**Northrop N-63 Convoy Fighter** Jared A. Zichek,2015-11-11 The Northrop N-63 was an unconventional VTOL turboprop tailsitter aircraft proposal submitted to the US Navy's convoy fighter competition of 1950, which ultimately produced the Convair XFY-1 Pogo and Lockheed XFV-1 Salmon. It was a single-seat high performance fighter designed to protect convoy vessels from attack by enemy aircraft, and for vertical unassisted takeoff from, and landings on, small platform areas afloat or ashore. The N-63 featured a straight wing with pronounced dihedral and a very large ventral T-tail; armament consisted of four 20 mm cannon mounted in large pods on the wing tips. The aircraft was powered by an Allison XT-40-A-8 turboprop engine driving 15.5 ft six-blade dual-rotation propellers. The Northrop convoy fighter was designed to land vertically on a robust central landing strut in a collapsible tailcone as well as small shock absorbers located on the aft ends of the wing pods and vertical stabilizer; these landing support points were spread far apart to enhance stability on the deck. In addition to the N-63, Northrop also submitted the N-63A scale prototype airplane design, a small technology demonstrator powered by an Armstrong Siddeley Double

Mamba turboprop. It featured a swappable tail section and auxiliary landing gear which permitted it to take off and land either conventionally or vertically, depending on the proficiency of the pilot. This ebook features 66 illustrations, including detailed schematics, artist's impressions, photos, and speculative color profiles of these remarkable secret aircraft projects, which are sure to appeal to historical aviation enthusiasts and scale modelers alike. This is the publisher's third book covering the convoy fighter competition, the first two being devoted to the Goodyear GA-28A/B and Martin Model 262, both of which are still available from booksellers worldwide in print and digital formats.

**Dallas '63** Peter Dale Scott,2015-09-29 “Our most provocative scholar of American power” reveals the forces behind the assassination of JFK—and their continuing influence over our world (David Talbot, Salon). On November 22, 1963, President John F. Kennedy was gunned down in Dallas by Lee Harvey Oswald. Shortly after, Oswald himself was killed. These events led many to believe there was a far greater plan at work, with a secret cabal of powerful men manipulating the public and shaping US policies both at home and abroad for their own interests. But no one could imagine how right they were. Beneath the orderly façade of the American government, there lies a complex network, only partly structural, linking Wall Street influence, corrupt bureaucracy, and the military-industrial complex. Here lies the true power of the American empire. This behind-the-scenes web is unelected, unaccountable, and immune to popular resistance. Peter Dale Scott calls this entity the deep state, and he has made it his life’s work to write the history of those who

manipulate our government from the shadows. Since the aftermath of World War II, the deep state's power has grown unchecked, and nowhere has it been more apparent than that day at Dealey Plaza. In this landmark volume, Scott traces how culpable elements in the CIA and FBI helped prepare for the assassination, and how the deep state continues to influence our politics today. As timely and important as ever in the current chaotic political climate, Dallas '63 is a reality-shattering, frightening exposé not of those who govern us—but of those who govern those who govern us.
