

48 Historical Sacred Sites Of The World

Dr John Schofield, Wayne Cocroft

Religious Tourism and Pilgrimage Management, 2nd

Edition Razaq Raj, Kevin A Griffin, 2015-09-24 Within the past 10 years 'Religious Tourism' has seen both economic and education-sector growth on a global scale. This book addresses the central role of religious tourism and interrelationships with other aspects of pilgrimage management. It provides practical applications, models and illustrations and looks at secular and sacred spaces on a global stage. The second edition sees the introduction of a new structure and the addition of new international case studies. It is an invaluable reference for academics, students and practitioners and is a timely text on the future of faith-based tourism and pilgrimage.

Spiritual Places Antony Mason, 2014 50 of the most spectacular holy sites in the world.

Sacred Places Europe Brad Olsen, 2007-02-01 Combining current trends, academic theories, and historical insights, this travel guide brings both lesser-known and famous European spiritual locales into perspective by explaining the significance of each sacred site. The cultural relevance, history, and spirituality of each site—including Stonehenge, the Acropolis, Mont Saint Michel, Pompeii, and Saint Peter's Basilica—are explained, creating a moving and artistic travel experience. Each destination—with selections spanning more than 15 countries throughout Europe—is accompanied by easy-to-follow maps and directions.

Sacred Sites, Sacred Places David L. Carmichael, Jane Hubert, Brian Reeves, Audhild Schanche, 2013-04-15 *Sacred Sites, Sacred Places* explores the concept of 'sacred' and what it means and implies to people in differing cultures. It looks at why people regard some parts of the land as special and why this ascription remains constant in some cultures and changes in others. Archaeologists, legislators and those involved in heritage management sometimes encounter conflict with local populations

over sacred sites. With the aid of over 70 illustrations the book examines the extreme importance of such sacred places in all cultures and the necessity of accommodating those intimate beliefs which are such a vital part of ongoing cultural identity. Sacred Sites, Sacred Places therefore will be of help to those who wish to be non-destructive in their conservation and excavation practices. This book is unique in attempting to describe the belief systems surrounding the existence of sacred sites, and at the same time bringing such beliefs and practices into relationship with the practical problems of everyday heritage management. The geographical coverage of the book is exceptionally wide and its variety of contributors, including indigenous peoples, archaeologists and heritage professionals, is unrivalled in any other publication.

Sacred Sites and Sacred Stories Across Cultures David W. Kim, 2021-01-18 This book offers global perspectives from Mediterranean, Asian, Australian, and American cultures on sacred sites and their related stories in regional history. Contemporary society witnesses many travelers visiting sacred sites (temples, mountains, castles, churches, houses) throughout the world. These visits often involve discovery of new historical facts through the origin stories of the associated tribe, region, or nation. The transmission of oral tradition and myth carries on the significant meaning of those religious sites. This volume unveils multi-angle perspectives of symbolic and mystical places. The contributors describe the religio-political experiences of each regional case, and analyze the religiosity of local people as a lens through which readers can re-examine the concept of iconography, syncretism, and materialism. In addition, contributors interpret the growth of new religions as the alternative perspectives of anti-traditional religions. This new approach offers significant insight into comprehending the practical agony and sorrow of regional people in the context of contemporary history.

Sacred Places of a Lifetime National Geographic, 2008 A listing of five hundred sites new and old, famous and unknown, that have been used to connect humanity with its gods.

Jerusalem Roberto Copello, 2010-10 Enigmatic, extremely ancient and yet ultramodern, a wonderful mix of cultures where history fills the air, Jerusalem is said to be the city that most powerfully feels the breath of God. In this place the center of the universe according to belief systems of the Middle Ages sacred sites and splendid temples stand just yards apart from each other, making this city the spiritual and religious heart of the world for two-thirds of humanity. Jerusalem is the capital of the three great monotheistic religions of Judaism, Christianity and Islam all of whose followers are children of Abraham and the followers of a single God.

The Turks in World History Carter V. Findley, 2005 Traces the Turkic peoples' trajectory from steppe, to empire, to nation-state. Unifying cultural, economic, social, and political history, this work illuminates the projection of Turkic identity across space and time and the profound transformations marked successively by the Turks' entry into Islam and into modernity.

