Engaging Chinese Students in Teaching and Learning at Western Higher Education Institutions Karen Burrows,2016-09-23 There has been an increase over the past decade in the number of Chinese students studying in western Higher Education Institutions, with figures expected to increase over the next 10 years. However, this has proved particularly challenging for the lecturers in these Institutions regarding how best to engage and teach this particularly unique student group. The Chinese student presents these challenges due to the many cultural and language differences that can be identified, as well as to the western teacher's perception of how these students like to be taught. This book disputes such myths, and provide a useful guide on what those challenges are, offering practical guidance on how to overcome them. The book firstly identifies and defines the Chinese student studying for a degree in western universities and institutions, before going on to examine and explore the cultural differences by discussing issues around

teaching and learning. A chapter focusing specifically on language breaks down the differences in detail, with discussions around tonal language and its impact on the student's understanding. Further chapters discuss attitudes to learning, staff support for teaching this particular group, and, finally, some practical suggestions on how best to engage the student and enable them to achieve.

Health Assessment and Physical Examination Mary Ellen Zator Estes, Pauline Calleja, Karen Theobald, Theresa Harvey, 2019-10-24 Health assessment is an ongoing process that evaluates the whole person as a physical, psychosocial and functional being, whether they are young or old, well or ill. This market-leading text presents health assessment, physical examination information and skills for health professionals who undertake these types of assessments. Health Assessment and Physical Examination is scaffolded from foundation to more advanced health assessment, following a body-systems approach and a

‘head-to-toe’ approach. It uses the ENAP (Examine–Normal–Abnormal–Pathophysiology) approach as a tool for students to collect useful information. An applied case study at the end of each chapter walks students through an example of an assessment. This comprehensive yet student-friendly text is noted for its high-quality case studies, pedagogical elements, and excellent student resources. Unique to this text are the advanced topics and ‘Urgent findings’, which highlights serious or life-threatening signs or critical assessment findings that need immediate attention.
