The Digital Academic Deborah Lupton,Inger Mewburn,Pat Thomson,2017-08-07 Academic work, like many other professional occupations, has increasingly become digitised. This book brings together leading scholars who examine the impacts, possibilities, politics and drawbacks of working

in the contemporary university, using digital technologies. Contributors take a critical perspective in identifying the implications of digitisation for the future of higher education, academic publishing protocols and platforms and academic employment conditions, the ways in which academics engage in their everyday work and as public scholars and relationships with students and other academics. The book includes accounts of using digital media and technologies as part of academic practice across teaching, research administration and scholarship endeavours, as well as theoretical perspectives. The contributors span the spectrum of early to established career academics and are based in education, research administration, sociology, digital humanities, media and communication.

CALL for widening participation: short papers from EUROCALL 2020 Karen-Margrete Frederiksen, Sanne Larsen, Linda Bradley, Sylvie Thouësny, 2020-12-14 Despite the Covid-19 pandemic, the EUROCALL society succeeded in holding the 28th EUROCALL conference, EUROCALL2020, on 20-21 August as an online, two-day gathering. The transition process required to make this happen was demanding and insightful for everyone involved, and, in many ways, a logical consequence of the core content and purpose of EUROCALL. Who would be better suited to transform an onsite conference into an online event than EUROCALL? CALL for widening participation was this year's theme. We welcomed contributions from both theoretical and practical perspectives in relation to the many forms and contexts of CALL. We particularly welcomed longitudinal studies or studies that revisited earlier studies. The academic committee accepted 300 abstracts for paper presentations, symposia, workshops, and posters under this theme; 57 short papers are published in this volume. We hope you will enjoy reading this volume, the first one to reflect a one hundred percent online EUROCALL conference/Online Gathering.

K-8 Digital Citizenship Curriculum Ask a Tech Teacher, 2019-09-21 9 grade levels. 17 topics. 46 lessons. 46 projects. A year-long curriculum that covers everything you need to discuss on internet safety and efficiency. Digital Citizenship—probably one of the most important topics students will learn between kindergarten and 8th and too often, teachers are thrown into it without a roadmap. Well, here it is—your guide to what our children must know at what age to thrive in the community called the internet. It's a roadmap for blending all pieces into a cohesive, effective student-directed cyber-learning experience that accomplishes ISTE's general goals

Pete the Cat: Old MacDonald Had a Farm James Dean, 2014-02-18 Join Pete, from New York

Times bestselling author James Dean's Pete the Cat picture-book series, as he visits a farm in this groovy version of the classic children's song Old MacDonald Had a Farm. Children will love singing along—e-i-e-i-o!—with Pete the Cat.

Taking Your Android Tablets to the Max Russell Holly, 2012-06-12 The march of the Android-based tablets has begun, including Galaxy Samsung Tab, Motorola XOOM, Nook and more. But where do you start? And what can you do with an Android tablet? Taking Your Android Tablets to the Max is a one-stop shop for users of all skill levels, helping you get the most out of any Android tablet. This book offers: A breakdown of the differences between an Android 2.0+ or an Android 3.0 device Tips for choosing the best device for you and how to best network (i.e., best wireless carrier for 3G or 4G or just WIFI) Detailed walkthroughs on how to get the most out of your tablet and the apps for it

Don't Pee on My Leg and Tell Me It's Raining Judy Sheindlin, 1997-01-10 font COLOR=#000000 FACE=MS Sans Serif SIZE=1 in we get some reality in here?[]sks Judy Sheindlin, former supervising judge for Manhattan Family Court. For twenty-four years she has laid down the law as she understands it: ● If you want to eat, you have to work. ● If you have children, you'd better support them. If you break the law, you have to pay. If you tap the public purse, you'd better be accountable. Now she abandons all judicial restraint in a scathing critique of the system - filled with realistic hard-nosed alternatives to our bloated welfare bureaucracy and our soft-on-crime laws.

The Saddest Words: William Faulkner's Civil War Michael Gorra, 2020-08-25 A New York Times Notable Book of 2020 How do we read William Faulkner in the twenty-first century? asks Michael Gorra, in this reconsideration of Faulkner's life and legacy. William Faulkner, one of

America's most iconic writers, is an author who defies easy interpretation. Born in 1897 in Mississippi, Faulkner wrote such classic novels as *Absolom, Absolom!* and *The Sound and The Fury*, creating in Yoknapatawpha county one of the most memorable gallery of characters ever assembled in American literature. Yet, as acclaimed literary critic Michael Gorra explains, Faulkner has sustained justified criticism for his failures of racial nuance—his ventriloquism of black characters and his rendering of race relations in a largely unreconstructed South—demanding that we reevaluate the Nobel laureate's life and legacy in the twenty-first century, as we reexamine the junctures of race and literature in works that once rested firmly in the American canon.

Interweaving biography, literary criticism, and rich travelogue, *The Saddest Words* argues that even despite these contradictions—and perhaps because of them—William Faulkner still needs to be read, and even more, remains central to understanding the contradictions inherent in the American experience itself. Evoking Faulkner's biography and his literary characters, Gorra illuminates what Faulkner maintained was "the South's curse and its separate destiny," a class and racial system built on slavery that was devastated during the Civil War and was reimagined thereafter through the South's revanchism. Driven by currents of violence, a "Lost Cause" romanticism not only defined Faulkner's twentieth century but now even our own age. Through Gorra's critical lens, Faulkner's mythic Yoknapatawpha County comes alive as his imagined land finds itself entwined in America's history, the characters wrestling with the ghosts of a past that refuses to stay buried, stuck in an unending cycle between those two saddest words, "was" and "again." Upending previous critical traditions, *The Saddest Words* returns Faulkner to his sociopolitical context, revealing the civil war within him and proving that "the real war lies not only in the physical combat, but also in the war after the war, the war over its memory and meaning." Filled with vignettes of Civil War battles and

generals, vivid scenes from Gorra's travels through the South—including Faulkner's Oxford, Mississippi—and commentaries on Faulkner's fiction, *The Saddest Words* is a mesmerizing work of literary thought that recontextualizes Faulkner in light of the most plangent cultural issues facing America today.