Managing Religious Tourism Maureen Griffiths, Peter Wiltshier, 2019-02-08 Managing Religious Tourism provides a global view of the tools and resources used in demand and supply management, in the context of pilgrimage and religious tourism. With a focus on toolkits and best practices, the book reinforces the quality of service provision and offers a reflection on consumers' perspectives and what drives their purchasing decisions with regards to a variety of destinations. These central themes are complemented by an understanding of management responses to consumer behaviour and mobility, accessibility, individualism and tourism for both sacred and secular purposes. The book also examines the ways in which networks, partnerships and the conceptual stakeholder approach can be employed by religious tourism suppliers working with destination management

organisations. The text promotes sustainable development and a triple bottom line focus, with all chapters supporting policy for framing development. Key features include: - Global perspective on tools as well as management approaches and techniques. - Emphasis on sustainability in connecting sacred and secular consumers. - Focus on promoting learning and development within this important tourism sector.

Religion and Tourism Michael Stausberg, 2012-11-12 This book explores the dynamic interaction between religion and tourism in the modern world. It considers questions such as: do travellers leave their religion at home when they are touring - and what happens if not? what are the relationships between tourism and pilgrimage? what happens to religious performances, places and festivals that function as tourism attractions? Other chapters examine religious theme parks, wellness and spa tourism, the roles played by tourist guides, guidebooks and religious souvenirs, and the role of tourism as a major arena of religious encounters in the contemporary world. Surveying the growing body of work in the field, Michael Stausberg argues that tourism should be a major focus of research within religious studies.

Living Ruins Philippe Erikson, Valentina Vapnarsky, 2022-10-14 Ruins and remnants of the past are endowed with life, rather than mere relics handed down from previous generations. *Living Ruins* explores some of the ways Indigenous people relate to the material remains of human activity and provides an informed and critical stance that nuances and contests institutionalized patrimonialization discourse on vestiges of the past in present landscapes. Ten case studies from the Maya region, Amazonia, and the Andes detail and contextualize narratives, rituals, and a range of practices and attitudes toward different kinds of vestiges. The chapters engage with recently debated issues such as regimes of historicity and knowledge, cultural landscapes, conceptions of personhood and

ancestrality, artifacts, and materiality. They focus on Indigenous perspectives rather than mainstream narratives such as those mediated by UNESCO, Hollywood, travel agents, and sometimes even academics. The contributions provide critical analyses alongside a multifaceted account of how people relate to the place/time nexus, expanding our understanding of different ontological conceptualizations of the past and their significance in the present. *Living Ruins* adds to the lively body of work on the invention of tradition, Indigenous claims on their lands and history, “retrospective ethnogenesis,” and neo-Indianism in a world where tourism, NGOs, and Western essentialism are changing Indigenous attitudes and representations. This book is significant to anyone interested in cultural heritage studies, Amerindian spirituality, and Indigenous engagement with archaeological sites in Latin America. Secrets of Ancient and Sacred Places Paul

Devereaux, 1992

Sacred Sites Susan Sontree, 2020-06 A history that is equal parts science and mythology, *Sacred Sites* offers a rare and poetic vision of a world composed of dynamic natural forces and mythic characters. The result is a singular and memorable account of the evolution of the Southern California landscape, reflecting the riches of both Native knowledge and Western scientific thought. Beginning with Western science, poet Susan Sontree carries readers from the Big Bang to the present as she describes the origins of the universe, the shifting of tectonic plates, and an evolving array of plants and animals that give Southern California its unique features today. She tells of the migration of humans into the region, where they settled, and how they lived. Complementing this narrative and reflecting Native peoples' view

of their own history and way of life, Suntree recounts the creation myths and songs that tell the story of the First People and of unforgettable shamans and heroes. Featuring contemporary photographs of rarely seen landmarks along with meticulous research, *Sacred Sites* provides unusual insight into how natural history and mythology and scientific and intuitive thinking combine to create an ever-deepening sense of a place and its people.

Sacred Sites and the Colonial Encounter Sandra E.

Greene, 2002-05-14 Greene gives the reader a vivid sense of the Anlo encounter with western thought and Christian beliefs . . . and the resulting erasures, transferences, adaptations, and alterations in their perceptions of place, space, and the body.

—Emmanuel Akyeampong Sandra E. Greene reconstructs a vivid and convincing portrait of the human and physical environment of the 19th-century Anlo-Ewe people of Ghana and brings history and memory into contemporary context. Drawing on her extensive fieldwork, early European accounts, and missionary archives and publications, Greene shows how ideas from outside forced sacred and spiritual meanings associated with particular bodies of water, burial sites, sacred towns, and the human body itself to change in favor of more scientific and regulatory views. Anlo responses to these colonial ideas involved considerable resistance, and, over time, the Anlo began to attribute selective, varied, and often contradictory meanings to the body and the spaces they inhabited. Despite these multiple meanings, Greene shows that the Anlo were successful in forging a consensus on how to manage their identity, environment, and community.

