My Net Worth Shot Up To 6-Figures After Deleting My TikTok, Snapchat, Facebook, Twitter, and Instagram Accounts Malik McCotter Jordan, 2021-06-17
Look, I'm not about to put you through the hassle of reading a long sales pitch disguised as a book description in order to get you to buy this book. You're either going to buy the book or you're not. No, this isn't reverse psychology. I'm not doing any mind tricks to get you to buy this book. I'm just being transparent. This book contains my personal story on how social media affected my life and I share what I did to reach a 6-figure net worth. This book is not for everybody. You're in luck if you enjoy short books, because this is only 10 chapters long. Each chapter is short as well. It didn't take long for me to write this book, because I lived everything that I wrote about in it. So when you buy this book, you'll notice that I get straight to the point and I give you my take on social media's impact on society. In the last chapter I share with you my entire portfolio that is worth 6-figures. This is so you know that I'm not lying to you and I'm not an imposter selling you success for a quick buck. None of this was easy to do by the way. I just want to make that clear. So yeah, don't get your hopes up. I understand that not everyone would be interested in giving up social media in order to change their financial situation for the better. Like I said in the first paragraph, you're either going to buy the book or you're not. Hope this doesn't come off as rude. I just don't want to waste your time. 6 Figures and Beyond Rob Sperry, 2021-09-20 My passion for sharing and collaborating inspired me to create a series 6 FIGURES AND BEYOND is not a book for those who want to merely survive in the network marketing space. This book is geared towards giving you a blueprint on how to make figures annually. No, this book won't tell you to grind your face off and sleep when you are dead. No, this book will not tell you to just believe more. This book will give you tactical strategies all from different authors who have walked the walk. These co-authors have ALL made over 6 figures annually and each will give you their top-secret to achieving the 6 figure mark. These books serve as sources of knowledge, experience, and connection. I have hand-selected top names in the industry to collaborate on the book you are reading or listening to right now. The authors in this book will share actionable steps that you can take in your business today that could ultimately lead to your success. For example, one of the authors in this book told me, I was close to the top rank in the company but felt completely stuck. Nothing my sponsor said helped. It wasn't until I read your very first collaboration book that my huge breakthrough came. She implemented what she learned from

that book, and success quickly followed. This book is here to help you achieve six figures and beyond. As I read through the book, I was taking notes! There are some valuable lessons and tools that you can use starting today. But you have to be willing to commit and take action. Six-figure businesses don't happen by themselves. It takes people like you who are eager to get to work and keep working until it happens. We know you can do it, and we want to help you do it - that's a powerful combination. You won't find That Guy among any of these authors. All you will find are fantastic minds ready to share their secrets to help you have your next breakthrough success.

One-hour a Day to 6 Figures Robyn Crane, Steve Napolitan, Trevor Crane, 2017-03-15 THIS BOOK IS FOR YOU. Learn how just ONE HOUR A DAY, can help you generate your first, and soon multiple 6 figure income. Stop wasting your time. Stop wasting your energy. Inside these pages, you'll discover ten simple steps to help you make money and advance your career, business or cause. If you have ever wanted to know 'exactly' what to do to increase your income, make more sales, this book will be a POWERFUL resource for you. This book will help you STOP wasting on time on non-money making activities, and will show you step-by-step what to do to create your first 6 figures, or sooner than you will believe, multiple 6 figures. You will learn PRECISELY what to do for just ONE HOUR A DAY to start seeing results. When you use this process, you will be able to increase your leads, sales and revenue forever. Let's face it: Everybody is busy. Most business owners and sales people are incredibly 'inefficient' with their time, when if they just focused on a few very powerful and proven steps... they could 10x their results! Over decades, the three co-authors of this book, Trevor, Robyn and Steve, have all have used this specific system to get BIG results in incredibly short amount of time. What you'll find inside this book, is not just what WORKS, but even more important WHAT DOESN'T WORK. If you're not absolutely, 100 percent sure about how to most effectively and efficiently spend your time to grow your business, and/or you feel like you don't have enough time for business development, and/or you're just not getting the results you want, this book is for you. PROFITS GUARANTEED: (Well not really.) In fact, if you don't do anything with the information we're providing for you in this book, then you'll get exactly nothing. Maybe, you'll get even less than that. However, if you use what we share with you, this book will transform your approach to how you spend your time, the stages of your sales process, and your profits will skyrocket. If you're ready to sell a lot more of your good or services, more easily, with a profound competitive advantage then... THIS BOOK IS FOR YOU.

