RUN Fitzgerald Matt, 2010-05-24 Most serious runners don't realize their potential. They simply stop getting faster and don't understand why. The reason is simple: most runners are unable to run by feel. The best elite runners have learned that the key to faster running is to hear what their bodies are telling them. Drawing on new research on endurance sports, best-selling author Matt Fitzgerald explores the practices of elite runners to explain why their techniques can be effective for all runners. RUN: The Mind-Body Method of Running by Feel will help runners reach their full potential by teaching them how to train in the most personalized and adaptable way. Fitzgerald's mind-body method will revolutionize how runners think about training, their personal limits, and their potential. RUN explains how to interpret emotional and physical messages like confidence, enjoyment, fatigue, suffering, and aches and pains. RUN guides readers toward the optimal balance of intensity and enjoyment, volume and recovery, repetition and variation. As the miles add up, runners will become increasingly confident that they are doing the right training on the right day, from one season to the next. RUN marks the start of a better way to train. Hansons Marathon Method Humphrey Luke, 2012-11-27 In Hansons Marathon Method, the coaches of the Hansons-Brooks Distance Project reveal the methods they've used to turn their runners into race winners, national champions, and Olympians. Hansons Marathon Method offers a radical overhaul of marathon training that promises to turn any runner into a true marathoner and help experienced marathoners set new personal bests. Hansons Marathon Method does away with mega-long runs and high-mileage weekends--two outdated traditions that make most runners miserable. Instead, runners using the Hansons method will gradually build up to the moderate-high mileage required for marathon success, spreading those miles more sensibly throughout the week. Running

easy days mixed with precisely paced speed, strength, and tempo workouts, runners will steel their bodies and minds to run the hardest miles of the marathon. Both Beginner and Advanced training programs feature the unique Hansons 16-mile long run which, as part of the Hansons program, is ideal for preparing the body for the marathon. Humphrey explains how runners should set their goal race pace and shows how to customize the Hansons method to their own needs, like adding extra racing, running more miles, and handling training interruptions. Detailed nutrition and hydration chapters help runners pinpoint their personal energy and hydration needs so they know precisely how much to eat and drink during workouts, race week, race day, and for recovery. The Hansons approach to pacing and nutrition means marathoners will never hit the wall. Hansons Marathon Method lays out the smartest marathon training program available from one of the most accomplished running groups in the nation. Using this innovative approach, runners will mold real marathon muscles, train their body to never hit the wall, and prepare to run their fastest marathon.

Runner's World Run Less Run Faster Bill Pierce, Scott Murr, 2021-01-19 Finally, runners at all levels can improve their race times while training less, with the revolutionary Furman Institute of Running and Scientific Training (FIRST) program. Hailed by the Wall Street Journal and featured twice in six months in cover stories in Runner's World magazine, FIRST's unique training philosophy makes running easier and more accessible, limits overtraining and burnout, and substantially cuts the risk of injury, while producing faster race times. The key feature is the 3 plus 2 program, which each week consists of: -3 quality runs, including track repeats, the tempo run, and the long run, which are designed to work together to improve endurance, lactate-threshold running pace, and leg speed -2 aerobic cross-training workouts, such as swimming, rowing, or pedaling a stationary bike, which are designed to improve endurance while helping to avoid burnout With detailed training plans for 5K, 10K, half marathon, and marathon, plus tips for goal-setting, rest, recovery, injury rehab and prevention,

strength training, and nutrition, this program will change the way runners think about and train for competitive races. Start Running! A 5k Training Schedule for Beginners Tony Yang,2012-05-30 You can run a 5K. All you need is 30 minutes three to four times a week. Really. You've taken the first step, by reading this book. Perhaps you've already signed up for a 5K, and don't have the faintest idea what that entails. Perhaps you're setting a personal or professional goal, or you need to get fit for health reasons. Or perhaps, like many, you're sick of being out of breath, tired, and generally feeling uninspired. Much of running is mental, and as long as you keep putting one foot in front of the other, you will succeed in running a 5K.

Running to the Edge Matthew Futterman,2020-04-14 The story of visionary American running coach Bob Larsen's mismatched team of elite California runners who would win championships and Olympic glory in a decades-long pursuit of the epic run. In the dusty hills above San Diego, Bob

Larsen became America's greatest running coach. *Running to the Edge* is a riveting account of Larsen's journey, and his quest to discover the unorthodox training secrets that would lead American runners to breakthroughs never imagined. Futterman interweaves the dramatic stories of Larsen's runners with a fascinating discourse on the science behind human running, as well as a personal running narrative that follows Futterman's own checkered love-affair with the sport. The result is a narrative that will speak to every runner, a story of Larsen's triumphs--from high school cross-country meets to the founding of the cult-favorite, 70's running group, the Jamul Toads; from his long tenure as head coach at UCLA to the secret training regimen of world champion athletes like Larsen's protégé, Meb Keflezighi. *Running to the Edge* is a page-turner . . . a relentless crusade to run faster, farther.