Cultural Heritage and Tourism in Japan Takamitsu

Jimura, 2021-08-15 This book offers a comprehensive understanding of cultural heritage in Japan and its relationship with both domestic and international tourism. Japan has witnessed an increase in tourism, with rising visitor numbers to both established destinations and lesser known sites. This has

generated greater attention towards various aspects of Japanese culture, heritage and society. This book explores these diverse aspects of everyday life in Japan and their interconnections with tourism. It begins with a conceptual framework of key theories related to heritage and tourism, serving as a useful apparatus for further discussions in the following chapters. Each chapter studies a specific aspect of Japan's cultural heritage, from the history of Japan, the development of war sites, such as Hiroshima and Nagasaki, to tourist destinations, indigenous communities and their places of residence, festivals such as matsuri, to popular culture and media. Each chapter discusses a certain type of cultural heritage first in a global context and then examines it in a Japanese context, aiming to demonstrate the relation between these two different contexts. In each chapter, furthermore, how a particular kind of Japan's cultural heritage is utilised as tourism resources and how it is perceived and consumed by international and domestic tourists are discussed. Finally, the book revisits the conceptual framework to suggest future directions for cultural heritage and tourism in Japan. Written in an informative and accessible style, this book will be of interest to scholars, students and practitioners in the fields of tourism, cultural studies and heritage studies.

Historic Places of Worship Paul D. Buchanan, 1999

Includes Prine William's Parish Church and Sheldon Church from Beaufort County.

Managing Outdoor Recreation, 2nd Edition Robert E Manning, Laura E Anderson, Peter Pettengill, 2017-03-24 This fully updated second edition presents a conceptual framework of outdoor recreation management in the form of a series of management matrices. It then illustrates this framework through new and updated case studies in the US national parks, and concludes with the principles of outdoor recreation management. *Managing Outdoor Recreation, 2nd Edition* is an essential resource for undergraduate and graduate students of parks,

outdoor recreation and related subjects, as well as a helpful tool for practitioners.

Historical Archeology of Tourism in Yellowstone National Park Annalies Corbin, Matthew Russell, 2009-12-01 Far too often in the field of archeology, the wheel of understanding and insight has a narrow focus that fails to recognize critical studies. Crucial information regarding pivotal archeological investigations at a variety of sites worldwide is extremely difficult, if not impossible, to obtain. The majority of archeological analysis and reporting, at best, has limited publication. The majority of archeological reports are rarely seen and when published are often only in obscure or out-of-print journals - the reports are almost as hard to find as the archeological sites themselves. There is a desperate need to pull seminal archeological writings together into single issue or thematic volumes. It is the intention of this series, *When the Land Meets the Sea*, to address this problem as it relates to archeological work that encompasses both terrestrial and underwater archeology on a single site or on a collection of related sites. For example, despite the fact that we know that bays and waterways structured historic settlement, there is a lack of archeological literature that looks at both the nautical and terrestrial signatures of watersheds in influence on historic culture.

A Fearsome Heritage Dr John Schofield, Wayne Cocroft, 2016-07-08 From massive nuclear test sites to the more subtle material realities of everyday life, the influence of the Cold War on modern culture has been profound and global. *Fearsome Legacies* unites innovative work on the interpretation and management of Cold War heritage from fields including archaeology, history, art and architecture, and cultural studies. Contributors understand material culture in its broadest sense, examining objects in outer space, domestic space, landscapes, and artistic spaces. They tackle interpretive challenges and controversies, including in museum exhibits, heritage sites, archaeological sites, and other historic and public venues. With

over 150 color photos and illustrations, including a photographic essay, readers can feel the profound visual impact of this material culture.

ARCHAEOLOGY TO DELIGHT AND INSTRUCT Heather Burke, 2007-01-15 This book presents novel and interesting ways of teaching archaeological concepts and processes to college and university students. Seeking alternatives to the formal lecture format, the various contributions seek better ways of communicating the complexities of human behavior and of engaging students in active learning about the past. This collection of imaginative exercises designed by 20 master instructors on three continents includes role-playing, games, simulations, activities, and performance, all designed to teach archaeological concepts in interesting and engaging ways.
