Europe and how their influence continues to be felt in modern secret societies like Freemasonry.

Smart and Sustainable Planning for Cities and Regions

Adriano Bisello, Daniele Vettorato, Pierre Laconte, Simona Costa, 2018-04-25 This book comprises a selection of the top contributions presented at the second international conference "Smart and Sustainable Planning for Cities and Regions 2017", held in March 2017 in Bolzano, Italy. Featuring forty-six papers by policy-makers, academics and consultants, it discusses current groundbreaking research in smart and sustainable planning,

including the progress made in overcoming cities' challenges towards improving the quality of life. Climate change adaptation and mitigation of global warming, generally identified as drivers of global policies, are just the “tip of the iceberg” when it comes to smart energy transition. Indeed, equally relevant towards this current transformation – and key topics in this volume – are ICTs, public spaces and society; next economy for the city; strategies and actions for good governance; urban-rural innovation; rethinking mobility. The book's depth in understanding and insightfulness in re-thinking demonstrate the breaking of new ground in smart and sustainable planning. A new ground that policy-makers, academics and consultants may build upon as a bedrock for smart and sustainable planning.

Spillway Design – Step by Step Geraldo Magela

Pereira, 2020-01-20 Most dam accidents with hydroelectric plants are due to under-dimensioning of the maximum floods of spillway design, causing extravasation and dam breaks (this occurs in 23% of the accidents). This work highlights the relationship between spillway design and potential dam failure and other important aspects of these structures and presents the methodology of design based on the international experience on the subject. The

book covers river basin studies and floods (the geology, geomorphology, hydrology, hydraulics, and layouts of the works). Further, spillway function, capacity and design flood, layouts, or arrangements, of hydroelectric works and types of spillways are treated in the book. Finally, the book discusses examples of dams that broke due to insufficient spillway capacity. The book is intended for engineers and the companies that design dams and power plants around the world, as well as students in dam and hydraulic engineering. In short, people interested in producing electricity that is clean and potentially cheaper than other sources.

INRA feeding system for ruminants INRA,2023-11-27 The INRA Feeding System for Ruminants has been renewed to better address emerging challenges for animal nutrition: prevision of productive responses, product quality, animal health and emissions to the environment, in a larger extent of breeding contexts. The new system is mainly built from meta-analyses of large data bases, and modelling. The dietary supply model accounts for digestive interactions and flows of individual nutrients, so that feed values depend on the final ration. Animal requirements account for variability in metabolic efficiency. Various productive and non-productive animal responses to diets are quantified. This book

presents the whole system for dairy and meat, large and small ruminant production, including specificities for tropical and Mediterranean areas. The first two sections present biological concepts and equations (with their field of application and statistical accuracy) used to predict intake (including at grazing) and nutrient supply (Section 1), animal's requirements and multiple responses to diets (Section 2). They apply to net energy, metabolisable protein and amino acids, water, minerals and vitamins. Section 3 presents the use of concepts and equations in rationing with two purposes: (1) diet calculation for a given performance objective; and (2) prediction of the multiple responses of animal to diet changes. Section 4 displays the tables of feed values, and their prevision. All the equations and concepts are embedded in the fifth version of INRAtion® software for practical use.

Smart and Sustainable Planning for Cities and Regions
Adriano Bisello,Daniele Vettorato,Richard Stephens,Pietro
Elisei,2016-11-03 This book presents cutting-edge work on
innovative planning methodologies, tools and experiences aimed at
supporting the transition of our cities and regions towards a more
smart and sustainable dimension. This book comprises a selection
of the best papers presented at the international conference
“Smart and Sustainable Planning for Cities and Regions 2015”,
held in November 2015 in Bolzano, Italy. Contributions from
different research fields within urban and regional planning from the
scientific as well as the professional community are presented:
energy planning for cities and regions, how to couple the energy-
climate goals with the development or renovation of the built
environment and how to tackle the vulnerability to climate change;
smart and sustainable technologies, big data, integrated
infrastructures and mobility management, from holistic geospatial

tools to innovative apps and Internet of Things; benefits, costs and opportunities of urban transition toward a more smart and sustainable dimension, accounting and assessment of values and trade-offs within the decision making processes; governance for smart and sustainable growth, fostering place-based policy-making, active and effective stakeholders' participation, co-production and public-private partnerships; cooperation and demonstration projects: their role in fostering the adoption of new approaches and technologies, towards the development of win-win solutions.

Geoinformatics in Citizen Science Gloria Bordogna, 2019-07-01

The book features contributions that report original research in the theoretical, technological, and social aspects of geoinformation methods, as applied to supporting citizen science. Specifically, the book focuses on the technological aspects of the field and their application toward the recruitment of volunteers and the collection, management, and analysis of geotagged information to support volunteer involvement in scientific projects. Internationally renowned research groups share research in three areas: First, the key methods of geoinformatics within citizen science initiatives to support scientists in discovering new knowledge in specific application domains or in performing relevant activities, such as

reliable geodata filtering, management, analysis, synthesis, sharing, and visualization; second, the critical aspects of citizen science initiatives that call for emerging or novel approaches of geoinformatics to acquire and handle geoinformation; and third, novel geoinformatics research that could serve in support of citizen science.

Antarctic Comrades Gilbert Dewart, 1989 *Antarctic Comrades* chronicles an American scientist's adventure with a Soviet research team in 1960. This book is Gilbert Dewart's description of the work accomplished at the Mirnyy research station and of a four-month summertime trek inland to Vostok, another Soviet station in the coldest part of Antarctica. It illuminates an event during the Eisenhower/Kennedy/Khrushchev era, an early attempt at glasnost, and the evolution of the international scientific community.
