**Public Speaking for Success** Dale Carnegie, 2006-05-04 Dale Carnegie, author of the legendary *How to Win Friends and Influence People*, began his career as the premier life coach of the twentieth century by teaching the art of public speaking. Public speaking, as Carnegie saw it, is a vital skill that can be attained through basic and repeated steps. His classic volume on the subject appeared in 1926 and was revised twice—in shortened versions—in 1956 and 1962. This 2006 revision—edited by a longtime consultant to Dale Carnegie & Associates, Inc., and the editor in charge of updating *How to Win Friends and Influence People*—is the definitive one for our era. While up-to-date in its language and points of reference, *Public Speaking for Success* preserves the full range of ideas and methods that appeared in the original: including

Carnegie's complete speech and diction exercises, which follow each chapter, as the author originally designated them. This edition restores Carnegie's original appendix of the three complete self-help classics: Acres of Diamonds by Russell H. Conwell, As a Man Thinketh by James Allen, and A Message to Garcia by Elbert Hubbard. Carnegie included these essays in his original edition because, although they do not directly relate to public speaking, he felt they would be of great value to the readers. Here is the definitive update of the best-loved public-speaking book of all time.

**Social Media in Trinidad** Jolynna Sinanan, 2017-11-21 Drawing on 15 months of ethnographic research in one of the most under-developed regions in the Caribbean island of Trinidad, this book describes the uses and consequences of social media for its residents. Jolynna Sinanan argues that this semi-urban town is a place in-between: somewhere city dwellers look down on and villagers look up to. The complex identity of the town is expressed through uses of social media, with significant results for understanding social media

more generally. Not elevating oneself above others is one of the core values of the town, and social media becomes a tool for social visibility; that is, the process of how social norms come to be and how they are negotiated. Carnival logic and high-impact visuality is pervasive in uses of social media, even if Carnival is not embraced by all Trinidadians in the town and results in presenting oneself and association with different groups in varying ways. The study also has surprising results in how residents are explicitly non-activist and align themselves with everyday values of maintaining good relationships in a small town, rather than espousing more worldly or cosmopolitan values.

**Army Leadership (ADRP 6-22)** Department Army, 2012-09-28 Army doctrine reference publication (ADRP) 6-22 expands on the leadership principles established in Army doctrine publication (ADP) 6-22. ADRP 6-22 describes the Army's view of leadership, outlines the levels of leadership (direct, organizational, and strategic), and describes the attributes and core leader competencies across all levels. The principal audience for ADRP 6-22 is all leaders, military and civilian. Trainers and educators throughout the Army will also use this publication. Commanders, staffs, and subordinates ensure their decisions and actions comply with applicable United States, international, and, in some cases, host-nation laws and regulations. Commanders at all levels ensure their Soldiers operate in accordance with the law of war and the rules of engagement (see Field Manual [FM] 27-10). ADRP 6-22 uses joint terms where applicable. Selected joint and Army terms and definitions appear in both the glossary and the text. For definitions shown in the text, the term is italicized and the number of the proponent publication follows the definition. The use of the term influence throughout this publication reflects the definition of common English usage the act or power of producing an effect without apparent exertion of force or direct exercise of command, as distinct from the usage outlined in FM 3-13. It is contrary to law for DOD to undertake operations intended to influence a domestic audience; nothing in this publication recommends activities in

The Relevance of Social Science for Medicine L. Eisenberg, A. Kleinman, 2012-12-06 The central purpose of this book is to demonstrate the relevance of social science concepts, and the data derived from empirical research in those sciences, to problems in the clinical practice of medicine. As physicians, we believe that the biomedical sciences have made - and will continue to make - important contributions to better health. At the same

time, we are no less firmly persuaded that a comprehensive understanding of health and illness, an understanding which is necessary for effective preventive and therapeutic measures, requires equal attention to the social and cultural determinants of the health status of human populations. The authors who agreed to collaborate with us in the writing of this book were chosen on the basis of their experience in designing and executing research on health and health services and in teaching social science concepts and methods which are applicable to medical practice. We have not attempted to solicit contributions to cover the entire range of the social sciences as they apply to medicine. Rather, we have selected key approaches to illustrate the more salient areas. These include: social epidemiology, health services research, social network analysis, cultural studies of illness behavior, along with chapters on the social labeling of deviance, patterns of therapeutic communication, and economic and political analyses of macro-social factors which influence health outcomes as well as services.