Ben and Holly's Little Kingdom: Heroes to the Rescue! ,2017-07-06 Join everyone's favourite Little Kingdom characters in an epic superhero adventure! Ben, Holly and their friends play a game where they become superheroes and supervillains. But Strawberry takes her role as the evil Ice Queen a little too far . . . Can Ben and Holly thaw out the ice-covered Little Kingdom and save the day?

Computational Thinking Education Siu-Cheung Kong,Harold Abelson,2019-07-04 This This book is open access under a CC BY 4.0 license.This book offers a comprehensive guide, covering every important aspect of computational thinking education. It provides an in-depth discussion of computational thinking, including the notion of perceiving computational thinking practices as ways of mapping models from the abstraction of data and process structures to natural phenomena. Further, it explores how computational thinking education is implemented in different regions, and how computational thinking is being integrated into subject learning in K-12 education. In closing, it discusses computational thinking from the perspective of STEM education, the use of video games to teach computational thinking, and how computational thinking is helping to transform the quality of the workforce in the textile and apparel industry.

Swipe to Unlock Neel Mehta,Parth Detroja,Aditya Agashe,2017 WANT A NON-CODING JOB AT A TECH COMPANY? Interested in product management, marketing, strategy, or business

development? The tech industry is the place to be: nontechnical employees at tech companies outnumber their engineering counterparts almost 3 to 1 (Forbes, 2017). You might be worried that your lack of coding skills or tech industry knowledge will hold you back. But here's the secret: you don't need to learn how to code to break into the tech industry. Written by three former Microsoft PMs, *Swipe to Unlock* gives you a breakdown of the concepts you need to know to crush your interviews, like software development, big data, and internet security. We'll explain how Google's ad targeting algorithm works, but Google probably won't ask you how to explain it in a non-technical interview. But they might ask you how you could increase ad revenue from a particular market segment. And if you know how Google's ad platform works, you'll be in a far stronger position to come up with good growth strategies. We'll show you how Robinhood, an app that lets you trade stocks without commission, makes money by earning interest on the unspent money that users keep in their accounts. No one will ask you to explain this. But if someone asks you to come up with a new monetization strategy for Venmo (which lets you send and receive money without fees), you could pull out the Robinhood anecdote to propose that Venmo earn interest off the money sitting in users' accounts. We'll talk about some business cases like why Microsoft acquired LinkedIn. Microsoft interviewers probably won't ask you about the motive of the purchase, but they might ask you for ideas to improve Microsoft Outlook. From our case study, you'll learn how the Microsoft and LinkedIn ecosystems could work together, which can help you craft creative, impactful answers. You could propose that Outlook use LinkedIn's social graph to give salespeople insights about clients before meeting them. Or you could suggest linking Outlook's organizational tree to LinkedIn to let HR managers analyze their company's hierarchy and figure out what kind of talent they need to add. (We'll further explore both ideas in the book.) Either way, you're sure to impress. Learn the must

know concepts of tech from authors who have received job offers for Facebook's Rotational Product Manager, Google's Associate Product Marketing Manager, and Microsoft's Program Manager to get a competitive edge at your interviews!

With the End in Mind Kathryn Mannix, 2018-01-16 For readers of Atul Gawande and Paul Kalanithi, a palliative care doctor's breathtaking stories from 30 years spent caring for the dying. Modern medical technology is allowing us to live longer and fuller lives than ever before. And for the most part, that is good news. But with changes in the way we understand medicine come changes in the way we understand death. Once a familiar, peaceful, and gentle -- if sorrowful -- transition, death has come to be something from which we shield our eyes, as we prefer to fight desperately against it rather than accept its inevitability. Dr. Kathryn Mannix has studied and practiced palliative care for thirty years. In *With the End in Mind*, she shares beautifully crafted stories from a lifetime of caring for the dying, and makes a compelling case for the therapeutic power of approaching death not with trepidation, but with openness, clarity, and understanding. Weaving the details of her own experiences as a caregiver through stories of her patients, their families, and their distinctive lives, Dr. Mannix reacquaints us with the universal, but deeply personal, process of dying. With insightful meditations on life, death, and the space between them, *With the End in Mind* describes the possibility of meeting death gently, with forethought and preparation, and shows the unexpected beauty, dignity, and profound humanity of life coming to an end.

Foundations of GTK+ Development Andrew Krause, 2007-09-09 There are only two mainstream solutions for building the graphical interface of Linux-based desktop applications, and GTK+ (GIMP Toolkit) is one of them. It is a necessary technology for all Linux programmers. This book guides the reader through the complexities of GTK+, laying the groundwork that allows the reader to make the

leap from novice to professional. Beginning with an overview of key topics such as widget choice, placement, and behavior, readers move on to learn about more advanced issues. Replete with real-world examples, the developer can quickly take advantages of the concepts presented within to begin building his own projects.
