Combining the challenge of maze-solving, the look of three dimensional rendering, and the fascination of optical illusions! While most traditional mazes are two-dimensional, these mazes go beyond the bounds of flat surfaces. Not only are they three-dimensional, but their paths meander from one side to another, providing an intriguing look! Each maze is uniquely constructed, having its own special design and characteristics. While your mind attempts to adjust to each optical illusion, each maze will hold your interest as you attempt to solve them! You will definitely find this to be a one-of-a-kind, amazing, maze-solving experience!

Hypogene Karst Regions and Caves of the World

Alexander Klimchouk,Arthur N. Palmer,Jo De Waele,Augusto S. Auler,Philippe Audra,2017-08-17 This book illustrates the diversity of hypogene speleogenetic processes and void-conduit patterns depending on variations of the geological environments by presenting regional and cave-specific case studies. The cases include both well-known and newly recognized hypogene karst regions and caves of the world. They all focus on geological, hydrogeological, geodynamical and evolutionary contexts of hypogene speleogenesis. The last decade has witnessed the boost in recognition of the possibility, global occurrence, and practical importance of hypogene karstification (speleogenesis), i.e. the development of solutional porosity and permeability by upwelling flow, independent of recharge from the overlying or immediately adjacent surface. Hypogene karst has been identified and documented in many regions where it was previously overlooked or misinterpreted. The book enriches the basis for generalization and categorization of hypogene karst and thus improves our ability to adequately model hypogene karstification and predict related porosity and permeability. It is a book which benefits every researcher, student, and practitioner dealing with karst.
