At the Edge of Space Milton O. Thompson,2013-08-06 In *At the Edge of Space*, Milton O. Thompson tells the dramatic story of one of the most successful research aircraft ever flown. The first

full-length account of the X-15 program, the book profiles the twelve test pilots (Neil Armstrong, Joe Engle, Scott Crossfield, and the author among them) chosen for the program. Thompson has translated a highly technical subject into readable accounts of each pilot's participation, including many heroic and humorous anecdotes and highlighting the pilots' careers after the program ended in 1968.

Violence and Crime in Nineteenth Century England J. Carter Wood,2004-07-31 This book illuminates the origins and development of violence as a social issue by examining a critical period in the evolution of attitudes towards violence. It explores the meaning of violence through an accessible mixture of detailed empirical research and a broad survey of cutting-edge historical theory. The author discusses topics such as street fighting, policing, sports, community discipline and domestic violence and shows how the nineteenth century established enduring patterns in views of violence. Violence and Crime in Nineteenth-Century

England will be essential reading for advanced students and researchers of modern British history, social and cultural history and criminology.