**Parenting From Afar and the Reconfiguration of Family Across Distance** Maria Rosario T. de Guzman, Jill Brown, Carolyn Pope Edwards, 2018-04-06 An increasing number of families around the world are now living apart from one another, subsequently causing the defining and redefining of their relationships, roles within the family unit, and how to effectively maintain a sense of familial cohesion through distance. Edited by Maria Rosario T. de Guzman, Jill Brown, and Carolyn Pope Edwards, *Parenting From Afar and the*

Reconfiguration of Family Across Distance uniquely highlights how families-- both in times of crisis and within normative cultural practices--organize and configure themselves and their parenting through physical separation. In this volume, readers are given a unique look into the lives of families around the world that are affected by separation due to a wide range of circumstances including economic migration, fosterage, divorce, military deployment, education, and orphanhood. Contributing authors from the fields of psychology, anthropology, sociology, education, and geography all delve deep into the daily realities of these families and share insight on why they live apart from one another, how families are redefined across long distances, and the impact absence has on various members within the unit. An especially timely volume, Parenting From Afar and the Reconfiguration of Family Across Distance offers readers an important understanding and examination of family life in response to social change and shifts in the caregiving context.

**Pitching Ideas** Jeroen van Geel, 2019-07-16 We are good at designing beautiful products and we offer good services. We always know exactly what the user wants and we know dozens of methodologies. However, if we have to convince our customers and colleagues, we find it rather difficult. For one reason or another, pitching ideas is one of the most undervalued practices in the creative field. From convincing a colleague to opt for a certain methodology to persuading a customer to go for a certain concept, you can have the best ideas in the world, but if you are not able to bring them

across, they will never become reality. In this book the author will take you inside the heads of the people you have to convince. Pitching Ideas will help you to find the essence of the idea you want to get across and will explain how you can really convince the right people in the end.

**Giving to Help, Helping to Give** Tade Akin Aina, 2013-08-01 The past decade has seen a flowering of philanthropic activities across many parts of Africa. Unlike before, this flowering has the distinct character of African agency, energy and engagement. Philanthropy is no longer about narratives of passive, poor and miserable Africans receiving help from rich, fortunate and often Western outsiders. The emerging narratives about philanthropy in Africa are about an increasingly confident and knowledgeable assertion of African capacities to give not only to help but also to transform and seek to address the root causes of injustice, want, ignorance and disease. The narratives are also about the increasing questioning of the role and place of Africans in the world's philanthropic traditions and what constitutes African specificities but also African differences and varieties. This book is about African philanthropic experiences, their varieties, challenges and opportunities. It is about documenting, investigating, describing, questioning and reflecting on philanthropy in Africa. Because Africa is not a monolithic entity with one single history, cultural, political and economic experience, this ground-breaking book rightly tackles the varied modes, forms, vehicles and means in which the philanthropic experiences are

expressed in Africa. It is a pioneering and ambitious effort in a field and community of practice that is new both in terms of scholarship and in professional practice. Many of the chapters boldly engage the burden of reflections, questions, ambivalences and ambiguities that one often finds in an emerging field, innovatively positing the outlines, concepts, frameworks and theories of scholarship and practice for a field critical to development on the continent.

**Healing Logics** Erika Brady, 2001-04-01 Scholars in folklore and anthropology are more directly involved in various aspects of medicine—such as medical education, clinical pastoral care, and negotiation of transcultural issues—than ever before. Old models of investigation that artificially isolated folk medicine, complementary and alternative medicine, and biomedicine as mutually exclusive have proven too limited in exploring the real-life complexities of health belief systems as they observably exist and are applied by contemporary Americans. Recent research strongly suggests that individuals construct their health belief systems from diverse sources of authority, including community and ethnic tradition, education, spiritual beliefs, personal experience, the influence of popular media, and perception of the goals and means of formal medicine. *Healing Logics* explores the diversity of these belief systems and how they interact—in competing, conflicting, and sometimes remarkably congruent ways. This book contains essays by leading scholars in the field and a comprehensive bibliography of

folklore and medicine.