Sourcing Unique Components in the Electro-Mechanical Engineering Industry from Chinese Suppliers Andreas Martin Radke, 2008-05-14 Diploma Thesis from the year 2007 in the subject Engineering - Industrial Engineering and Management, grade: 1,0, University Karlsruhe (TH) (Institut für Produktionstechnik - wbk), 50 entries in the bibliography, language: English, abstract: Sourcing relatively simple standardized commodity-like items from Chinese suppliers already poses considerable sourcing challenges. But methodologies and best-practice guidelines exist to identify Chinese suppliers, to develop them, and to establish a global supply chain. However, the case of sourcing unique components from Chinese suppliers is not widely published in the academic literature. Unique components are complex from an engineering point of view, and they are ordered in low volume. Based on a

multiple-case study in the electromechanical engineering industry, the result of this thesis is a best-practice guideline for sourcing unique components from Chinese suppliers. The guideline addresses the involvement of different functions including quality assurance with the Chinese supplier, and it shows the different approaches the case companies take for selecting the suppliers. Also, the companies' production management is addressed. The conclusion is that there are two promising approaches depending on the customer's requirements. One approach is to outsource engineering and manufacturing as far as possible, the other is to engage in a close buyer-supplier-relationship.

Industrial and Agricultural Process Heat Information User Study William W. Belew,1981 This report describes the results of a series of telephone interviews with groups of users of information on solar industrial and agricultural process heat (IAPH). These results, part of a larger study on many different solar technologies, identify types of information each group needed and the best ways to get information to each group. The report is one of ten discussing study results. Results from ten IAPH groups of respondents are analyzed in this report: IPH researchers; APH researchers; representatives of manufacturers of concentrating and nonconcentrating collectors; plant, industrial, and agricultural engineers; educators; representatives of state agricultural offices; and county extension agents.

Marketing on the Internet and the implications of new technologies Bernd Anderer,1999-01-25 Inhaltsangabe:Abstract: Electronic Commerce, once thought of as futuristic buzzwords, is becoming a commonly used term. International newspapers, magazines, and the electronic media mention at least some forecast or news related to this subject on a daily basis. Nevertheless, a look at the growing numbers of consulting companies, that offer a variety of services relating to Electronic Commerce reveals the immense uncertainty companies are experiencing about what exactly Electronic Commerce is, and how they can implement it. While it seems that the importance of this issue in the business environment is widely accepted in the US, a recent study from Andersen Consulting (Andersen, 1998) shows that among European senior executives only 19% regard Electronic Commerce as a serious competitive threat to their business. Furthermore, only 39% are taking steps today to incorporate Electronic Commerce into their current operational strategies. There is a number of factors contributing to the wait-and-see attitude taken by executives and consumers as well. Executives tend to view the rise of Electronic Commerce as an external business environment issue, while consumers are concerned about security issues. These are still common views in the US. In European countries, a cultural problem stemming from a slowly changing and stable business environment adds to that problem. Fear of failing by trying a new approach, in most cases, overshadows the willingness to take new risks. Nevertheless, the uncertainty about the changes implied by Electronic Commerce are far-reaching and can be found in any country. With the increasing importance of the Internet, the business environment, as well as other areas in society, is about to fundamentally change. Old paradigms are no longer working in the evolving new business world, sometimes called digital economy. Electronic Commerce is the keyword that tries to capture the new paradigms which are not even clear yet. The only thing that is reliable and predictable about Electronic Commerce and the new economy, is change.

Never before was it more important to be flexible and willing to take risks by trying new approaches. As businesses like to operate in a predictable environment where planning the future is easy, it becomes very difficult to adapt to the pace of change. Not only do businesses need new strategies, they also need to constantly reinvent themselves. Businesses need to realize, that it becomes necessary to accept [...]

