Human Reasoning and Cognitive Science Keith Stenning, Michiel van Lambalgen, 2012-01-13 A new proposal for integrating the employment of formal and empirical methods in the study of human reasoning. In *Human Reasoning and Cognitive Science*, Keith Stenning and Michiel van Lambalgen—a cognitive scientist and a logician—argue for the indispensability of modern mathematical logic to the study of human reasoning. Logic and cognition were once closely connected, they write, but were “divorced” in the past century; the psychology of deduction went from being central to the cognitive revolution to being the subject of widespread skepticism about whether human reasoning really happens outside the academy. Stenning and van Lambalgen argue that logic and reasoning have been separated because of a series of unwarranted assumptions about logic. Stenning and van Lambalgen contend that psychology cannot ignore processes of interpretation in which people, wittingly or unwittingly, frame problems for subsequent reasoning. The authors employ a neurally implementable defeasible logic for modeling part of this framing process, and show how it can be used to guide the design of experiments and interpret results.

**Travel Behaviour Research International**  
Association for Travel Behaviour Research, 2001  
Developments in methodology and applications in travel behaviour research continue to diversify to capture the growing complexity of human travel activity and coping strategies. The random utility theory (RUM) paradigm on which many econometric and empirical studies have been based since the mid-1970's has been challenged by the bounded utility maximisation or satisficing paradigm. More recently, the rules-based paradigm from psychology has attracted considerable interest and shows signs of offering a serious 'alternative' paradigm to RUM. This book highlights the competition between these ideas and shows how the rules-based paradigm has opened up opportunities to reflect the activity-based decision-making process. In six specially commissioned resource papers - including one by Nobel laureate Daniel McFadden - it describes the state of the art in travel behaviour research, from the fundamentals of data collection to the frontiers of e-commerce. The next 14 chapters then set out a series of research directions for ongoing inquiry. Thirty-three

further chapters then offer detailed leading edge contributions within seven themes: methodological developments in choice analysis; longitudinal perspectives in choice modelling; incorporating schedules, uncertainty and reliability; challenges facing micro-simulation; integrated transport planning models; driver information and route choice; and data structures. Based on research presented at the Ninth International Conference of the International Association for Travel Behaviour Research (IATBR), this volume captures major developments in the field since the publication of the last IATBR volume in 1998, and will therefore be of value to all researchers and practitioners needing to keep abreast of current work on travel behaviour.

**The Origin of Concepts** Susan Carey, 2011 Carey begins by characterizing the innate starting point for conceptual development, namely systems of core cognition. Representations of core cognition are the output of dedicated input analyzers, as with perceptual representations, but these core representations differ from perceptual representations in having more abstract contents and richer functional roles. Carey argues that the key to understanding cognitive development lies in recognizing conceptual discontinuities in which new representational systems emerge that have more expressive power than core cognition and are also incommensurate with core cognition and other earlier representational systems. Finally, Carey fleshes out Quinian bootstrapping, a learning mechanism that has been repeatedly sketched in the literature on the history and philosophy of

science. She demonstrates that Quinian bootstrapping is a major mechanism in the construction of new representational resources over the course of children's cognitive development.

*Inequality in Transport* David Banister,2018 Everyone needs transport to move around and to access everyday needs, but for each individual those needs are different, and they change over time and space: herein lie the seeds of inequalities in transport. In *Inequality in Transport*, David Banister addresses this complex problem, first through an exploration of inequality, its nature, measurement and extent. He then links inequality and the transport sector through detailed analysis of the variations in daily and long-distance travel in Great Britain over a ten-year period. He argues that there must be a much wider interpretation of inequality--one that links actual travel with measures of wellbeing and sustainability, recognizing that these will change over time. In drawing his findings together, he concludes that there must be new thinking in transport policy and planning if transport inequalities are to be alleviated.

