3D Cardiology in Small Animals Pablo Gómez Ochoa, Iván Sosa Samper, 2020-08-27 T00:00:00+02:00 This is a pioneering book in veterinary medicine. The reader will be able to visualise what really is happening in a diseased heart. Through three-dimensional representation and augmented reality, every disorder can be seen, almost touching the 3D model above the book. In addition, the changes in blood flow produced by the pathologies can be visualised, bringing the reader even closer to the pathophysiological reality. The text addresses the major points of pathophysiology and diagnostic keys for the most common diseases, and the illustrations and pictures are a bridge between the 3D models and the text. Thus, the book succeeds in joining diagnosis, and particularly a test such as echocardiography, with the understanding of the pathophysiology.

Rapid Prototyping in Cardiac Disease Kanwal Majeed Farooqi, 2017-04-26 This book provides an overview of the use of rapid prototyping in patients with cardiac pathology. With the exponential increase in the use of prototyping, or 3D printing technology, medical applications are becoming more widespread across specialties. Although medical centers are beginning to apply this technology for improved patient care, there is no single text to which specialists can refer for guidance about this emerging modality. The book discusses the use of rapid prototyping in medicine; model creation; image acquisition; rapid prototyping techniques; applications in congenital and structural heart disease; and development and management of a rapid prototyping service. The use of rapid prototyping for pre-procedural planning in patients with cardiac disorders such as septal defects, Tetralogy of Fallot, transcatheter aortic valve replacement, and ventricular assist devices and heart transplant significantly enhances visualization of cardiovascular anatomy. Rapid Prototyping in Cardiac Disease is a unique and valuable resource for cardiac imaging specialists, cardiothoracic surgeons, radiologists, and biomedical engineers.