The Role of Innovations Created in the Internationalization Process for Company Performance Adam Dymitrowski, 2014 It is commonly believed that innovations are crucial in company's activity. The significance of the role that is assigned to the issue of innovation is confirmed by numerous scientific research studies that indicate the existence of a link between innovativeness and company performance. In terms of the dynamically progressing process of globalization it seems that the relationship between innovation and company performance should be examined in the context of entities participating in international expansion. The process of internationalization may influence the creation of innovations by enterprises and at the same time the achieved results. Despite many literature publications in the field of economics and management, concerning internationalization and innovations, there is a small number of publications describing the influence of internationalization on the innovation activities of enterprises in a comprehensive manner. Likewise, there is no answer to the question on how the innovations created in the process of internationalization influence the results of companies. Due to the identification of a substantial research gap, this book undertakes an attempt at determining the manner in which internationalization affects the process of enterprises creating innovations and ascertaining their impact on company results. The conclusions presented in the book may be used by researchers representing many fields of science and be the subject of interest to the representatives of business practice. In addition, it is one of the few domestic and foreign studies concerning the innovations created in the process of internationalization.

Beginning SharePoint 2007 Amanda Murphy, Shane Perran, 2011-08-08 Microsoft Office SharePoint Server 2007 has improved and changed dramatically over previous versions of the product. The capabilities of the platform have expanded greatly with the inclusion of an automated workflow engine, web content management capabilities, and a vast number of document management enhancements. However, the value of this tool to an enterprise will depend primarily on the ability of individuals in the organization to understand the features and capabilities of the platform and effectively map those to specific business requirements. This book is designed to mentor and coach business and technical leaders in an organization on the use of SharePoint to address critical information management problems. It gives detailed descriptions and illustrations of the product's functionality and also includes realistic usage scenarios to provide contextual relevance and a personalized learning experience to the reader. The mission of this book is to provide extensive knowledge to information workers and site managers that will empower them to become SharePoint Application champions in the

organization. This book should be the premiere handbook of any active or aspiring SharePoint expert. To complete the exercises in this book, you should have a basic comfort level using Microsoft Office application to create content and a general understanding of how to interact with a web site through the browser. This book is intended as a starting point for any SharePoint 2007 user whether that user has never used SharePoint before or has some familiarity with a previous version and just wants to understand the differences with the new release.

"Yahoo!" - A case study about brand valuation Leonie Matzick,Katrin Küsters,Torsten Krall,Thomas Kuhn,Gerhard Schumacher,2008-09-15 Research Paper (undergraduate) from the year 2008 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1,0, Avans+ Hogeschool B.V., Breda (Verwaltungs- und Wirtschaftsakademie, Krefeld), course: Bachelor of Business Administration, 93 entries in the bibliography, language: English, abstract: First of all, the following chapter will deal with the framework of brand evaluation. To give an idea of the internet service provider Yahoo!, the company will be introduced in the first part. The next part concentrates on the role an established brand plays and what effect it has. The following chapter will point out what it means to lead a brand and which value it has to a company. As a matter of course, the conclusions will be related to the special case of Yahoo!. To provide a general survey of the topic of brand evaluation, the next chapter deals with the economical and judicial frame. It explains the situation within the topic of intangible assets and their special treatment concerning the balance sheet. In Chapter 2.4.2 the different causes for brand evaluation will be described and the cause of acquisition will be determined as the appropriate cause for the present case of Yahoo!. Chapter 2.5 concentrates on the necessary requirements for a sufficient and objective brand evaluation, especially in the case of acquisition. Before three of the most important and established methods of brand evaluation will be analysed, the large number of all current methods have to be categorised. For that reason the third chapter will start with the classification of methods. After regarding the three possible categories, the last part will come to the decision for just one category, which comes into question for the present case.(...) After these three analyses, it is possible to overlook the whole topic of brand evaluation. Chapter 2.5 defines the general requirements for an objective method of brand evaluation. The following chapters will survey three of the most popular models and will point out their advantages and disadvantages. In the result conclusions can be drawn from the accomplished analyses. In this way a new suitable method of calculation will be developed in Chapter 4.2. It is a try to find a solution for the problem of the current methods' weaknesses and to create an objective method, which regards the most important criteria and fulfils the requirements for an impartial evaluation.