*The Forgotten Palestinians* Ilan Pappé, 2011-06-28  
For more than 60 years, hundreds of thousands of Palestinians have lived as Israeli citizens within the borders of the nation formed at the end of the 1948 conflict. Occupying a precarious middle ground between the Jewish citizens of Israel and the dispossessed Palestinians of the West Bank and the Gaza Strip, the Israeli Palestinians have developed an exceedingly complex relationship with the land they call home; however, in the innumerable discussions of the Israel-Palestine problem, their experiences are often overlooked and forgotten. In this book, historian Ilan Pappé examines how Israeli Palestinians have fared under Jewish rule and what their lives tell us about

both Israel's attitude toward minorities and Palestinians' attitudes toward the Jewish state. Drawing upon significant archival and interview material, Pappe analyzes the Israeli state's policy towards its Palestinian citizens, finding discrimination in matters of housing, education, and civil rights. Rigorously researched yet highly readable, *The Forgotten Palestinians* brings a new and much-needed perspective to the Israel-Palestine debate.

### ***Dealing with the Dutch* Jacob Vossestein, 2001**

Whether you are going to the Netherlands on a business trip or to work there for a while, or have regular contact with Dutch people in your own

country, being prepared for Dutch culture will make your stay more effective and your interactions more satisfactory. People from all corners of the world involved in government, business and culture come into contact with the Dutch and are often frustrated by their directness, their critical attitude, and their sometimes slow decision-making processes. This handy volume helps you to understand these characteristics and highlights the many good attributes of the Dutch as well, too. For example, they may drive a hard bargain, but once agreement has been reached, their word is their bond. As in previous editions, this updated version of *Dealing with the Dutch* focuses on Dutch values and norms, but also takes into account the economic, social and cultural changes that the Netherlands is undergoing.

*Discovering the Dutch* Emmeline Besamusca, Jaap Verheul, 2014-11-19 What are the most salient and sparking facts about the Netherlands? This updated edition of 'Discovering the Dutch' tackles the heart of the question of Dutch identity through a number of essential themes that span the culture, history and society of the Netherlands. Running the gamut from the Randstad to the Dutch Golden Age, from William of Orange to Anne Frank, this volume uses a series of vignettes written by academic experts in their fields to address historical and contemporary topics such as immigration, tolerance, and the struggle against water, as well as issues of culture - painting, literature, architecture, and design among them.

All chapters are written by academic experts in their fields who have extensive experience in explaining the many features of Dutchness to a foreign audience. Each chapter comes to life in vignettes that illustrate characteristic historical figures or essential aspects in Dutch culture and society from William of Orange and Anne Frank to Dutch cheese and the inevitable coffeeshop.

*The UnDutchables* Colin White, Laurie Boucke, 2013  
A hilarious yet profound and revealing look at the Dutch, their customs and their mentality. This exquisite satire explores the most diverse aspects of daily Dutch life, from coffee to child rearing, from train travel to the toilet. Learn why the Dutch believe, It is better to debate a question without settling it than to settle a question without debating it, and why it's so hard to learn the Dutch language, The more you try to learn Dutch, the more the Dutch refuse to speak Dutch to you and the more they complain that you haven't learned it. Other topics include Dutch moralizing & criticizing, cozy Dutch homes, flowers & plants, money & thriftiness, work ethics, welfare, commercial cunning, telephone habits, the national passion, rules for shopping, driving, Dutch customs, bikes, language, gay community, food, sex, drugs, phobias, the Dutch abroad and the 1995 flood disaster.

#### Similarity and Categorization Ulrike

Hahn, Michael Ramscar, 2001 Concepts allow us to treat different objects equivalently according to shared attributes, and hence to communicate about, draw inferences from, reason with, and explain these objects. Understanding how concepts are formed and used is thus essential to understanding and applying these basic processes, and the topic of similarity-based classification is central to psychology, artificial intelligence, statistics, and philosophy. This book brings together leading researchers, reflecting the key topics and important developments in the field and provides a uniquely interdisciplinary overview of the subject.
